General Note.—The Number of Hours given in the last column does not in numerous instances, as appears by the Returns received at the National Debt Office, show to anything like the full extent the time occupied in transacting the whole business of the Banks; the attention of the Officers and Clerks being much occupied with Correspondence, attendance on Trustees and Managers at their meetings, half-yearly Balances of Accounts, preparation of Returns to the Commissioners and to Parliament, and various incidental matters in addition to the ordinary business arising from receipt and payment of money.

LIST of all such SAVINGS BANKS as, under the provisions of the Act 26 Vict. c. 14, or otherwise, have been CLOSED and have TRANSFERRED their FUNDS, or any part thereof, to the POST OFFICE SAVINGS BANK; showing, in each Case, the Number of such Banks, as well as the Number and Amount of Depositors' Accounts so Transferred, and the Amount of Compensation, if any, made to all or any of the Officers of such Banks respectively; and showing also the Years in which such Banks were respectively Opened and Closed, and the Number and Amount of their Depositors' Balances, and the Number of Days and Hours in each Week on which the same Banks were Opened for Public Business, at the close of the Year ending on the 20th November next preceding the Date of such Closing; distinguishing the same, as in the form of the Return, for each separate County, as well as collectively, for *England and Wales, Scotland and Ireland*, and for the United Kingdom.

COUNTY.	Date of Notice to Close.	Number and Amount of Depositors' Balances on 20 November, previous to Date of Notice to Close.			Number and Amount of Accounts Transferred to Post Office Savings Bank.			Compensation to Officers under the Provisions of the Act 26 Vict. c. 14.	Years.		Number of Days in each Week Open.	Number of Hours in each Week Open.	
		No.	Amount in Money.	Amount in Government Stock.	No.	Amount in Money.	Amount in Government Stock.		Opened.	Closed.

MEMORANDUM	3
APPENDIX.	
PART I.—RETURNS OF FISH LANDED IN 1889.	
I.—Summary Statement of the Total Quantity and Value of the Fish returned as Landed on the <i>English and Welsh</i> Coasts from the fishing grounds during the year 1889, together with the Average Price of the same, distinguishing the different kinds of Fish	10
II.—Summary Statement of the Total Quantity and Value of the Fish returned as Landed on the <i>English and Welsh</i> Coasts from the fishing grounds during the year 1889, distinguishing the different kinds of Fish and the Coasts on which Landed	11
III.—Detailed Statement of the Total Quantity and Value of the Fish returned as Landed on the <i>English and Welsh</i> Coasts from the fishing grounds during the year 1889, with particulars for each month of the year, distinguishing the different kinds of Fish and the Coasts on which Landed	12
IV.—Statement showing the Value of Fish Landed at each Port or District in <i>England and Wales</i> from the fishing grounds in the year 1889, and the Total Quantity of Fish (by weight), exclusive of Shell Fish	20
V.—Summary Statement of the Total Quantity and Value of the Fish returned as Landed on the <i>Scotch</i> Coasts during the year 1889, together with the Average Price of the same, distinguishing the different kinds of Fish	22
VI.—Summary Statement of the Total Quantity and Value of the Fish returned as Landed on the <i>Irish</i> Coasts during the year 1889, together with the Average Price of the same, distinguishing the different kinds of Fish	22
VII.—Summary of Statements I., V., and VI., showing the Total Quantity and Value of the Fish returned as Landed on the Coasts of the <i>United Kingdom</i> during the year 1889, together with the Average Price of the same, and distinguishing the different kinds of Fish as far as the same can be classified	23
PART II.—COMPARATIVE STATEMENTS OF FISH LANDED FOR A SERIES OF YEARS.	
VIII.—Comparative Statement showing the Quantity and Value of Fish (exclusive of Shell Fish), and the Total Value of Fish, including Shell Fish, returned as Landed on the <i>English and Welsh</i> Coasts in each of the years 1887, 1888, and 1889, distinguishing the Coasts on which Landed	24
IX.—Comparative Statement showing the Total Quantity and Value of Fish returned as Landed on the <i>English and Welsh</i> Coasts, together with the Average Price of the same, in each of the years 1887, 1888, and 1889, distinguishing the different kinds of Fish	24
X.—Comparative Statement showing the Total Quantity and Value of Fish returned as Landed on the <i>Scotch</i> Coasts, together with the Average Price of the same, in each of the years 1887, 1888, and 1889, distinguishing the different kinds of Fish	25
XI.—Comparative Statement showing the Total Quantity and Value of Fish returned as Landed on the <i>Irish</i> Coasts, together with the Average Price of the same, in each of the years 1888 and 1889, distinguishing the different kinds of Fish	25
XII.—Statement showing the Quantity of Fish (exclusive of Shell Fish) and the Total Value of Fish, including Shell Fish, landed at the principal Ports or Districts in <i>England and Wales</i> in each of the years from 1883 to 1889, inclusive	26
PART III.—RETURN OF FISH CONVEYED INLAND BY RAILWAY.	
XIII.—Return of the Quantity of Fish conveyed Inland by Railway from each of the principal Ports of <i>England and Wales, Scotland and Ireland</i> , in the years from 1884 to 1889. From Returns made to the Board of Trade by the various Companies	27
PART IV.—SEA FISHERIES.—FOREIGN COUNTRIES AND BRITISH COLONIES.	
XIV.—Statement of the Number of Vessels and Crews engaged in Fishing in <i>Norway</i> , with the Quantities and Value of the Produce in each year from 1874 to 1888	43
XV.—Statement of the Number of Vessels and Crews engaged in Fishing in <i>Holland</i> , with the Quantities and Value of the Produce in each year from 1874 to 1887	43
XVI.—Statement of the Number of Vessels and Crews engaged in Fishing in <i>France</i> , with the Value of the Produce in each of the years 1860 and 1874 to 1888	44
XVII.—Detailed Statement showing the Quantities and Value of the Produce of the Fisheries of <i>France</i> in each year from 1876 to 1887	44
XVIII.—Statement showing the Yield and Value of the Fisheries in the Dominion of <i>Canada</i> , for the years 1887 and 1888	45
XIX.—Summary Statement showing the Yield per Province for the years 1887 and 1888	46
XX.—Statement showing the Number, Tonnage, and Value of Vessels and Boats, Value of Fishing Materials, &c., and Number of Fishermen engaged in the several Provinces of the Dominion during the year 1888	46

STATISTICAL TABLES and MEMORANDUM relating to the SEA FISHERIES of the UNITED KINGDOM, including RETURN of the Quantity of FISH conveyed INLAND by RAILWAY from each of the Principal PORTS of *England and Wales, Scotland and Ireland*, during each of the Years from 1884 to 1889, inclusive.

MEMORANDUM.

THE results of the collection of fishery statistics for England and Wales during the year 1889 are given in the annexed Tables. This is the fourth year during which the statistics have been collected for the whole twelve months, the collection itself having been commenced in the spring of 1885. To the Tables for England and Wales are also added Tables for the last three years relating to the fishery statistics of Scotland; and for the last two years as to those of Ireland, where the collection of such statistics was commenced during the year 1887, but was not made for a complete year until 1888. Tables are also added relating to the conveyance of fish inland by railway, being in continuation of returns published now for many years past, and, in addition to these, Tables are also given relating to Foreign and Colonial fishery statistics; but the main figures, it should be remarked, relate to the fishery statistics of England and Wales alone. With regard to the method of collection, the particulars have been generally obtained through the Coastguard officers employed at the different stations on the coast, the exceptions being in the case of the more important stations, where special officers have been appointed. The returns as to quantity and value of fish landed made by the appointed officers are received at the Board of Trade once a month, and the abstract results are published monthly; the figures now given being compiled from the monthly figures, revised and corrected up to date.

The statistics it should be remarked are those of *fish first landed* on the coasts of England and Wales, that is of fish landed direct from the fishing grounds, excluding all fish imported from foreign countries as well as all fish that has been previously landed elsewhere in the United Kingdom.

The Tables in the Appendix, it will be observed, are in four parts. The first gives an account of the fish landed on the coasts of the United Kingdom, and especially the coasts of England and Wales during the year, the quantity and value of each kind of fish, the place where landed, the month when landed, and other particulars being stated. The second part shows the principal results in a comparative form for a series of years. The third part consists of the return as to fish conveyed inland by railway from the different ports throughout the country, this return being in a comparative form for a series of years, and being now mainly useful as a check upon the returns of fish landed dealt with in the first two parts. The fourth part comprises returns as to foreign fisheries, which are introduced for the sake of comparison. It is now proposed to call attention to the principal features of the returns thus obtained, the order in which the Tables are arranged being generally, but not closely, followed, and comparisons being introduced on some points, by reference to former reports, where there are no comparative Tables in the Appendix.

The broad fact brought out by the primary return as to fish landed on the coasts of England and Wales with which the department has to deal, is that the quantity so landed last year, exclusive of shell fish, amounted to 6,465,000 cwts., or say 323,000 tons, of the value of 3,862,000 £, which, with the addition of the shell fish having a value of 307,000 £, makes a total of 4,169,000 £. These figures have practically been about the same for several years, the values in 1887 and 1888 respectively having been 4,103,000 £ and 4,213,000 £; but there are some changes in the places where the fish have been landed, and in the importance of the several kinds of fish, which will afterwards be noticed. It would be unsafe as yet to make many minute comparisons, as difficulties of detail have had to be overcome from year to year in order to make the returns more exact, and in any case it would probably be too soon to conclude that, when allowance is made for seasonal changes, the fishing industry will be found to be so stationary as it now appears. The values and average prices stated in

the Table, it will be understood, are those at the point of landing, and generally it is believed that they are stated with very fair accuracy.

The corresponding figures for Scotland show a total quantity of 5,416,000 cwts. landed, exclusive of shell fish, valued at 1,431,000 *l.*, and the total value, including shell fish, to be 1,494,000 *l.* The corresponding figures for Ireland show a total of 798,000 cwts. landed, exclusive of shell fish, valued at 315,000 *l.*, the value, including shell fish, being 331,000 *l.* In the case of Scotland, the total values are much the same as for the previous two years, with which a comparison can be made, though there is some increase of quantity; but in the case of Ireland there is a considerable increase of value, viz., from 191,000 *l.* to 331,000 *l.*, chiefly accounted for by the greatly increased take of mackerel during the year, which has also benefited the English fishery returns a little but not so much in proportion.

The aggregate result for the United Kingdom is a total of 12,678,000 cwts. landed, exclusive of shell fish, or say 634,000 tons, valued at 5,608,000 *l.* at the point of landing. Adding to this the value of shell fish, amounting to 386,000 *l.*, we arrive at the sum of 5,994,000 *l.*, or in round figures 6,000,000 *l.*, as the return of the sea fisheries of the United Kingdom, as valued at the place of landing in the year 1889. This total does not include salmon, except to an infinitesimal extent in the returns for England and Wales. Making an addition for the annual values of Scotch and Irish salmon, according to the returns of 1888, which are the latest available, we should have to increase the above totals by 240,000 *l.* for Scotland and 334,000 *l.* for Ireland, and a smaller though still considerable addition would have to be made for England, bringing up the total annual return of the sea fisheries of the United Kingdom with the addition of the salmon fisheries, which are in a special category, to about 6 $\frac{3}{4}$ millions.

Analysing the returns a little, we find that of the above total of 6,465,000 cwts. landed in England and Wales, and valued at 3,862,000 *l.*, exclusive of shell fish, the leading items as regards weight are, haddock, 1,577,000 cwts.; herrings, 1,923,000 cwts.; and fish not separately enumerated—"all other except shell fish" in the table—1,301,000 cwts.; making together 4,801,000 cwts., out of 6,465,000, or three-fourths of the whole. But these fish though so important in weight, only account for half the value, viz.: haddock 646,000 *l.*; herrings, 469,000 *l.*; and fish not separately enumerated, 902,000 *l.*, or just over 2,000,000 *l.* in all. Among other large items in value, where the quantity is comparatively small, are, turbot, 181,000 *l.*; soles, 431,000 *l.*; prime fish not separately distinguished, 127,000 *l.*; the quantities here being only 54,000, 74,000, and 36,000 cwts. respectively. Occupying an intermediate place are cod, amounting to 301,000 cwts., and valued at 198,000 *l.*; plaice, 594,000 cwts., and 537,000 *l.*; and mackerel, 334,000 cwts., and 230,000 *l.*

The changes in some of these items in the last three years as regards the relation of quantity and value, are interesting. Thus haddock is almost stationary in quantity, but increases in value from 546,000 *l.* in 1887 to 646,000 *l.* in 1889. Herrings at the same time increase in quantity from 1,605,000 to 1,923,000 cwts., but in value only from 442,000 *l.* to 469,000 *l.*, there being actually a diminution in value, as between 1889 and the immediately preceding year, along with an increase in quantity. In fish not separately distinguished—"all other except shell-fish" in the Table—there is a considerable diminution in both quantity and value, in 1889 as compared with 1887, but this is partly due to the separate enumeration of plaice, which commenced in 1888. As between 1888 and 1889 there is an increase in quantity in this item, viz., from 1,252,000 to 1,301,000 cwts., while the value has increased from 826,000 *l.* to 902,000 *l.* Among the more valuable kinds of fish we find that turbot, while maintaining, or nearly maintaining, its value, declines in quantity from 63,000 cwts. in 1887 to 54,000 cwts. in 1889; soles while increasing in value from 389,000 *l.* to 431,000 *l.*, decrease in quantity from 85,000 to 74,000 cwts., and "prime fish not separately distinguished," diminishes largely both in quantity and value, viz., from 116,000 to 36,000 cwts., and from 369,000 *l.* to 127,000 *l.* This last change, however, is, to a large extent, nominal only, arising partly from the more careful classification and distinction of the different kinds of fish, and partly from greater care being exercised as to the returns from Billingsgate, where the quantity of prime fish prior to 1889 was to some extent a matter of estimate. Among the intermediate sorts of fish, we find that cod has increased from 256,000 cwts. in 1887 to 301,000 cwts. in 1889, and

to a nearly corresponding degree in value; plaice, which was only separately distinguished in 1888, diminished from 698,000 cwts. in quantity in that year to 594,000 cwts. in 1889, the diminution in value being from 615,000 *l* to 537,000 *l*., or nearly in proportion; and mackerel has increased in quantity from 291,000 cwts. in 1887 to 334,000 cwts. in 1889, and in value from 167,000 *l*. to 230,000 *l*., there being, however, a decrease in value in 1889 as compared with 1888, along with a slight increase in quantity.

The changes in price noted in Table IX., which are really changes in the product arrived at from dividing the values by the quantities, are, of course, in accordance with these changes in the relation of quantities and values. Notwithstanding changes in classification and the like, incidental to the early years of such a compilation, the conclusion seems fairly well established that the increase in the quantities of fish caught during the last three years, which seems to be a real increase, is mainly an increase in inferior fish, and that there has been at the same time a tendency to diminution in the quantities of superior fish, which has been accompanied by a rise of price, by which, of course, aggregate values are farther maintained.

There is also a rise in price almost all round in 1889 as compared with 1887. The rise in soles is from 4 *l*. 11 *s*. 3½ *d*. per cwt. to 5 *l*. 16 *s*. 4 *d*.; in turbot from 2 *l*. 18 *s*. 5¾ *d*. to 3 *l*. 7 *s*. 6 *d*.; cod remains nearly stationary at a little over 13 *s*. per cwt.; haddock rises from 7 *s*. 0¾ *d*. to 8 *s*. 2½ *d*. per cwt.; and mackerel from 11 *s*. 5½ *d*. to 13 *s*. 9 *d*. (having been 15 *s*. 2½ *d*. in 1888). Almost the only distinct fall in value in an important kind of fish is in herrings, which has declined from 5 *s*. 6 *d*. to 4 *s*. 10½ *d*. per cwt.

The experience of Scotland, it will be observed, as regards changes in quantity and values in the years in question—at least in the inferior fish—is in much the same direction as the experience in England. The increase in quantity between 1887 and 1889 is largely accounted for by the increase in herrings; an intermediate decline in 1888 being accounted for also by a decline in herrings. Herrings, however, preponderate in the Scotch fishing returns to a much larger extent than they do in the English returns, while haddock occupies an important place in both, and the changes in the other kinds of fish in Scotland are unimportant in a general account for the United Kingdom.

In Ireland, as already noted, comparison is only possible for two years, and here the one fact is the great increase in the take of mackerel in 1889. The increase in quantity is from 102,000 to 443,000 cwts., and the increase in value, notwithstanding a fall in price from 10 *s*. 8½ *d*. to 7 *s*. 0¾ *d*. per cwt., is from 55,000 *l*. to 157,000 *l*.

All these figures relate to quantities and values, exclusive of shell-fish. With regard to shell-fish in particular, it appears that the aggregate value in 1889, landed on the coasts of England and Wales, was considerably greater than in 1888, the increase being from 265,000 *l*. to 306,000 *l*., but was less than in 1887, when the amount returned was 324,000 *l*. The great diminution is found to be in oysters, both in quantity and value. In 1887 the number of oysters landed is stated at 53,577,000; in 1888, at 29,230,000 only; and although there is an increase in 1889, it is to a figure still far below that of 1887, being only 36,727,000. Unfortunately it is impossible to say how far this is a real falling off, owing to the positive refusal of different companies to make returns, but it is probable that this refusal accounts for a very large part of the apparent decline. Not having any means of compulsion, the Board of Trade can only note the fact of refusal to make returns. The corresponding values in the three years are 163,000 *l*., 98,000 *l*., and 104,000 *l*. Among other shell-fish lobsters show an increase in number from 518,000 in 1887 to 720,000 in 1889; and in value from 24,000 *l*. to 30,000 *l*.; crabs, an increase in number from 4,081,000 to 5,083,000, and in value from 50,000 *l*. to 54,000 *l*.; and other shell-fish, an increase in quantity from 344,000 to 460,000 cwts., and in value from 88,000 *l*. to 119,000 *l*.

In Scotland the figures for shell-fish are almost stationary for the three years, the total value being a little over 60,000 *l*., while in Ireland there is a large increase in proportion in 1889 compared with 1888, viz., from 7,600 *l*. to 16,000 *l*., these amounts, however, being of course inconsiderable, compared with the total for the United Kingdom.

It will always be understood, of course, that all the above figures are of landing values only. Nothing is included for the value of other fishing industries connected with bringing the fish to market, curing, and the like operations, by

which the value of the fish as landed is greatly enhanced before it reaches even the wholesale market. If we compare these figures with estimates of the value of the fishing industry of the United Kingdom, in which other items are included, the difference of the basis should always be remembered. If the value of the fish were to be taken at a later stage of the industry, the annual amount, instead of being between six and seven millions only, might easily be put, with no great inaccuracy, at nearly double these totals.

As has been hinted already, while the total return of the fishing industry does not seem to have varied much in the last three years, there are some interesting changes to notice as regards the place of landing. Looking at the figures for England and Wales in the most general way, and with regard to the three divisions into which the coast is divided, viz.: East coast, West coast, and South coast, we find that on the whole the East coast, though it is still by far the most important, rather diminishes in importance, and the South and West coasts are becoming more important. In 1887 the values landed on the East coast were 3,472,000*l.* out of 4,103,000*l.*; on the South coast 463,000*l.*; and on the West coast only 168,000*l.* In 1889 the values on the East coast had diminished to 3,127,000*l.*, but on the South coast they had risen to 565,000*l.*, and on the West coast to 477,000*l.* To some extent these changes are explained by the general decrease as regards prime fish already referred to, which is to some extent nominal only as regards fish landed at London, the most important point on the East coast; but it would also appear that there is some increase of take on the South and West coasts, partly in mackerel, and partly in prime fish. Thus, as regards prime fish, we have the following figures for the South coast:

QUANTITIES and VALUES of the different sorts of Prime Fish landed on the South Coast in 1887, 1888, and 1889.

QUANTITY.

					Turbot.	Soles.	Prime Fish not separately distinguished.	TOTAL.
					<i>Cwts.</i>	<i>Cwts.</i>	<i>Cwts.</i>	<i>Cwts.</i>
1887	-	-	-	-	3,582	9,314	6,426	19,322
1888	-	-	-	-	4,408	11,256	8,358	24,022
1889	-	-	-	-	5,838	12,709	10,134	28,681

VALUE.

					£.	£.	£.	£.
1887	-	-	-	-	14,431	51,261	18,443	84,135
1888	-	-	-	-	17,015	62,837	36,896	116,748
1889	-	-	-	-	22,844	73,967	49,342	146,153

Of course the East coast remains by far the most important coast, and part of the above changes may be the result of increased care in collection from the remoter parts of the coast; but the changes are considerable, and it remains now to be seen whether further changes will be in the same direction.

As regards mackerel, again, the comparison for the West coast is specially interesting. We get the following figures:—

QUANTITY and VALUE of Mackerel returned as landed on the West Coast of England and Wales in the following Years.

					Quantity.	Value.
					<i>Cwts.</i>	£.
1887	-	-	-	-	50,664	26,350
1888	-	-	-	-	166,945	128,182
1889	-	-	-	-	174,887	101,834

Thus

Thus there is apparently no doubt of a really increased take on the South and West coasts, coupled with some decline on the East coast, after making all allowance for merely nominal changes. The matter, however, has been complicated somewhat by the difficulty of distinguishing on the West coast, especially at the ports in Milford Haven, between fish first landed there and fish that had been previously landed on the Irish coast. Previously to March 1888, fish coming from Irish fisheries, whether it had been previously landed in Ireland or not, was not included in the returns, but since then the distinction has been maintained, and fish not previously landed in Ireland has been included. Still it is believed that the amounts in the returns are not increased exclusively from this cause, but that there has been a real increase of the business, as regards fish first landed, of late years. In any case, in accordance with previous practice, a note is added to Table IV., showing the quantity of fish landed at these ports, which had been previously landed in Ireland, and both as regards such fish, as well as in respect of fish first landed, there is an increase in 1889 compared with 1888. It is an obvious remark, of course, that part of what is included in the English return is the produce of fisheries off the coast of Ireland, but it is the produce of English fishery in the sense that the base of operations is in England, and the fish is directly brought there.

The point as to change in the place of landing is so interesting that it has been thought useful to insert an additional comparative Table (*see* Table XII. in Appendix), showing the quantities and value of fish landed at each of the principal ports in the United Kingdom in the last four years, during which the returns have been fairly complete. The decline or stationariness in the returns from East coast places generally, though there is an increase in some, is manifest; and equally the increase at Southern and Western stations, particularly Brixham and Plymouth, on the South coast, and St. Ives, Milford (including Neyland) and Fleetwood on the West coast; subject, of course, in these last cases to the explanations already given. The great decline on the East coast is, however, at London, and though as regards values this is partly nominal only, for the reason already given as to prime fish, this does not apply to quantities, in which there is a great decline indeed. The figures are:—

QUANTITIES of Fish (exclusive of Shell Fish) first landed at London in the following Years :

									<i>Tons.</i>
1886	-	-	-	-	-	-	-	-	65,182
1887	-	-	-	-	-	-	-	-	65,893
1888	-	-	-	-	-	-	-	-	61,827
1889	-	-	-	-	-	-	-	-	53,154

With these figures may be compared the quantity of fish conveyed inland by rail (Appendix, Part III.), showing a decided tendency to increase, though, as the fish here are not classified, the comparison is not so good as it would otherwise be. The inference would seem to be that there is a tendency to bring fish to London from distant parts by rail, instead of bringing them direct from the fishing grounds by sea. It remains to be seen, however, how far this is merely a temporary change, or is one of a permanent character. It will be noticed from this part of the Appendix that there is a steady increase in the quantity of fish conveyed inland by rail from Scotch ports, as well as from some English ports.

Another point to which attention may be drawn in detail is the quantity and value of fish landed, and the different kinds in each month of the year, on the different coasts. It would seem from these returns, which have now been prepared in this form for several years (*see* Table III.), that there is comparative regularity from month to month in the take of prime fish, and in the take of the kinds intermediate between such fish and those that are classed as inferior; but that great variations occur in the take of mackerel, herrings, and pilchards—the changes, as regards these, affecting the total for particular months. There

are also similar variations, of course, in the oyster fishery. The following are the general results :—

VALUES of Fish landed on the Coast of England and Wales in each Month of the Year :

Month.	Value.			Month.	Value.		
	1887.	1888.	1889.		1887.	1888.	1889.
	£.	£.	£.		£.	£.	£.
January -	282,000	289,000	307,000	July -	331,000	298,000	316,000
February -	283,000	283,000	250,000	August -	339,000	380,000	377,000
March -	307,000	311,000	315,000	September	385,000	394,000	382,000
April -	359,000	369,000	349,000	October -	432,000	470,000	426,000
May -	311,000	391,000	415,000	November	432,000	376,000	395,000
June -	288,000	345,000	310,000	December	354,000	307,000	327,000

	1887.	1888.	1889.
	£.	£.	£.
Monthly Average for 1st Quarter	291,000	294,000	291,600
" " 2nd " -	319,000	368,000	358,000
" " 3rd " -	352,000	357,000	358,000
" " 4th " -	406,000	384,000	383,000

From this statement it appears that the last quarter of the year is, as in previous years, the most important, whilst the first is the least important.

In 1889, October and May are the most important months; the month of September, which in 1888 was of second importance, only coming fourth in 1889 with 382,000 *l.*, whilst November, which came fifth in importance in 1888, ranks third in 1889 with 395,000 *l.*

To complete the general view of the sea fisheries of the United Kingdom, the following particulars as to Imports and Exports, supplementary to those given in previous years, are added :—

(a.) Imports.

	1888.		1889.

Herrings :	<i>Barrels.</i>	<i>£.</i>	<i>Barrels.</i>	<i>£.</i>
To Russia - - - -	124,549	146,760	158,688	188,261
„ Germany - - - -	640,364	727,531	787,438	823,454
„ Other Countries - - -	206,579	231,059	205,316	225,985
TOTAL Herrings - - -	971,492	1,105,350	1,151,442	1,237,700
Other Descriptions - - -	—	462,816	—	529,639
TOTAL, Fresh and Cured - - -	—	1,568,166	—	1,767,339

From these it would appear that the imports and exports of fish very nearly balance each other. The annual consumption of fish in the United Kingdom is, therefore, at least equal to, if not in excess of, the annual produce of the sea fisheries around the coasts, that value, as above noted, in the wholesale markets being probably not far short of twice the landing value, or 13,000,000 *l.*

FOREIGN AND COLONIAL SEA FISHERIES.

The Statistical Abstract for Foreign Countries contains Tables relating to the sea fisheries of France, Norway, and Holland. Those appearing in the forthcoming number of that Abstract are appended to the Statistical Tables accompanying the present Report, together with Tables relating to Canadian fisheries, which are the most important among the Colonial fisheries

See pages 43-44

See pages 45-46

Comparing these fisheries, where total values are given, with those of the United Kingdom, as stated in the foregoing Report, we have the following results, which agree very nearly with those given in the previous reports issued:—

ANNUAL VALUE of the Sea Fisheries of the undermentioned Countries.

	£.
Norway (1888) - - - - -	1,214,000
Holland. (A general total cannot be stated, but comparing the number of vessels and crews, it would seem that the Dutch fisheries cannot be so important as those of Norway.)	
France (1887) - - - - -	3,625,000
Canadian Dominion (1888) - - - - -	3,629,000
United Kingdom (1889) * - - - - -	6,568,000

There is hardly any change in these figures as compared with those put forward in our last Report, so that the relative magnitude of the English sea fisheries, in comparison with those of any other country which publishes complete annual returns, remains what was then described.

Board of Trade,
February 1890.

R. Giffen.
G. J. Swanston.

* Including Scotch and Irish salmon, as in 1888.

APPENDIX.

PART I.—RETURNS OF FISH LANDED IN 1889.

I.—SUMMARY STATEMENT of the TOTAL QUANTITY and VALUE of the FISH returned as Landed on the *English* and *Welsh* Coasts from the Fishing Grounds during the Year 1889, together with the AVERAGE PRICE of the same, distinguishing the different Kinds of FISH.

	Quantity.	Value.	Average Price.

PART III.—RETURN OF FISH CONVEYED INLAND BY RAILWAY.

XIII.—RETURN of the Quantity of FISH conveyed INLAND by RAILWAY from each of the principal PORTS of *England and Wales, Scotland, and Ireland*, in the Years from 1884 to 1889. From Returns made to the Board of Trade by the various Companies.

(*Note*.—The figures in the back years have been in some cases altered, revised, or added to by the various Railway Companies. It will be understood that the quantity of fish included in this Return is not in some cases strictly the produce of the Sea Fisheries of the United Kingdom, but may include fish brought from abroad as well as river or river-caught fish.)

TOTAL Quantity of Fish conveyed Inland by Railways in England and Wales from principal Ports		263,280	250,379	252,529	257,626	257,109	276,791

* The decrease, as compared with the year 1884, is attributable chiefly to the falling off in the traffic from Ardglass. All fish brought into Holyhead direct from the fishing grounds is included under the head of local fish.

† This railway is now worked by the Lancashire and Yorkshire and London and North Western Joint Railways.

ENGLAND AND WALES—*continued.*

SEA FISHERIES ACT (1868).

ORDERS FOR FISHERY GRANTS,

1890.

REPORT by the BOARD OF TRADE of their PROCEEDINGS under Part III. of
"THE SEA FISHERIES ACT, 1868."

IN pursuance of Section 50 of "The Sea Fisheries Act, 1868," the Board of Trade make the following Report respecting the applications to, and the proceedings of, the Board under Part III. of that Act during the past year.

On the 1st July 1889, the date of the last Report of the Board of Trade under "The Sea Fisheries Act, 1868," no application for the grant of an Order under Part III. of that Act was under consideration, and none has since been received.

The following proceedings have been taken under existing Orders.

Inquiries and examinations have been made by an inspector, under the provisions of Section 45 of the Act, with respect to the following fisheries:—

1. The Emsworth Channel Fishery ;
2. The Bosham Fishery ;
3. The Ramsholt Fishery ;

but no certificate has been issued under that section with respect to either of such fisheries.

Under the provisions of the Lynn Deep's Fishery Order, 1872, a certificate, dated the 17th March 1890, has been issued, stating that the portions of the Lynn Deep's Fishery known as the Bull Dog Scalp and the Upper Daseley Scalp have been duly closed under the provisions of that Order since the 1st September 1888 and the 18th February 1890, respectively, and that from the date of such certificate the said portions of the fishery and no other are duly closed for such periods respectively, not exceeding the period of three years from the dates respectively above mentioned, as the Corporation of King's Lynn may deem necessary.

No alteration in the Regulations issued by this Board has been made since their last Report.

Board of Trade, }
1 July 1890. }

Henry G. Calcraft.

SEA FISHERIES REGULATION ACT, 1888.

51 & 52 Vict. c. 54.

ORDER FOR THE CREATION OF THE CORNWALL SEA FISHERIES DISTRICT.

WHEREAS application has been made to the Board of Trade by the County Council of Cornwall to create a Sea Fisheries District in accordance with the above Act (herein-after referred to as "the Act"), and to exercise certain other powers conferred upon them thereby :

And whereas the proposed district will overlap the districts of the Boards of Conservators of the Camel and Fowey Fishery Districts, being Boards of Salmon Conservators within the meaning of the Act, and the said Boards of Conservators have jurisdiction therein :

And whereas the Board of Trade have caused the draft of their proposed Order to be locally published, and no objection has been made thereto or to any of the provisions thereof.

Now, therefore, the Board of Trade, by virtue of the powers conferred upon them by the Act and otherwise, do hereby make the following Order :—

1. CREATION OF DISTRICT.

A Sea Fisheries District is hereby created, comprising so much of the sea within which Her Majesty's subjects have by international law the exclusive right of fishing, with the adjoining coast, as lies within the following limits, namely, on the north a line drawn true west from the seaward extremity of the northern boundary of the County of Cornwall at Marsland Mouth, and on the south a line drawn true south from the seaward extremity of Rame Head, in the said county : Provided that a line shall be drawn in manner following at or near the mouth of every river or stream flowing into the sea or of any estuary within such limits :—

- A straight line at or near the mouth of the River Camel from the westernmost extremity of Trebetherick Point to the seaward extremity of Stepper Point ;
- A straight line at or near the mouth of the Helford River from Tindern farmhouse to the southernmost extremity of Mawnan Chair ;
- A straight line at or near the mouth of the River Fal from the southernmost extremity of Pendennis Point to the Lighthouse, St. Anthony ;
- A straight line at or near the mouth of the River Fowey from the southernmost extremity of St. Catherine's Point to the highest point of Punch Cross, and continued thence to the nearest point on the mainland ;
- A straight line at or near the mouth of the Looe River from the seaward extremity of Nailzee Point to the seaward extremity of the Outer Pier ;
- A straight line across the mouth of every such river, stream, or estuary not herein-before specified, such line being in continuation of the general line of low-water mark :

and such lines shall be the lines above which the Sea Fisheries District shall not extend into any such river, stream, or estuary ;—the limits of the district

hereby created being more particularly shown in a map marked S. 32/1890, and deposited at the Board of Trade.

In respect of such rivers, streams, and estuaries, and also in respect of any area subject to a byelaw made under section 39, sub-section 8, of the Salmon Fishery Act, 1873, the Boards of Conservators of the said Camel and Fowey Fishery Districts shall within their districts respectively have the powers of a Local Fisheries Committee under and in accordance with the Act.

The Sea Fisheries District hereby created shall be called the Cornwall Sea Fisheries District.

2. CONSTITUTION OF COMMITTEE.

A Local Fisheries Committee shall be constituted for the regulation of the sea fisheries carried on within the said district.

Such Committee shall be a committee of the County Council of Cornwall, and shall consist of twenty-four members, namely, twelve members appointed by the County Council of Cornwall, with the addition of twelve fishery members representing the fishing interests of the district, whereof one member shall represent the Board of Conservators of the Camel Fishery District, one member shall represent the Board of Conservators of the Fowey Fishery District, and ten members shall be appointed by the Board of Trade.

The members to be appointed by the County Council of Cornwall shall be appointed in each year at the usual quarterly meeting of the said County Council, held in the month of November.

The members to be appointed by the Boards of Salmon Conservators or by the Board of Trade shall be appointed in each year previous to the seventh day of November.

All the members shall retire and the new members shall come into office in each year on the seventh day of November.

Provided that the first members to be appointed by the County Council and by the Boards of Salmon Conservators shall be appointed at the meeting of each body respectively held next after the coming into force of this Order; and the first members to be appointed by the Board of Trade shall be appointed before the first day of June next.

The first members of the Committee shall come into office on the first day of June next, and shall retire on the seventh day of November next.

Retiring members shall be eligible for re-appointment.

On the occurrence of any casual vacancy in the Committee by death, resignation, or otherwise, the body by whom the vacating member was appointed may fill up the vacancy by a fresh appointment.

It shall be the duty of the clerk or other officer of the Committee to forthwith notify every such vacancy to the appointing body.

It shall be the duty of every appointing body to forthwith notify every appointment of a member of the Committee to the clerk or other officer of the Committee, or, in the case of the appointment of the first members, to the clerk of the County Council of Cornwall.

No act or proceeding of the Committee shall be questioned on account of any vacancy or vacancies in the Committee, and no defect in the appointment of any person or persons acting as member or members of the Committee shall vitiate any proceedings of the Committee in which he or they have taken part.

Except as provided by section 6 of the Act, the County Council shall not make, vary, or revoke any regulations or standing orders respecting the quorum or proceedings of the Committee hereby constituted, nor as to the area within which it is to exercise its authority.

Subject to any restrictions or conditions made under section 6 of the Act, the Committee shall not be required to report its proceedings to the County Council nor shall its acts or proceedings be submitted to such Council for approval.

The first meeting of the Committee shall be summoned by the Chairman of the County Council of Cornwall.

The Committee shall hold four quarterly meetings in each year for the transaction of general business in addition to any special or adjourned meetings.

Five members shall be a quorum at any meeting of the Committee.

3. EXPENSES.

The expenses of the Committee, other than those which may be required to be incurred under section 8 of the Act, shall be chargeable on the Administrative County of Cornwall as general expenses of the council thereof.

4. DEFINITIONS.

In this Order, the expression "Camel Fishery District" means the Fishery District of the River Camel, formed and defined under the Salmon and Fresh-water Fisheries Acts, 1861 to 1886, or any of them, by a certificate of one of Her Majesty's Principal Secretaries of State, dated the 4th day of September 1866, and altered by a certificate of the Board of Trade dated the 1st day of March 1890; and the expression "Fowey Fishery District" means the Fishery District of the River Fowey, formed and defined under the said Acts, or any of them, by a certificate of one of Her Majesty's Principal Secretaries of State, dated the 4th day of September 1866, and altered by a certificate of the Board of Trade dated the 1st day of March 1890.

Signed and sealed by order of the Board of Trade this 28th day of March 1890.

SEA FISHERIES REGULATION ACT, 1888.

51 & 52 Vict. c. 54.

ORDER FOR THE CREATION OF THE GLAMORGAN SEA FISHERIES DISTRICT.

WHEREAS application has been made to the Board of Trade by the Borough Council of Swansea, being a County Borough, to create a Sea Fisheries District in accordance with the above Act (herein-after referred to as "the Act"), and to exercise certain other powers conferred upon them thereby:

And whereas the said Borough is a municipal borough containing, according to the census of one thousand eight hundred and eighty-one, a population of not less than twenty thousand:

And whereas the County Council of Glamorgan and the Borough Council of Swansea appear to be interested in the proposed district, and such district will overlap the district of the Board of Conservators of the Ogmore Fishery District, being a Board of Salmon Conservators within the meaning of the Act, and the said Board of Conservators have jurisdiction therein:

And whereas the Board of Trade have caused the draft of their proposed Order to be locally published, and objections to certain provisions thereof have been made by the County Council of Glamorgan and the Urban Sanitary Authority for the district of Oystermouth, and a local inquiry into such objections has been duly held:

Now, therefore, the Board of Trade, by virtue of the powers conferred upon them by the Act and otherwise, do hereby make the following Order:—

I. CREATION OF DISTRICT.

A Sea Fisheries District is hereby created, comprising so much of the sea within which Her Majesty's subjects have by international law the exclusive right of fishing, with the adjoining coast, as lies within the following limits, namely, on the west a line drawn true south-west from the seaward extremity of Worms Head in the County of Glamorgan, and on the east a line drawn true south from the lower lighthouse at Nash Point in the said county: Provided that a line shall be drawn in manner following at or near the mouth of every river or stream flowing into the sea or into any estuary within such limits:—

A straight line at or near the mouth of the River Tawe from the lighthouse on the west pier at Swansea to the lighthouse on the east pier;

A straight line at or near the mouth of the River Neath across the said river in a true northerly direction from the lighthouse at the extremity of the breakwater at Briton Ferry;

A straight line across the mouth of the River Ogmore such line being in continuation of the general line of ordinary low-water mark;

A straight line across the mouth of every such river or stream not herein-before specified, such line being in continuation of the general line of ordinary high-water mark:

and such lines shall be the lines above which the Sea Fisheries District shall not extend into any such river or stream;—the limits of the district hereby created being more particularly shown in a map marked S. 756/1890, and deposited at the Board of Trade.

In respect of such rivers and streams, and also in respect of any area subject to a byelaw made under section 39, sub-section 8, of the Salmon Fishery Act, 1873, the Board of Conservators of the said Ogmore Fishery District shall within their district have the powers of a Local Fisheries Committee under and in accordance with the Act.

The Sea Fisheries District hereby created shall be called the Glamorgan Sea Fisheries District.

2. CONSTITUTION OF COMMITTEE.

A Local Fisheries Committee shall be constituted for the regulation of the sea fisheries carried on within the said district.

Such Committee shall be a joint committee of the County Council of Glamorgan and of the Borough Council of Swansea, and shall consist of twelve members, namely, three members appointed by the County Council of Glamorgan and three members appointed by the Borough Council of Swansea, with the addition of six fishery members representing the fishing interests of the district, whereof one member shall represent the Board of Conservators of the Ogmore Fishery District and five members shall be appointed by the Board of Trade.

The members to be appointed by the Councils shall be appointed in each year at the usual quarterly meeting of the said Councils respectively held in the month of November.

The members to be appointed by the Board of Salmon Conservators or by the Board of Trade shall be appointed in each year previous to the ninth day of November.

All the members shall retire and the new members shall come into office in each year on the ninth day of November :

Provided that the first members to be appointed by the Councils and by the Board of Salmon Conservators shall be appointed at the meeting of each body respectively held next after the coming into force of this Order, except that, where any Council have delegated to a Committee of their body the power of appointing such first members, the appointment made by such Committee at their first meeting after the coming into force of this Order shall have the same force and validity as if the same had been made by the Council ; and the first members to be appointed by the Board of Trade shall be appointed before the first day of September next.

The first members of the Committee shall come into office on the first day of September next, and shall retire on the ninth day of November 1891.

Retiring members shall be eligible for re-appointment.

On the occurrence of any casual vacancy in the Committee by death, resignation, or otherwise, the body by whom the vacating member was appointed may fill up the vacancy by a fresh appointment.

It shall be the duty of the clerk or other officer of the Committee to forthwith notify every such vacancy to the appointing body.

It shall be the duty of every appointing body to forthwith notify every appointment of a member of the Committee to the clerk or other officer of the Committee, or, in the case of the appointment of the first members, to the Mayor of Swansea.

No act or proceeding of the Committee shall be questioned on account of any vacancy or vacancies in the Committee, and no defect in the appointment of any person or persons acting as member or members of the Committee shall vitiate any proceedings of the Committee in which he or they have taken part.

Except as provided by section 6 of the Act, no Council shall make, vary, or revoke any regulations or standing orders respecting the quorum or proceedings of the Committee hereby constituted or as to the area within which it is to exercise its authority : provided that any Council may make a regulation requiring the Committee to submit to such Council once in each year an estimate of expenses proposed to be incurred by them under the Act, and once in each year a printed abstract of their accounts for the preceding year, and to afford to any person or persons appointed for the purpose by the Council access at all reasonable times to the books containing their accounts.

Subject to any restrictions or conditions made under section 6 of the Act, the Committee shall not be required to report its proceedings to any Council, nor shall its acts or proceedings be submitted to any Council for approval.

The first meeting of the Committee shall be summoned by the Mayor of Swansea.

The Committee shall hold four quarterly meetings in each year for the transaction of general business, in addition to any special or adjourned meetings.

Five members shall be a quorum at any meeting of the Committee.

3. EXPENSES.

The expenses of the Committee, other than those which may be required to be incurred under section 8 of the Act, shall be chargeable as follows:—namely, one half thereof on the Administrative County of Glamorgan as general expenses of the Council thereof, and one half on the Borough Fund of the Borough of Swansea.

4. DEFINITIONS.

In this Order the expression “Ogmore Fishery District” means the Fishery District of the River Ogmore, formed and defined under the Salmon and Freshwater Fisheries Acts, 1861 to 1886, or any of them, by a certificate of one of Her Majesty’s Principal Secretaries of State dated the 28th day of March 1874.

Signed and sealed by order of the Board of Trade this 8th day of July 1890.

(L.S.) (Signed) HENRY G. CALCRAFT,
Secretary to the said Board.

SEA FISHERIES REGULATION ACT, 1888.

REPORT OF AN INSPECTOR OF FISHERIES ON AN INQUIRY INTO OBJECTIONS TO CERTAIN PROVISIONS OF THE DRAFT ORDER FOR THE CREATION OF THE PROPOSED GLAMORGAN SEA FISHERIES DISTRICT.

SIR,

Board of Trade, July 7, 1890.

I HAVE the honour to report, for the information of the Board of Trade, that, in accordance with their instructions, I held a local inquiry at the Guildhall, Swansea, on the 4th instant, into certain objections to some of the provisions of the draft Order for the creation of the proposed Glamorgan Sea Fisheries District.

The County Council of Glamorgan had objected to that part of the draft Order which provided that the representation of that Council and of the Council of the borough of Swansea on the Local Fisheries Committee, and their respective contributions to the expenses of the Committee, should be in the proportion of seven to three; and the Local Board of Oystermouth had objected to the number of fishery members proposed in the draft Order as inadequate, and to the absence of any provisions for giving direct representation to that Board on the Local Fisheries Committee, and for excluding from the jurisdiction of the Committee the oyster and mussel fisheries comprised in the Swansea Fishery Orders of 1871 and 1883.

As regards the first point, an alternative proposal was made, and met with the cordial support of the representatives of both Councils, that both bodies should share equally in representation on the Committee, and in contribution to its expenses, and I submit that the draft Order should be amended in accordance with this arrangement.

A subsidiary recommendation, that the number of members to be appointed by each Council should be three, met with the unanimous concurrence of the representatives of both bodies. The effect of this proposal, if adopted, would be to reduce the total number of members to be appointed on the Local Fisheries Committee from 20 to 12. Having regard to the area of the proposed district, the extent of its fishing interests, and the general advantage of a smaller Committee as compared with a larger one, I am of opinion that the proposed alteration deserves the favourable consideration of the Board of Trade, an opinion which is in no way modified by the representations made on behalf of the Local Board of Oystermouth. This body are the Undertakers of the "Swansea Fishery Order, 1871," as amended by the "Swansea Fishery Order, 1883," granted under the provisions of the Sea Fisheries Act, 1868, by virtue of which they have certain powers for the regulation of the oyster and mussel fisheries, within an area almost co-extensive with the proposed Glamorgan Sea Fisheries District. The real point of their objection was that the draft Order did not make definite provision for their representation on the Local Fisheries Committee. It was claimed on their behalf that to them should be delegated the duty of appointing at least half of the fishery members, and that the Local Fisheries Committee should be prohibited from exercising any jurisdiction over the oyster and mussel fisheries in question, unless an arrangement could be arrived at whereby their authority under the Swansea Fishery Orders could be transferred to the Local Fisheries Committee, in which case the Local Board would expect a still larger representation.

These claims appear to me to be untenable. It was not shown that there was any power to exclude the oyster and mussel fisheries from the jurisdiction of a Local Fisheries Committee, and any objection on this point would more properly have been made to any byelaws affecting those fisheries which might hereafter be proposed by the Committee. But whatever justification might have existed for any of these claims must have disappeared in view of the admissions made by the representatives of the Local Board of their almost absolute neglect to carry out the duties imposed upon them by

the Swansea Fishery Orders, on which they are based. It is further admitted that there are other oyster and mussel fisheries within the area of the proposed district, but beyond the jurisdiction of the Oystermouth Local Board, which are, perhaps, as important as those within it, and that the other branches of the local fishing industry over which they have no control, such as trawling, seining, line fishing, &c., are, in the present state of the oyster fishery, more important.

Under these circumstances, I submit that the claims thus advanced by the Oystermouth Local Board are unreasonable; while their reasonable desire to see proper representation given on the Local Fisheries Committee to the interests of the industry with which they are concerned should be amply satisfied by the expressed readiness of the Board of Trade to consider any recommendation which they may make of persons qualified to be appointed as fishery members.

Two other points remain for consideration. The first is a proposal in which the representatives of the Glamorgan County Council most readily concurred, that in view of the central position and local interests of Swansea, the Mayor of that borough, rather than the Chairman of the County Council, should have the privilege and duty of summoning the first meeting of the Committee. The other is that, as the next meeting of the County Council after the coming into force of the Order will probably not be held till November, the date proposed to be fixed for the appointment of the first members should be postponed until then, unless provision is made in the Order, with respect to the County Council members, for such appointment being made by a Committee of that body.

I submit, for the consideration and approval of the Board of Trade, that these proposals should be adopted.

I have, &c.

The Assistant Secretary,
Fisheries Department,
Board of Trade.

(Signed) CHARLES E. FRYER,
Inspector of Fisheries.

Order for the creation of the Kent and Essex Sea Fisheries District.

WHEREAS application has been made to the Board of Trade by the County Councils of Kent and Essex to create a Sea Fisheries District in accordance with the above Act (herein-after referred to as "the Act"), and to exercise certain other powers conferred upon them thereby :

And whereas the said Councils appear to be interested in the proposed district, and such district will overlap the district of the Board of Conservators of the Stour Fishery District, being a Board of Salmon Conservators within the meaning of the Act, and the said Board has jurisdiction therein :

And whereas the Board of Trade have caused the draft of their proposed Order to be locally published, and no objection has been made thereto or to any of the provisions thereof.

Now, therefore, the Board of Trade, by virtue of the powers conferred upon them by the Act, and otherwise, do hereby make the following Order :—

1. *Creation of District.*

A Sea Fisheries District is hereby created, comprising so much of the sea within which Her Majesty's subjects have by international law the exclusive right of fishing, with the adjoining coast, as lies within the following limits, namely, on the south a line drawn true south-east from the lighthouse at Dungeness, in the County of Kent, and on the north a straight line drawn seawards through the two lights at Dovercourt, in the County of Essex : Provided that a line shall be drawn in manner following at or near the mouth of every river or stream flowing into the sea or into any estuary within such limits :—

A straight line at or near the mouth of the River Stour, in the County of Kent, from the flagstaff of the Shingle End Coastguard Station to the flagstaff of St. Augustine's Coastguard Station ;

A straight line at or near the mouth of the River Medway from Garrison Point at Sheerness to Dolly Bank ;

A straight line at or near the mouth of the River Thames from London Stone near the entrance to Yantlet Creek, in the County of Kent, to Crow Stone, otherwise the City Stone, opposite Canvey Island, in the County of Essex, and continued on either side to ordinary high-water mark ;

A line at or near the mouth of the River Colne, straight from Westnesse, otherwise St. Osyth Point, to the Fishery Buoy, and thence straight to Mersea Stone ;

A line across every such river or stream not herein-before specified, such line being drawn at the limit of ordinary high water ; and such lines shall be the lines above which the Sea Fisheries District shall not extend into any such river or stream :

Provided also that the district shall not extend into the River Medway through the channel of the Swale beyond a straight line drawn from Swale, otherwise Queenborough, Spit, to Minster Church Tower, nor into the Mersea and Pyefleet Channels beyond a line drawn along the western side of the Strood ; the limits of the district hereby created being more particularly shown in a map marked S. 140/1890, and deposited at the Board of Trade.

In respect of such rivers and streams the Board of Conservators of the Stour Fishery District shall, within their district, have the powers of a Local Fisheries Committee under and in accordance with the Act.

The Sea Fisheries District hereby created shall be called the Kent and Essex Sea Fisheries District.

2. *Constitution of Committee.*

A Local Fisheries Committee shall be constituted for the regulation of the sea fisheries carried on within the said district.

Such Committee shall be a Joint Committee of the County Councils of Kent and Essex, and shall consist of thirty-two members, namely, eight members appointed by the County Council of Kent, and eight members appointed by the County Council of Essex, with the addition of sixteen fishery members representing the fishing interests of the district, whereof one member shall represent the Board of Conservators of the Stour Fishery District, and fifteen members shall be appointed by the Board of Trade.

The members to be appointed by the Councils shall be appointed in each year at the usual quarterly meeting of the said Councils respectively held in the month of November.

The members to be appointed by the Board of Salmon Conservators, and by the Board of Trade, shall be appointed in each year not later than the seventh day of November.

All the members shall retire and the new members shall come into office in each year on the seventh day of November.

Provided that the first members to be appointed by the Councils and by the Board of Salmon Conservators, shall be appointed at the meeting of each body, respectively, held next after the coming into force of this Order, except that where any Council have delegated to a Committee of their body the power of appointing such first members, the appointment made by such Committee at their first meeting after the coming into force of this Order shall have the same force and validity as if the same had been made by the Council; and the first members to be appointed by the Board of Trade shall be appointed before the fourteenth day of June next.

The first members of the Committee shall come into office on the fourteenth day of June next, and shall retire on the seventh day of November next.

Retiring members shall be eligible for re-appointment.

On the occurrence of any casual vacancy in the Committee by death, resignation, or otherwise, the body by whom the vacating member was appointed may fill up the vacancy by a fresh appointment.

It shall be the duty of the clerk or other officer of the Committee to forthwith notify every such vacancy to the appointing body.

It shall be the duty of every appointing body to forthwith notify every appointment of a member of the Committee to the clerk or other officer of the Committee, or in the case of the appointment of the first members to the Board of Trade.

No act or proceeding of the Committee shall be questioned on account of any vacancy or vacancies in the Committee, and no defect in the appointment of any person or persons acting as member or members of the Committee shall vitiate any proceedings of the Committee in which he or they have taken part.

Except as provided by section 6 of the Act, no Council shall make, vary, or revoke any regulations or standing orders respecting the quorum or proceedings of the Committee hereby constituted, or as to the area within which it is to exercise its authority.

Subject to any restrictions or conditions made under section 6 of the Act, the Committee shall not be required to report its proceedings to any Council, nor shall its acts or proceedings be submitted to any Council for approval.

The first meeting of the Committee shall be summoned by the Board of Trade.

The Committee shall hold four quarterly meetings in each year for the transaction of general business in addition to any special or adjourned meetings.

Five members shall be a quorum at any meeting of the Committee.

3. *Expenses.*

The expenses of the Committee, other than those which may be required to be incurred under section 8 of the Act, shall be chargeable as follows:—
One-half thereof on the administrative County of Kent as general expenses of

the Council thereof, and one-half on the administrative County of Essex as general expenses of the Council thereof.

4. *Definitions.*

In this Order the expression "Stour Fishery District" means the fishery district of the River Stour, formed and defined under the Salmon and Fresh-water Fisheries Acts, 1861 to 1886, or any of them, by a certificate of one of Her Majesty's Principal Secretaries of State, dated the 26th day of March, 1866.

Signed and sealed by order of the Board of Trade this 5th day of May, 1890.

SEA FISHERIES REGULATION ACT, 1888.

51 & 52 Vict. c. 54.

ORDER FOR THE CREATION OF THE LANCASHIRE SEA FISHERIES DISTRICT.

WHEREAS application has been made to the Board of Trade by the County Council of Lancashire to create a sea fisheries district in accordance with the above Act (herein-after referred to as "the Act"), and to exercise certain other powers conferred upon them thereby :

And whereas the County Boroughs of Barrow, Birkenhead, Blackburn, Bolton, Bootle-cum-Linacre, Burnley, Bury, Liverpool, Manchester, Oldham, Preston, Rochdale, St. Helen's, Salford, Stockport, and Wigan (herein-after referred to as "the county boroughs"), and the Borough of Southport are municipal boroughs containing, according to the census of one thousand eight hundred and eighty-one, a population of not less than twenty thousand :

And whereas the County Councils of Cumberland, Lancashire, and Cheshire, and the Councils of the county boroughs and the Borough of Southport appear to be interested in the proposed district, and such district will overlap the districts of the Boards of Conservators of the Kent, Lune, Ribble, and Dee Fishery Districts, being Boards of Salmon Conservators within the meaning of the Act, and the said Boards of Conservators have jurisdiction therein :

And whereas the Board of Trade have caused the draft of their proposed order to be locally published, and objections to certain provisions thereof have been made by the County Council of Westmoreland and by the Councils of the Boroughs of Southport, Manchester, and Bolton, and a local inquiry into such objections has been duly held :

Now therefore, the Board of Trade, by virtue of the powers conferred upon them by the Act and otherwise, do hereby make the following order :—

1. *Creation of District.*

A sea fisheries district is hereby created, comprising so much of the sea within which Her Majesty's subjects have by international law the exclusive right of fishing with the adjoining coast, as lies within the following limits, namely, on the north, a line drawn true south-west from the seaward extremity of Haverigg Point in the county of Cumberland, and on the south a line drawn straight from Helbre Point in the county of Chester to the north-western extremity of Helbre Island, and thence straight seawards in the direction of the North-West Lightship: Provided that lines shall be drawn in manner following at or near the mouths of the rivers and streams flowing into the sea or into any estuary or of the estuaries within such limits, namely :—

Lines along the seaward side of the Furness Railway (1) from Green Road Station to Kirkby Station; (2) from the junction of the Windermere branch of the said railway near Plumpton Hall to Cark Station; (3) from Grange Station to Arnside Station; such lines being at or near the mouths of the rivers Duddon, Leven, Winster, Kent, and Bela, and of other rivers or streams flowing into the estuaries above such lines respectively;

A line at or near the mouth of the river Keer, across the said river along the seaward side of the Furness Railway;

A straight line at or near the mouth of the river Lune from the seaward extremity of Sunderland Point to Crook House;

A line at or near the mouth of the river Cocker, across the said river along the road leading in a south-westerly direction from Hillam Hamlet;

A straight line at or near the mouth of the river Wyre, from the seaward extremity of the breakwater at Knot End to the low light at Fleetwood;

A straight line at or near the mouth of the river Ribble, across the said river in a true southerly direction from the Gate Inn in the township of Lee;

A line at or near the mouth of the river Douglas, across the said river along the seaward side of the bridge of the West Lancashire Railway;

A line at or near the mouth of the river Mersey, across the said river along the seaward side of the railway bridge at Runcorn ;

A line at or near the mouth of the river Weaver, across the said river along the seaward side of the railway bridge at Frodsham ;

A line at or near the mouth of the river Dee, across the said river straight from Helbre Point to the north-western extremity of Helbre Island, and thence straight to the Point of Air lighthouse in the county of Flint ;

A straight line across the mouth of every such river or stream not herein-before specified, such line being in continuation of the general line of the shore at ordinary high water :

And such lines shall be the lines above which the sea fisheries district shall not extend into any such river or stream ; the limits of the district hereby created being more particularly shown in a map marked S. 226/1890, and deposited at the Board of Trade.

In respect of such rivers, streams, and estuaries, and also in respect of any area subject to a byelaw made under section 39, subsection 8, of the Salmon Fishery Act, 1873, the Boards of Conservators of the said Kent, Lune, Ribble, and Dee fishery districts, shall within their districts respectively have the powers of a local fisheries committee under and in accordance with the Act.

The sea fisheries district hereby created shall be called the Lancashire Sea Fisheries District.

2. Constitution of Committee.

A local fisheries committee shall be constituted for the regulation of the sea fisheries carried on within the said district.

Such committee shall be a joint committee of the County Councils of Cumberland, Lancashire, and Cheshire, and of the Councils of the county boroughs, and of the Council of the Borough of Southport, and shall consist of sixty-two members, namely, one member appointed by the County Council of Cumberland, twelve members appointed by the County Council of Lancashire, one member appointed by the County Council of Cheshire, one member appointed by the Council of each of the county boroughs, and one member appointed by the Council of the Borough of Southport, with the addition of thirty-one fishery members representing the fishing interests of the district, whereof one member shall represent the Board of Conservators of the Kent Fishery District, one member shall represent the Board of Conservators of the Lune Fishery District, one member shall represent the Board of Conservators of the Ribble Fishery District, one member shall represent the Board of Conservators of the Dee Fishery District, and twenty-seven members shall be appointed by the Board of Trade.

The members to be appointed by the Councils shall be appointed in each year at the usual quarterly meeting of the said Councils respectively held in the month of November.

The members to be appointed by the Boards of Salmon Conservators and by the Board of Trade shall be appointed in each year not later than the 9th day of November.

All the members shall retire and the new members shall come into office in each year on the 9th day of November :

Provided that the first members to be appointed by the Councils and by the Boards of Salmon Conservators shall be appointed at the meeting of each body respectively held next after the coming into force of this order, and the first members to be appointed by the Board of Trade shall be appointed before the 1st day of September next, and that the first members of the committee shall come into office on the 1st day of September next, and shall retire on the 9th day of November 1891.

Retiring members shall be eligible for re-appointment.

On the occurrence of any casual vacancy in the committee by death, resignation, or otherwise, the body by whom the vacating member was appointed may fill up the vacancy by a fresh appointment.

It shall be the duty of the clerk or other officer of the committee to forthwith notify every such vacancy to the appointing body.

It shall be the duty of every appointing body to forthwith notify every appointment of a member of the committee to the clerk or other officer of

the committee, or, in the case of the appointment of the first members, to the clerk of the County Council of Lancashire.

No act or proceeding of the committee shall be questioned on account of any vacancy or vacancies in the committee, and no defect in the appointment of any person or persons acting as member or members of the committee shall vitiate any proceedings of the committee in which he or they have taken part.

Except as provided by Section 6 of the Act, no Council shall make, vary, or revoke any regulations or standing orders respecting the quorum or proceedings of the committee hereby constituted, or as to the area within which it is to exercise its authority; provided that any Council may make a regulation requiring the Committee to submit to such Council once in each year an estimate of expenses proposed to be incurred by them under the Act, and once in each year a printed abstract of their accounts for the preceding year, and to afford to any person or persons appointed for the purpose by the Council, access at all reasonable times to the books containing their minutes and accounts.

Subject to any restrictions or conditions made under Section 6 of the Act, the committee shall not be required to submit its acts or proceedings to any Council for approval.

The first meeting of the committee shall be summoned by the Chairman of the County Council of Lancashire.

The committee shall hold four quarterly meetings in each year for the transaction of general business, in addition to any special or adjourned meetings.

Five members shall be a quorum at any meeting of the committee.

3. *Expenses.*

The expenses of the committee, other than those which may be required to be incurred under Section 8 of the Act, shall be chargeable as follows:—one sixty-second part thereof on the administrative county of Cumberland as general expenses of the Council thereof; one sixty-second part on the administrative county of Chester as general expenses of the Council thereof; and sixty sixty-second parts jointly on the administrative county of Lancaster as general expenses of the Council thereof, and on the borough funds respectively of the county boroughs; the contribution of the said county and of each such county borough being apportioned in accordance with the rateable value thereof as assessed to the county or borough rate respectively.

4. *Definitions.*

In this order the expression “Kent Fishery District” means the fishery district of the rivers Kent, Bela, Winstar, Leven, and Duddon, formed and defined under the Salmon and Freshwater Fisheries Acts, 1861 to 1886, or any of them, by a certificate of one of Her Majesty’s Principal Secretaries of State, dated the 22nd day of March 1867, and as the same may be altered by any certificate of the Board of Trade granted within six months after the coming into force of this order; the expression “Lune Fishery District” means the fishery district of the rivers Lune, Wyre, Keer, and Cocker, formed and defined under the said Acts, or any of them, by a certificate of one of Her Majesty’s Principal Secretaries of State, dated the 18th day of January 1866; the expression “Ribble Fishery District” means the fishery district of the river Ribble, formed and defined under the said Acts, or any of them, by a like certificate, dated the 18th day of January 1866, and altered by a certificate of the Board of Trade, dated the 5th day of February 1890; and the expression “Dee Fishery District” means the fishery district of the river Dee, formed and defined under the said Acts, or any of them, by a certificate of one of Her Majesty’s Principal Secretaries of State, dated the 18th day of January 1866, and altered by a further like certificate, dated the 4th day of July 1866, and as the same may be altered by a certificate of the Board of Trade granted within six months after the coming into force of this order.

Signed and sealed by order of the Board of Trade this 8th day of July 1890.

Secretary to the said Board.

SEA FISHERIES REGULATION ACT, 1888.

REPORT BY AN INSPECTOR OF FISHERIES ON INQUIRIES HELD INTO CERTAIN PROPOSED ALTERATIONS OF THE DRAFT OF THE ORDER FOR THE CREATION OF THE LANCASHIRE SEA FISHERIES DISTRICT.

SIR,

Board of Trade, July 7, 1890.

I HAVE the honour to report, for the information of the Board of Trade, that, in accordance with the instructions given to me under the provisions of section 1 (6) of the Sea Fisheries Regulation Act, 1888, I held a local inquiry at Southport on the 28th instant into an objection made by the Town Council of that borough to the draft Order for the creation of the Lancashire Sea Fisheries District.

The original proposition for this Sea Fisheries District emanated from the County Council of Lancashire, and provision was made for the direct representation of each of the county boroughs, as these boroughs do not form part of the administrative counties, and would have to contribute directly to the expenses, but a separate representation was not assigned to Southport, on the grounds that it was a municipal borough forming part of an administrative county, and that it would not be fair to throw on such borough a larger share of the expenses of carrying out the Act than would be borne by the remainder of the county.

Since then the Town Council of Southport have contended that, being a municipal council within the meaning of the Act, and being interested in the sea fisheries of the proposed district, they are entitled under the Act to direct representation on the Local Fisheries Committee.

Having discussed the point, it appears that the Town Council are willing to pay, if necessary, the additional charge, provided they are assigned direct representation, and the County Council of Lancashire, on their part, are prepared to surrender to Southport one of the 12 members now allotted to the county, since by so doing they would be relieved from the liability to provide for any representation for that borough, but, at the same time, the County Council would prefer, with a view to the simplification of accounts, that the Town Council of Southport should pay their contribution to the expenses in the manner already provided for in the draft Order, namely, as part of the administrative county, rather than that the borough should be charged with a direct contribution.

The amount in question will not be large.

I do not think there can be any objection to the adoption of these proposals, and I recommend that the draft Order be altered accordingly, viz., by the reduction from 12 to 11 of the number of members to be appointed by the County Council of Lancashire, and by the addition of the words "and one member appointed by the Borough Council of Southport." The provision for the expenses as regards this alteration to remain as it stands.

II.—An objection raised by the County Council of Westmorland has also been considered.

That Council have pointed out that they have no sea fishing interest, and such being the case, I recommend that no representation be given to, and no expenses charged on, that county in the Order under consideration. At the same time, an additional member should be assigned to the County Council of Lancashire, thus again increasing the number of their members to 12, and the share of expenses chargeable jointly on the county of Lancashire and county boroughs should be increased to $\frac{6}{2}$ nd parts.

III.—In the course of the inquiry, a proposition was submitted on behalf of the County Councils of Manchester and Bolton, that the Local Fisheries Committee should annually submit to the Councils an estimate and account of their expenses. As the Local Fisheries Committee is a Committee of the County Council, and the number of Borough Councils interested in this

district is so exceptionally great, I recommend that such a provision should be inserted in the Order, but with a distinct understanding that the approval of the Councils shall not be required to any act of the Committee otherwise than as provided by section 6 of the Act.

IV.—I have further to report that I made local inquiries at Preston, Chester, Hoylake, and Parkgate, concerning a proposed alteration of the southern limit of the Lancashire Sea Fisheries District.

In the draft of the Order which has been made and advertised for the creation of this district, the southern limit is fixed as follows :—

“A line drawn straight from Helbre Point, in the county of Chester, to the north-western extremity of Helbre Island, and thence straight seawards in such manner as to pass through the Fairway Bell Beacon.”

On inquiry, I find that owing to the extensive sandbanks in Liverpool Bay, some of which are dry at low water, the proposed line would not form a satisfactory boundary, and would cut through part of the cockle and shrimp fisheries which are carried on around the East Hoyle Bank and in Helbre Swash.

I therefore recommend that the southern limit of the district be fixed at a line drawn straight from Helbre Island in the direction of the North-West Lightship, instead of through the Fairway Bell Beacon, and that the draft Order be amended accordingly.

On reference to the Admiralty Chart, it will be seen that the North-West Lightship is 11 miles beyond low-water mark, and on that account will form a more satisfactory mark than the Bell Beacon, which is only one and a half miles beyond the East Hoyle Bank.

I have, &c.

The Assistant Secretary,
Fisheries Department,
Board of Trade.

Order for the creation of the North-Eastern Sea Fisheries District.

WHEREAS application has been made to the Board of Trade by the County Councils of Durham and of the North and East Ridings of Yorkshire, and by the Borough Councils of Sunderland, Kingston-upon-Hull, and Scarborough, to create a Sea Fisheries District in accordance with the above Act (hereinafter referred to as "the Act") and to exercise certain other powers conferred upon them thereby :

And whereas the County Boroughs of South Shields, Sunderland, Middlesbrough, and Kingston-upon-Hull, and the Boroughs of Scarborough and Great Grimsby, are municipal boroughs containing, according to the census of one thousand eight hundred and eighty-one, a population of not less than twenty thousand :

And whereas the County Councils of Durham, of the North and East Ridings of Yorkshire, and of the Parts of Lindsey in Lincolnshire, and the Borough Councils of South Shields, Sunderland, Middlesbrough, Kingston-upon-Hull, Scarborough, and Great Grimsby appear to be interested in the proposed district, and such district will overlap the districts of the Boards of Conservators of the Tyne, Wear, Tees, Esk (Yorkshire), Yorkshire, and Trent Fishery Districts, being Boards of Salmon Conservators within the meaning of the Act, and the said Boards have jurisdiction therein :

And whereas the Board of Trade have caused the draft of their proposed Order to be locally published, and objections to certain provisions thereof have been made by the Grimsby Smack Owners Association, and a local inquiry into such objections has been duly held :

Now, therefore, the Board of Trade, by virtue of the powers conferred upon them by the Act, and otherwise, do hereby make the following Order :—

1. *Creation of District.*

A Sea Fisheries District is hereby created, comprising so much of the sea within which Her Majesty's subjects have by international law the exclusive right of fishing, with the adjoining coast, as lies within the following limits, namely, on the north a line drawn true east from the seaward extremity of the northern boundary of the County of Durham, being the southern boundary of the Northumberland Sea Fisheries District, and on the south a line drawn true east from Ingoldmells Point, in the Parts of Lindsey in Lincolnshire: Provided that a line shall be drawn in manner following at or near the mouth of every river or stream flowing into the sea or into any estuary within such limits :—

A line at or near the mouth of the River Tyne, straight from a post coloured red on Sharpness Point to the Trinity Buoy coloured red near the seaward extremity of the North Pier, thence straight to the Trinity Buoy coloured black near the seaward extremity of the South Pier, and thence straight to a post coloured blue on the Trow Rocks ;

A line at or near the mouth of the River Wear, from the westernmost extremity of the pier at Roker, along the northern face of such pier as authorised by the Board of Trade to be constructed under the provisions of the Wear Navigation and Sunderland Dock Act, 1877, to the authorised site of the eastern extremity thereof, thence straight to the River Wear Commissioners' south beacon off Hendon, and thence straight to the south end of the marine engine works at Hendon ;

A straight line at or near the mouth of the River Tees, from Dock Point to Ichaboe Point ;

A straight line at or near the mouth of the River Esk, from the seaward extremity of the west pier at Whitby to the seaward extremity of the east pier ;

A straight line at or near the mouths of the Rivers Ouse and Trent, from the Wesleyan Methodist Chapel at Faxfleet to Alkborough Flats Farm-House ;

A straight line across every such river or stream not hereinbefore specified, such line being in continuation of the general line of the shore at ordinary low water ; and such lines shall be the lines above which the Sea Fisheries District shall not extend into any such river or stream—the limits of the district hereby created being more particularly shown in a map marked S 573/1890, and deposited at the Board of Trade.

In respect of such rivers and streams, and also in respect of any area subject to a byelaw made under section thirty-nine, sub-section eight, of the Salmon Fishery Act, 1873, the Boards of Conservators of the Tyne, Wear, Tees, Esk (Yorkshire), Yorkshire, and Trent Fishery Districts shall within their districts respectively have the powers of a Local Fisheries Committee under and in accordance with the Act.

The Sea Fisheries District hereby created shall be called the North-Eastern Sea Fisheries District.

2. Constitution of Committee.

A Local fisheries Committee shall be constituted for the regulation of the sea fisheries carried on within the said district.

Such Committee shall be a Joint Committee of the County Councils of Durham, of the North Riding of Yorkshire, of the East Riding of Yorkshire, and of the Parts of Lindsey in Lincolnshire, and of the Borough Councils of South Shields, Sunderland, Middlesbrough, Kingston-upon-Hull, Scarborough, and Great Grimsby, and shall consist of forty members, namely, two members appointed by the County Council of Durham, four members appointed by the County Council of the North Riding of Yorkshire, four members appointed by the County Council of the East Riding of Yorkshire, two members appointed by the County Council of the Parts of Lindsey in Lincolnshire, one member appointed by the Borough Council of South Shields, one member appointed by the Borough Council of Sunderland, one member appointed by the Borough Council of Middlesbrough, two members appointed by the Borough Council of Kingston-upon-Hull, one member appointed by the Borough Council of Scarborough, and two members appointed by the Borough Council of Great Grimsby, with the addition of twenty members representing the fishing interests of the district, whereof one member shall represent the Board of Conservators of the Tyne Fishery District, one member shall represent the Board of Conservators of the Wear Fishery District, one member shall represent the Board of Conservators of the Tees Fishery District, one member shall represent the Board of Conservators of the Esk (Yorkshire) Fishery District, one member shall represent the Board of Conservators of the Yorkshire Fishery District, one member shall represent the Board of Conservators of the Trent Fishery District, and fourteen members shall be appointed by the Board of Trade.

The members to be appointed by the Councils shall be appointed in each year at the usual quarterly meeting of the said Councils respectively held in the month of November.

The members to be appointed by the Boards of Salmon Conservators and by the Board of Trade shall be appointed in each year before the ninth day of November.

All the members shall retire, and the new members shall come into office in each year on the ninth day of November :

Provided that the first members to be appointed by the Councils and by the Boards of Salmon Conservators shall be appointed at the meeting of each body respectively held next after the coming into force of this Order, and the first members to be appointed by the Board of Trade shall be appointed before the first day of September next, and that the first members of the

Committee shall come into office on the first day of September next, and shall retire on the ninth day of November 1891.

Retiring members shall be eligible for re-appointment.

On the occurrence of any casual vacancy in the Committee by death, resignation, or otherwise, the body by whom the vacating member was appointed may fill up the vacancy by a fresh appointment.

It shall be the duty of the Clerk or other Officer of the Committee to forthwith notify every such vacancy to the appointing body.

It shall be the duty of every appointing body to forthwith notify every appointment of a member of the Committee to the Clerk or other Officer of the Committee or, in the case of the appointment of the first members, to the Board of Trade.

No act or proceeding of the Committee shall be questioned on account of any vacancy or vacancies in the Committee, and no defect in the appointment of any person or persons acting as member or members of the Committee shall vitiate any proceedings of the Committee in which he or they have taken part.

Except as provided by section six of the Act, no Council shall make, vary, or revoke any regulations or standing orders respecting the quorum or proceedings of the Committee hereby constituted, or as to the area within which it is to exercise its authority; Provided that any Council may make a regulation requiring the Committee to submit to such Council once in each year an estimate of expenses proposed to be incurred by them under the Act, and once in each year a printed abstract of their accounts for the preceding year, and to afford to any person or persons appointed for the purpose by the Council access at all reasonable times to the books containing their accounts.

Subject to any restrictions or conditions made under section six of the Act, the Committee shall not be required to report its proceedings to any Council, nor shall its acts or proceedings be submitted to any Council for approval.

The first meeting of the Committee shall be summoned by the Board of Trade.

The Committee shall hold four quarterly meetings in each year for the transaction of general business in addition to any special or adjourned meetings.

Five members shall be a quorum at any meeting of the Committee.

3. *Expenses.*

The expenses of the Committee, other than those which may be required to be incurred under section eight of the Act, shall be chargeable as follows:—namely, two-twentieth parts thereof on the Administrative County of Durham as general expenses of the Council thereof, four-twentieth parts on the Administrative County of the North Riding of Yorkshire exclusive of the Borough of Scarborough as special expenses of the Council thereof, four-twentieth parts on the Administrative County of the East Riding of Yorkshire as general expenses of the Council thereof, two-twentieth parts on the Administrative County of the Parts of Lindsey in Lincolnshire exclusive of the Borough of Great Grimsby as special expenses of the Council thereof, one-twentieth part on the Borough Fund of the Borough of South Shields, one-twentieth part on the Borough Fund of the Borough of Sunderland, one-twentieth part on the Borough Fund of the Borough of Middlesbrough, two-twentieth parts on the Borough Fund of the Borough of Kingston-upon-Hull, one-twentieth part on the Borough Fund of the Borough of Scarborough, and two-twentieth parts on the Borough Fund of the Borough of Great Grimsby.

4. *Definitions.*

In this Order the expression "Tyne Fishery District" means the Fishery District of the river Tyne formed and defined under the Salmon and Freshwater Fisheries Acts, 1861 to 1886, or any of them, by a certificate of one of Her Majesty's Principal Secretaries of State, dated the 1st day of May 1866, and altered by a further like certificate, dated the 22nd day of December 1869; the expression "Wear Fishery District" means the Fishery District of

the river Wear formed and defined under the said Acts, or any of them, by a like certificate dated the 28th day of February 1879; the expression "Tees Fishery District" means the Fishery District of the river Tees formed and defined under the said Acts, or any of them, by a like certificate dated the 18th day of January 1866, and altered by a certificate of the Board of Trade dated the 29th day of June 1889; the expression "Esk (Yorkshire) Fishery District" means the Fishery District of the river Esk in the County of York formed and defined under the said Acts, or any of them, by a certificate of one of Her Majesty's Principal Secretaries of State, dated the 8th day of June 1875; the expression "Yorkshire Fishery District" means the Yorkshire Fishery District formed and defined under the said Acts, or any of them, by a like certificate dated the 23rd day of April 1874; and the expression "Trent Fishery District" means the Fishery District of the river Trent formed and defined under the said Acts, or any of them, by a like certificate dated the 18th day of January 1866, and altered by further like certificates dated respectively the 16th day of July 1868, and the 23rd day of April 1874.

Signed and sealed by order of the Board of Trade this 9th day of July, 1890.

(Signed) HENRY G. CALCRAFT,
(L.S.) Secretary to the said Board.

Report by an Inspector of Fisheries on an Inquiry held at Grimsby into an objection to the Draft Order for the creation of the North-Eastern Sea Fisheries District.

SIR, Board of Trade, July 7, 1890.

I HAVE the honour to report, for the information of the Board of Trade, that in accordance with the instructions I received under the provisions of section 1 (6) of the Sea Fisheries Regulation Act, 1888, I held a public inquiry at Grimsby on the 4th instant into an objection made by the Grimsby Smackowners' Association to the draft Order for the creation of the North-Eastern Sea Fisheries District.

The objection was confined to one point, namely, the position of the southern boundary of the proposed district. In the draft Order, this boundary has been drawn at Donna Nook, and the Grimsby Smackowners' Association urged that it should be fixed at Ingoldmells Point.

When representatives from the various Councils interested in a district for the Yorkshire and Lincolnshire coasts met at Beverley last January, nearly all of them were in favour of a district extending from near the Tees to a point south of the Humber, and Ingoldmells Point, in Lincolnshire, was generally suggested for the limit. Subsequently, when the draft Order was drawn up by the Board of Trade, Donna Nook was adopted as the boundary, in deference to the opinion of the County Council for the Parts of Lindsey, who, however, had only approved of the resolution of their Fisheries Committee by the casting vote of the chairman, and the resolution itself had only been passed by a majority of one.

At the present inquiry, the Rev. F. Freshney, Chairman, Mr. Ingoldby and Mr. Haxby, members of the Sea Fishery Committee of the County Council, spoke in favour of maintaining Donna Nook as the boundary, but before so doing they handed in a copy of a resolution of their Committee to the effect that, owing to the short notice received, the County Council were unable to be officially represented. In receiving this protest, I pointed out that as far back as the 6th June last the Board of Trade had written to the County Council mentioning the objection which had been received from the fishing interests of Grimsby, and pointing out that this objection might probably render it

necessary for the Board of Trade to direct a local inquiry to be held, and that on 20th June formal notice of such inquiry was sent to the County Council.

The Grimsby Smackowners' Association was represented by Messrs. Barrett, Mudd, and G. Alward. Mr. Veal, ex-Mayor, and Mr. Grange, Town Clerk, were present on behalf of the Town Council of Grimsby.

The distance from Donna Nook to Ingoldmells is about 18 miles; it is a flat sandy coast, and the fishermen are not numerous. Shrimping is the chief fishing industry, it takes place from April to September. For about a couple of months in the summer trawling is also carried on, but the soles that are taken are never of any great size; they do not weigh much over $\frac{1}{2}$ lb. each, and seldom measure more than nine inches in length. It is said that small undersized fish are always thrown back into the water alive, but this was shown not to be the invariable practice, and I am inclined to think that when a man has had a bad haul he is glad enough to bring to market anything for which he can get a price. It also appears that owing to the general scarcity of fish, trawlers from outside are attracted to these inshore grounds, where they catch many undersized fish.

There can be no doubt that there is some destruction of small fish along this coast, and it was not disputed that it would be desirable to include it in a sea fisheries district, but those who spoke on behalf of the proposals of the County Council were in favour of forming a district beginning at Donna Nook, or even at Grimsby, and extending southwards so as to embrace in one district the coasts of Lincolnshire and Norfolk, urging that the fisheries off the Lincolnshire coast were far more similar in character to the fisheries to the southwards than to those of Yorkshire and Durham. It is, however, by no means certain that it would be altogether desirable for a district to contain only one class of fisheries and one set of interests.

It was further pointed out that Ingoldmells does not form a satisfactory boundary, as similar fisheries exist on both sides of the Point, but no better one is to be found in that neighbourhood, and the same objection would hold good against Donna Nook, whilst Ingoldmells has the advantage of at once including in a sea fisheries district an area which it is admitted needs protection. If later a district is created extending southwards, it may prove desirable for the Board of Trade to exercise their powers under the Sea Fisheries Regulation Act, 1888, and to unite this part of the North-Eastern District with such southern district. In the meanwhile no application for such a district has yet been made, and after carefully considering all the facts of the case, I recommend that the southern limit of the North-Eastern Sea Fisheries District be fixed at a line drawn true east from Ingoldmells Point, and that the draft Order be amended accordingly.

I should add that Mr. Grange read a resolution of the Grimsby Town Council, desiring that the southern boundary of this district be Ingoldmells Point, instead of Donna Nook, and a similar communication has been received from the Town Council of Scarborough.

I have, &c.

The Assistant Secretary,
Fisheries Department,
Board of Trade.

SEA FISHERIES REGULATION ACT, 1886.

51 & 52 Vict. c. 54.

ORDER FOR THE CREATION OF THE NORTHUMBERLAND SEA FISHERIES DISTRICT.

WHEREAS application has been made to the Board of Trade by the County Council of Northumberland to create a Sea Fisheries District in accordance with the above Act (herein-after referred to as "the Act"), and to exercise certain other powers conferred upon them thereby :

And whereas the Borough of Tynemouth is a municipal borough containing according to the Census of one thousand eight hundred and eighty-one a population of not less than twenty thousand :

And whereas the County Council of Northumberland and the Borough Council of Tynemouth appear to be interested in the proposed district, and such district will overlap the districts of the Boards of Conservators of the Coquet and Tyne Fishery Districts, being Boards of Salmon Conservators within the meaning of the Act, and the said Boards of Conservators have jurisdiction therein :

And whereas the Board of Trade have caused the draft of their proposed Order to be locally published, and no objection has been made thereto or to any of the provisions thereof :

Now, therefore, the Board of Trade, by virtue of the powers conferred upon them by the Act and otherwise, do hereby make the following Order :—

1. CREATION OF DISTRICT.

A Sea Fisheries District is hereby created, comprising so much of the sea within which Her Majesty's subjects have by international law the exclusive right of fishing, with the adjoining coast, as lies within the following limits, namely, on the north a line drawn true east from the seaward extremity of the northern boundary of the Administrative County of Northumberland, and on the south a line drawn true east from the seaward extremity of the southern boundary of the County of Northumberland: Provided that a line shall be drawn in manner following at or near the mouth of every river or stream flowing into the sea or of any estuary within such limits :—

A straight line at or near the mouth of the River Tweed from the seaward extremity of Berwick Pier to the highest chimney of the Seaview Works, commonly known as Black's Spade Manufactory, at Spittal ;

A straight line at or near the mouth of the River Coquet from the seaward extremity of the north breakwater to the seaward extremity of the south breakwater ;

A line at or near the mouth of the River Tyne straight from a post coloured red on Sharpness Point to the Trinity Buoy coloured red near the seaward extremity of the North Pier, thence straight to the Trinity Buoy coloured black near the seaward extremity of the South Pier, and thence straight to a post coloured blue on the Trow Rocks ;

A straight line across the mouth of every such river, stream, or estuary not herein-before specified, such line being in continuation of the general line of low water mark :

and such lines shall be the lines above which the Sea Fisheries District shall not extend into any such river, stream, or estuary ;—the limits of the district

hereby created being more particularly shown in a map marked S. 1589/1889, and deposited at the Board of Trade.

In respect of such of the rivers, streams, and estuaries herein-before referred to as flow into or join the sea within that part of the Sea Fisheries District hereby created which lies between Howick Burn Mouth and the southern limit of the said district, and also in respect of any area subject to a byelaw made under section 39, sub-section 8, of the Salmon Fishery Act, 1873, the Boards of Conservators of the said Coquet and Tyne Fishery Districts shall within their districts respectively have the powers of a Local Fisheries Committee under and in accordance with the Act.

The Sea Fisheries District hereby created shall be called the Northumberland Sea Fisheries District.

2. CONSTITUTION OF COMMITTEE.

A Local Fisheries Committee shall be constituted for the regulation of the sea fisheries carried on within the said district.

Such Committee shall be a joint committee of the County Council of Northumberland and the Borough Council of Tynemouth, and shall consist of thirty members, namely, fourteen members appointed by the County Council of Northumberland, and one member appointed by the Borough Council of Tynemouth, with the addition of fifteen fishery members representing the fishing interests of the district, whereof one member shall represent the Board of Conservators of the Coquet Fishery District, two members shall represent the Board of Conservators of the Tyne Fishery District, and twelve members shall be appointed by the Board of Trade.

The members to be appointed by the County Council of Northumberland and the Borough Council of Tynemouth shall be appointed in each year at the usual quarterly meeting of the said County Council and Borough Council, respectively, held in the month of November.

The members to be appointed by the Boards of Salmon Conservators or by the Board of Trade shall be appointed in each year previous to the seventh day of November.

All the members shall retire and the new members shall come into office in each year on the ninth day of November.

Provided that the first members to be appointed by the County and Borough Councils and by the Boards of Salmon Conservators shall be appointed at the meeting of each body respectively held next after the coming into force of this Order; and the first members to be appointed by the Board of Trade shall be appointed before the tenth day of May next.

The first members of the Committee shall come into office on the tenth day of May next, and shall retire on the ninth day of November next.

Retiring members shall be eligible for re-appointment.

On the occurrence of any casual vacancy in the Committee by death, resignation, or otherwise, the body by whom the vacating member was appointed may fill up the vacancy by a fresh appointment.

It shall be the duty of the clerk or other officer of the Committee to forthwith notify every such vacancy to the appointing body.

It shall be the duty of every appointing body to forthwith notify every appointment of a member of the Committee to the clerk or other officer of the Committee, or, in the case of the appointment of the first members, to the clerk of the County Council of Northumberland.

No act or proceeding of the Committee shall be questioned on account of any vacancy or vacancies in the Committee, and no defect in the appointment of any person or persons acting as member or members of the Committee shall vitiate any proceedings of the Committee in which he or they have taken part.

Except as provided by section 6 of the Act, the County Council and Borough Council shall not make, vary, or revoke any regulations or standing orders respecting the quorum or proceedings of the Committee hereby constituted, nor as to the area within which it is to exercise its authority.

Subject to any restrictions or conditions made under section 6 of the Act, the Committee shall not be required to report its proceedings to the County Council or Borough Council, nor shall its acts or proceedings be submitted to such Councils for approval.

The first meeting of the Committee shall be summoned by the Chairman of the County Council of Northumberland.

The Committee shall hold four quarterly meetings in each year for the transaction of general business in addition to any special or adjourned meetings.

Five members shall be a quorum at any meeting of the Committee.

3. EXPENSES.

The expenses of the Committee, other than those which may be required to be incurred under section 8 of the Act, shall be chargeable on the Administrative County of Northumberland as general expenses of the council thereof.

4. DEFINITIONS.

In this Order, the expression "Coquet Fishery District" means the Fishery District of the River Coquet, formed and defined under the Salmon and Freshwater Fisheries Acts, 1861 to 1886, or any of them, by a certificate of one of Her Majesty's Principal Secretaries of State, dated the 18th day of January 1866, and altered by a further certificate of one of Her Majesty's Principal Secretaries of State, dated the 22nd day of December 1869; and the expression "Tyne Fishery District" means the Fishery District of the River Tyne, formed and defined under the Salmon and Freshwater Fisheries Acts, 1861 to 1886, or any of them, by a certificate of one of Her Majesty's Principal Secretaries of State, dated the 1st day of May 1866, and altered by a further certificate of one of Her Majesty's Principal Secretaries of State, dated the 22nd day of December 1869.

Signed and sealed by order of the Board of Trade this 20th day of March 1890.

(Signed) HENRY G. CALCRAFT,
Secretary to the said Board.

BOARD OF PUBLIC WORKS (IRELAND).

FISHERY PIERS AND HARBOURS.

SEA FISHERIES (IRELAND) ACT, 1883, 46 & 47 Vict. c. 26.

Office of Public Works, Dublin,
17 May 1890.

1. THE Act above quoted received the Royal Assent on the 2nd August 1883, and came into operation on the 1st October following. It created a sea fishery fund amounting to 250,000 £., to be applied by the Commissioners of Public Works for the purposes of the Fishery Piers and Harbours Acts, but it enacted that the provision of the Act of 1846, 9 Vict. c. 3, which limits the amount of any grant to three-fourths of the cost of the work, and that the Act of 1866, 29 & 30 Vict. c. 45, which limits the grant for any one work to 7,500 £., shall not apply to this Act, but that the Board (with the approval of the Treasury) may make a free grant for the whole or any part of the cost of a work, or may advance the same by way of loan at a rate of interest not exceeding 3½ per cent., and that repayments of such loans shall form part of the Sea Fisheries Fund, and shall be applied by this Board for the purposes of the Act.

2. Under the 8th section there was constituted a Fishery Piers and Harbours Commission for the purpose of aiding this Board in carrying the Act into effect, and giving such assistance as had been previously given by the Inspectors of Fisheries, to confer with the Board relative to works proposed from time to time to be executed, and generally to aid in carrying the Act into execution in such manner as the Lord Lieutenant should direct.

3. The Fishery Piers and Harbours Commissioners were to be furnished with copies of the plans and specifications relating to each proposed work, and to make such observations thereon to the Treasury as they thought fit.

4. The arrangement made under the above provisions was that the Fishery Commission should recommend the several sites at which works were to be constructed, and should state the amount of accommodation to be supplied thereat, or in the alternative the maximum sum which they would recommend to be expended in the interests of the fisheries, and that the Board of Public Works was to have plans, specifications, and estimates prepared for the works, which on being sanctioned by the Treasury were to be executed under their direction.

5. The total amount expended for all purposes under the Act, to the 31st March 1890, was as follows:—

	£.	£.
Expenses of the Fishery Commission - - - - -	1,845	
Pay and travelling expenses of engineering staff, and incidental expenses - - - - -	14,319	
Piers and harbour works, and law expenses - - -	236,883	
	£. 253,047	
The funds available were:—		
Grants - - - - -	250,000	
Contributions - - - - -	9,864	
	£. 259,864	
Surplus - - - - -	- - -	6,817
Required for completion of works in progress - - -	- - -	3,594
Net Balance - - -	£.	3,223

6. It should be stated that the Treasury authorised an excess of 10 per cent. on the estimate for any work, provided the gross estimate for all the works was not exceeded; and a further sum of 20,000 *l.* for travelling, advertising, and other charges, &c., of the Fishery Piers and Harbours Commission: for engineering expenses in designing and executing the works, "and for unforeseen contingencies," was also sanctioned.

7. The above expenditure may now be compared with the estimated cost:—

	£.
Estimate of expenditure on works - - - - -	239,258
Contingencies - - - - -	20,000
	£..259,258

8. However satisfactory such results may be, there are some facts, still more so, proving as they do the substantial manner in which the works have been executed.

9. At the close of the two winters of 1888 and 1889 the Board had all the works executed under the two above-mentioned Acts examined by the district engineers under whose superintendence they were constructed, and the works were reported in good order, with one exception, in the County of Galway, the repairs of which will probably cost 100 *l.*

10. The Board attribute this successful result in a great measure to the constant care and attention given to the execution of the works by the district engineers and other officers under the direction of the chief engineer.

11. The works under the Sea Fisheries Act, consisted in the construction of—

- A. 39 Harbours, piers, or quays, with the necessary approaches, excavations, &c., &c.
- B. 9 Boatslips (with breakwaters where necessary).
- C. 2 Harbour lighthouses.
- D. 3 Deepening channels in the sea, beds of harbours, erecting beacons, &c., &c.
- E. 6 Improvement of existing works in raising parapets, quays, &c., &c.
- F. 2 Road approaches or landing places.

61

12. The materials used in the construction of the piers, slips, &c., consisted of concrete walls built up of blocks or *in situ*, with cut stone for coping, bollards, steps, and landings, and rubble for the "hearting" of the pier. The lighthouses are cast iron with catadioptric apparatus.

13. The following are the depths at the heads of the Piers at low water of spring tides:—

Dry - - - - -	33	8 feet to 10 feet - - -	1
2 feet to 4 feet - - -	8	10 " 12 " - - -	4
4 " 6 " - - -	8	12 " 14 " - - -	1
6 " 8 " - - -	4		

14. The details of the expenditure under the Act of 1883 are given in the annexed return.

15. The amount of loans sanctioned under the Act was 27,584 *l.*, repayable in 12 years. The sum of 2,715 *l.* had been received on account of principal repayments up to November 1889; a further sum of 1,802 *l.* is due in November 1890, and the balance by annual instalments, terminating in 1902.

16. There is, therefore, immediately available for additional works the sum of 5,338 *l.*, made up of 3,223 *l.*, the net saving on the grant of 250,000 *l.*, plus the sum of 2,715 *l.*, already received in repayment of the principal of loans, which, with a further sum of 32,285 *l.*, the amount of principal and interest repayable between the present time and 1902, will make a total of 38,223 *l.* available between those dates.

W. B. Soady, Secretary.

Report by Labour Correspondent to the Board of Trade	3
Appendix I. Strikes and Lock-outs :—	
Strikes :	
I. General list of strikes, showing cause, date, result, and mode of settlement so far as ascertained	36
II. Showing number of persons affected by strikes	77
III. Showing success or otherwise of strikes in trades, with causes or objects	92
IV. Showing numbers of persons engaged in successful and unsuccessful strikes, as per preceding table	95
V. Showing amount of weekly wages earned by those going on strike, value of fixed capital laid idle, other elements of loss to capital, and suggestions as to the prevention of strikes, the particulars being extracted from the Strike Returns received from employers	99
VI. Showing particulars extracted from Trade Union Returns as to attitude of union, estimated loss in wages, number of members and non-members involved, cost to union, persons going in to work during the strike, and suggestions as to prevention of strikes	107
Lock-outs :	
VII. Showing trades, localities, causes, duration, result, and mode of settlement	113
VIII. Showing numbers of persons affected by lock-outs	116
IX. Showing direct and indirect losses caused by lock-outs as stated in returns of employers	117
X. Showing estimated wage losses and cost of lock-outs to trade unions as shown by such bodies	117
Appendix II. :—	
General observations upon the strikes and lock-outs in the preceding tables, based upon or quoted from the statements of employers and employed	118
Appendix III. :—	
Foreign and Colonial strikes. Table showing the principal Foreign and Colonial strikes noted, with particulars of the cause, duration, result, and numbers affected where obtainable	141
Appendix IV. :—	
Notes and observations from various sources upon the Foreign and Colonial strikes detailed in the preceding table	144

STRIKES AND LOCK-OUTS.

REPORT BY THE LABOUR CORRESPONDENT TO THE BOARD OF TRADE.

The Assistant Secretary, Commercial Department of the Board of Trade,

SIR,

I HAVE now to report to you generally on the chief facts in connexion with the labour movement during 1889, and, specially, on the strikes and lock-outs resulting from industrial disputes during that year, so far as particulars thereof have been obtained. The accompanying statistical tables which present certain main facts in a compendious form are on the same plan as those contained in the Report for the previous year, but before explaining them in detail I desire to give a general account of the leading events of the year, bringing out many facts which cannot conveniently be put in a statistical form.

The revival of Trade.

The revival of trade which commenced in 1887 continued to develop through the whole of the two following years 1888 and 1889, and, indeed up to the end of the first quarter of the present year, when it would appear to have reached its highest point. During the intense depression of the three preceding years large numbers of workers in every branch of industry had been thrown out of employment, and the distress resulting was intense. Naturally, at such a time, wages were generally reduced. After it became clearly apparent, however, that trade had turned and that the demand for labour was beginning to increase, applications for advanced wages were made on all sides. Many disputes resulted and, though the strikes of 1888 were numerous, as shown by the report for that year, the labour market in 1889 was still more disturbed, and the number of strikes noted reached for the year a very high figure indeed. This progress of trade revival as affecting the demand for labour can, perhaps, be best illustrated by quoting the proportions per cent. of unemployed workmen at different times during the period under notice as shown by the monthly reports of some of the chief trade unions. These, it is true, represent but a small section of the workers of the kingdom, but they are yet sufficiently numerous and representative to show fairly the general condition of the whole industry of the nation. Thus in January 1886, when trade was at its lowest ebb, the percentage of skilled workmen unemployed was shown as 13·3, but in the January of 1887 it had fallen to 9·9. From this point it may be as well to give the figures as they appeared month by month in tabular form thus :—

Month.	Year 1887.	Year 1888.	Year 1889.	Year 1890.
January	9·9	6·8	3·3	1·75
February	10·3	7·8	3·1	1·44
March	8·5	7·0	2·8	1·40
April	7·7	5·7	2·2	1·70
May	6·8	5·2	2·0	1·96
June	8·5	4·8	2·0	1·96
July	8·0	4·6	1·8	1·88
August	8·5	3·9	1·7	2·28
September	8·3	4·8	2·5	—
October	7·5	4·4	2·1	—
November	8·6	4·4	1·8	—
December	8·5	3·1	1·5	—

From the closing month of 1888 right up to the date of this report the figures show a remarkably prosperous state of trade, and the demand for labour of all kinds was very strong. Indeed, in some cases the demand much exceeded the supply. In the manufactured iron trades especially it was found that during the period of depression so many of the iron workers had emigrated or gone into other branches of labour that during 1889 a sufficient number of men could not be obtained for some of the processes, puddlers in particular being much in request. The transition from the manufacture of iron to that of steel had also been going on, and for that reason also men had been leaving the trade, so that from various causes an astonishing transference had taken place from one branch of industry to others.

In the coal and coke trades also a scarcity of labour was experienced in some localities, and the work of production could scarcely be carried on fast enough to meet the requirements of those industries depending upon a plentiful supply of fuel to sustain their activity. The effect of this unsatisfied demand for labour is clearly shown in the case of the shipbuilding trade, which had, with amazing suddenness, passed from a state of serious depression into a condition of unexampled prosperity. Indeed, in this industry so great was the demand for labour that many firms were unable to obtain the numbers of men they required, and were therefore unable to execute with the necessary promptitude and despatch the contracts they had undertaken. At the same time the manufacturers of iron and steel plates, upon whom the shipbuilders depended for their supplies of material, were suffering from the same cause and were unable to supply the ship-yards so fully and quickly as they required.

How great had been the change in the condition of the shipbuilding and boiler-making trade during a comparatively short period may be gathered from the unemployed statistics of the society representing the trade. In 1884 the monthly average of members out of work was $23\frac{3}{4}$ per cent.; in 1885, $26\frac{3}{4}$; in 1886, 28; in 1887, $21\frac{1}{2}$; in 1888, $7\frac{3}{4}$; and in 1889 only $2\frac{1}{3}$ per cent., falling in March of the present year to the minimum of .85 per cent., a figure so low for a membership of 32,000 that it cannot be improved upon. So with all the trades in any way allied or connected with shipbuilding. The change was almost marvellous in its suddenness, and under existing conditions it was impossible that the transition could take place without a great deal of friction and many disputes. The trades which passed most peacefully through the change were those in which boards of conciliation and arbitration or sliding scales existed, and, in which, by those methods the workers obtained, all things considered, as large a share of the general prosperity as those who depended upon other methods for obtaining the advantage of an active labour market. With these exceptions most trades were more or less subject to disputes, and, as will be seen later on, the well organised trades were very successful in enforcing their demands. In all this there was nothing new, it was but a repetition of what has invariably taken place at similar periods of industrial prosperity.

The organising of unskilled Labour.

During the latter part of 1888, however, a movement commenced, which, if not absolutely new in our experience, developed and spread with a force and quickness never previously equalled. This was the rising and organisation for labour purposes of classes of the working population not previously organised. This movement, which has been called by some the "new trade unionism," if it did not actually originate among the sailors and firemen who man our mercantile marine, had its first really important manifestation among that body of men. From the nature of their occupation seafaring men have always been difficult to organise. Working together always in comparatively small bodies, continually changing from ship to ship, and ever varying their ports of arrival or departure; staying only a few days in port at one time, and thus unable to assemble in meetings like the workers of other trades, most of their attempts to form unions if not absolutely failures had met with but a slight degree of success. The growth of the new union, however, whatever its future may be, was of a startlingly rapid character. At the Trades Union Congress of 1888 it figured on the list of societies represented as having but 500 members, a few months later its membership was stated at 40,000, and at the Trade Union Congress of 1889 it was shown as having enrolled not less than 65,000 members. But so strong had the new union become at the beginning of 1889 that in January and February extensive strikes for an advance of wages were entered upon in most of the chief ports of the kingdom. In June and July strikes again broke out, and the conflict then waged was of a bitter

character. The union had 35,000 members engaged, the amount expended in support of the strikes is stated as having been only but 3,500/. The January and June strikes are said to have been victories for the union, and those of February and July are said to have resulted in mutual concessions. It is also claimed by the union that their strikes lasted but a short time, and have been very successful in all ports except Liverpool, but even there wages in cargo boats have been raised 30 per cent., although in the case of the Atlantic liners the union was defeated by a combination of 16 of the largest companies. It is now common to speak and write about the "old" and the "new trade unionism" as something separate and distinct from each other. The distinction is never very clearly drawn, but, broadly stated, it seems to be that the "old trade unionism" undertakes to provide for its members friendly as well as trade benefits, whereas the "new trade unionism" is designed to deal with trade matters only. Judged from this point of view, the new sailors' union is based on the lines of the "old trade unionism," and undertakes to provide both friendly and trade benefits for its members. Its objects are very fully stated in its rules, and are very comprehensive indeed, covering more ground than the purposes of most of the existing unions owing to the greater special requirements of seafaring men. This declaration of objects is so important as to deserve quotation in full:—

"The objects and benefits of this union are intended, subject to the conditions of membership herein-after appearing, to include foreign as well as British seamen; they are as follows:—

- "(1.) To improve the condition and protect the interests of all classes of seafaring men.
- "(2.) To establish homes for seamen in all places where the executive council may deem it expedient.
- "(3.) To make advances of money to seafaring men on security of their wages and allotment notes, provided they have been 12 months financial members.
- "(4.) To endeavour to obtain reasonable hours of duty, to maintain fair rates of wages, and to promote the parliamentary representation of the seafaring classes.
- "(5.) To assist members whose interests have been damaged by reason of prominent services rendered to the union.
- "(6.) To afford legal assistance, either as plaintiff or defendant, to any member of the union, in respect of matters arising out of or incidental to his employment as a sailor or sea-going fireman, cook, steward, carpenter, or sailmaker, including claims for wages, damages for breach of contract for wages, compensation for injuries, claims for salvage, alleged liability for negligence or misconduct involving loss or forfeiture of wages or involving penalties, and all claims and liabilities, whether under the Merchant Shipping or any other Act or Acts of Parliament, or otherwise, of what nature soever, so arising or incidental as aforesaid, subject, nevertheless, to the rules of the union; and to provide for the maintenance of members detained on shore till their cases are tried.
- "(7.) To use every effort to provide for the safety of ships' work in order to prevent loss of life at sea.
- "(8.) To provide a better class of men for the merchant service, and to see that all members that are engaged through the union be on board at the appointed time, and in a sober condition ready for work.
- "(9.) To provide assistance to shipwrecked mariners.
- "(10.) To provide assistance to members who are travelling in search of work.
- "(11.) To put seafaring men, intending to become members but for the time being unable to pay, on the same footing as paying members, except with regard to financial benefits, by granting them privilege cards.
- "(12.) To provide funds for the relief of members in sickness or temporary disablement, and for their respectable interment.
- "(13.) To provide a fund for parliamentary representation.
- "(14.) To provide a fund for the relief of men on strike."

The entrance fee is fixed from time to time by the executive. At present it is 20s., but increases at the rate of 2s. 6d. per month. For foreign seamen the entrance fee varies from 5l. after three years and a half service in English ships to 20l. for a two years' service. After a four years' service the current entrance fee only is charged. The contribution is 5d. per week for all benefits except sickness. The balance sheet for 1889 shows the income to have been 26,600l., and the expenditure 18,915l., leaving a balance of 7,685l. It is stated that members are still being enrolled at the rate

of 400 per week. This is, undoubtedly, a striking example of rapid organisation, especially when the character of the material to be organised is considered, and it will be interesting to observe how the new society will pass through a period of bad trade.

During the same time great efforts were being made to bring about the organisation of other branches of unskilled labour, not only in London, but in many of the large provincial towns. This movement was developed most strongly among the general labourers of the north of England, among the gas workers of London and other large centres, among the lower branches of railway service and transport, and specially among the vast masses of labourers engaged upon the more or less casual labour of the docks and wharves of London, and, to a lesser but yet striking extent, in the other ports of the kingdom.

There was, in fact, taking place a general uprising of the lower strata of the labouring population, anxious to take advantage of a time of great commercial prosperity to improve the standing of the labourer.

The Dock Labourers.

It was in connexion with the labour employed about and in relation with the docks and wharves and lading of shipping, however, that the greatest interest and excitement prevailed. The dock labour of London had been altogether of a peculiar kind, and the men engaged in it were not only almost destitute of organisation, but seemed even to lack the very elements of cohesion. To this the stevedores or men who pack the cargoes into the holds of vessels, and the lightermen who bring by river to vessels in dock or at the wharf, goods for lading, were the only exceptions. Stevedores, from the nature of their work, have necessarily to possess a fair amount of skill and judgment, and for some years have had a trade union. The lightermen also had to be thoroughly trained in their work; they were a privileged class, and no man could be employed as such without a license, and they had their trade union in addition. The corn and deal porters were also a special class of men.

The great mass of dock labourers, however, were in an entirely different position. For ordinary work about the docks no skill was required. The stronger a man was the better, perhaps, his chance of employment. The dock gates of the East End might almost be described as the very cesspool of the London, if not, indeed, the national labour market. The men to whom, from whatever cause, all other avenues to employment seemed closed, turned almost as a last resort to the docks. The bulk of dock work was of a most casual character. There were about the docks a number of permanent hands, but this number was small relatively to the total number at some times engaged. Roughly there was two-thirds of casual or irregular and intermittent labour to one-third of permanent or regular labour. Of men anxious to find work of the irregular kind, so far as the needs of the docks were concerned, the supply was practically unlimited. Men were engaged at the dock gates just as they were required, it might be for a day, or but for an hour. In this way the competition for employment among the workers was of the fiercest kind, men struggling with each other for preference at the dock gates. The recognised rate of pay for this class of labour was from 4d. to 5d. per hour, while for the regular hands the pay was from 3s. 8d. to 5s. a day. Mr. Tillett, when giving evidence before the House of Lords Committee on the Sweating System, estimated that there were at least 100,000 men engaged in the unskilled dock and riverside labour of the East End, of that number only about 2,400 being members of the Dock Labourers Union then recently formed. As to the correctness of this total estimate it is difficult to speak. Other estimates place the figures much lower, while others again place them much higher. Whatever the correct number may have been there can be no doubt that there was a vast number of men employed about the docks whose work was of a most precarious and uncertain character, and whose earnings, taking the year through, were said by witnesses examined before the House of Lords Committee, not to average more than 7s. per week. That there was among this mass much discontent is certain, and to bring this feeling to a head only required agitation and direction. This was supplied by Mr. Tillett and his union on the one hand, and by the active socialistic propaganda carried on for some time among the dock labourers by Mr. John Burns and other socialist leaders, which resulted in the formation of another union. By the August of 1889 these and other influences had brought matters to a head. Public opinion was fairly well informed as to the position of labour in the east end of London. Articles in leading magazines and reviews had fully described and discussed the situation of these workers, and,

above all, the House of Lords Committee, by taking evidence on this subject, had called attention to the evils which existed. Therefore, when, on the 13th August, 2,500 dock labourers came out on strike, a strong current of public opinion was already running in their favour. The strike commenced at the East and West India Docks. The first request of the men was that there should be a uniform rate of pay of 6*d.* per hour, and that no men should be taken on for a less period than four hours. Gradually, however, the strike movement began to extend to other docks and to the wharves and warehouses.

A more detailed list of requirements was then drawn up by the men. They asked : 1. That outsiders taken on should not be discharged with less than four hours' employment and pay. 2. That the engagement of men should be made at two fixed periods only, viz., at eight and twelve each day. 3. That piece-work should be abandoned throughout the entire system. 4. That the minimum pay should be raised, for day-work, from 5*d.* per hour, and for overtime from 6*d.* per hour, to 6*d.* per hour day-work, and 8*d.* per hour overtime. 5. That the pay under the contract system should be raised to 8*d.* an hour and 1*s.* per hour overtime.

The case of the London and India Docks Joint Committee was thus stated by their secretary : "The labour operations at the committee's docks are conducted partly by " piece-work and partly by day-work. The piece-work is performed under direct " contract in the docks of the London and St. Katherine's Co. system, especially in " relation to the discharge of ships, and under this system the men are assured a rate " of 6*d.* per hour. There is also a system of piece-work called 'plus' adopted in " discharge of ships and certain warehouse operations. This system was introduced " to give the men a direct pecuniary interest in their labour. The labourers may be " classed as 1. Those in permanent employment. 2. Preferable men. 3. Outsiders. " The rate of pay for day-work is 5*d.* per hour for a day of eight hours, with " 6*d.* an hour overtime after eight p.m., half an hour is allowed the men for dinner " without deduction from their pay. Under the plus system the men receive not less " than 5*d.* an hour and overtime at 6*d.* out of the fixed rate, and divide the surplus, " if any, at the end of the job in certain proportions. The average weekly receipts of " the permanent and preferable labourers employed by the joint committee are from " 20*s.* to 25*s.* per head. The great difficulty in dock labour is the uncertainty of the " work. It is obviously impossible when there is little work to be done to keep on " permanent pay a staff of labourers large enough to do all the work when the docks " are full. When a sudden increase of business necessitates the employment of " additional men, outside men are taken on, and their numbers are sometimes as few " as 3,000 and sometimes as many as 15,000. These men are unskilled labourers, " no inquiry of any sort is made as to their antecedents or capabilities, and they " receive the same rate per hour as the preferable labourers."

When the strike first commenced the only point which the Dock Company was willing to concede was the first, viz., that no engagement should be for less than four hours. Other dock companies, notably, Millwall, carried on their work and paid their men in a different way, but in little more than a week the strike had spread to all the docks of London both north and south of the Thames, and, more slowly, to the wharves and all other branches of unskilled labour in which the workers were paid less than 6*d.* per hour. The lightermen, stevedores, corn and timber porters, and permanent hands all joined in the movement out of sympathy as they said for the casual labourers, but, being out, most of them soon formulated demands on their own account. The shipping trade of the port and docks of London was soon brought to an absolute standstill, and it was with the utmost difficulty that ships partly laden when the strike commenced were enabled to go to sea. The carmen and other labour of the coal trade had also joined in the movement, but in a few days this section were induced to return to work by an advance of wages. When the movement was thus at its height it was estimated by Mr. Burns that not less than 100,000 men were on strike. So great indeed was the uprising among the ranks of the unskilled labourers that the strike committee had to issue a manifesto requesting workmen to refrain from rash action and refusing to support men who came out without authority. All the dock gates were picketed, and it was asserted by the dock companies that much intimidation was used. That, in fact, men were only kept out from work by the fear of violence, and by, in some cases, actual violence. They even accused the police authorities of according them insufficient protection, and of thus furthering the objects of the strikers.

However this may have been, external order was certainly preserved and, considering the elements of which the army of strikers was composed, a very small number of cases of assault or intimidation came before the magistrates for

trial. Almost day after day enormous crowds of those on strike passed in procession through the East End thoroughfares and into the City. Open-air meetings were held regularly at different points, but all were so well ordered that in no case was there any conflict with the police. Public sympathy was undoubtedly with the labourers, although at times certain of the acts of the central committee tended to alienate that feeling. The subscriptions made in support of the strike from the general public of all classes were such as had certainly never been known before in regard to any industrial conflict. A large fund was required to support so vast a number of people as were concerned, and to give them even the barest necessities of life. This was done in the first place from the subscriptions of the general public and of the British trade unions. During the strike the subscriptions from the first of these sources amounted to 11,732*l.* and from the latter to 4,234*l.* But large as these amounts were it is readily seen that they were insufficient to support so vast a number of people as were involved in the dispute during a period of five weeks. As a matter of fact there was at one period in the dispute a crisis so acute that if funds sufficient to continue the support so far given to the men and their families had not been forthcoming, they must have been starved into surrender. It was just at this critical moment that supplies came in from an entirely unlooked-for source. The labour associations of the Australasian colonies had taken the matter up and sent over by telegram intimation of subscriptions which entirely threw the amounts received at home into the shade. Out of a total of 48,736*l.* subscribed to the strike fund no less than 30,424*l.* was sent from these colonies, a feature in trade disputes never before so largely apparent.

Into the controversial points raised during this dispute it is impossible to enter, and all that can be given here is a general outline of a labour movement almost without parallel in English history. In our time the only thing at all resembling it was the rising of the English agricultural labourers in 1872, which resulted in an advance of wages, the formation of unions, exactly as in the case of the dock labourers, and which was also supported by the general public very freely, the total amount subscribed from all sources being nearly 25,000*l.*

The Negotiations for Settlement.

During the time the dispute was pending, negotiations were almost continually going on with a view to a settlement. The shipping interest was suffering so much by the deadlock in the docks that it brought considerable pressure to bear on the dock companies. Many of the wharfingers and shipping companies with wharves of their own were willing to concede the terms demanded by the men, but the strike committee would consent to no partial settlement until the first week in September, when the committee, finding a large number of the wharves willing to enter into agreement with the men, wisely consented to enter into an arrangement that wharf hands might return to work, so that the full strength of the organisation might be brought to bear exclusively on the dock companies. The following is a copy of the agreement thus entered into:—

“ Outsiders called in not to be discharged with less than 2*s.* pay.

“ That contract work shall be abandoned and a system of piece-work be substituted, by which the men shall receive the total gross receipts of the job direct from the companies, drawing in the meantime a minimum of 6*d.* per hour ordinary time, and 8*d.* per hour overtime for their work so long as the job lasts.

“ The shares of the plus to be divided as follows:—The share of each foreman and each man to be equal. Pay for casual work to be 6*d.* per hour, no pay for dinner-time. Overtime to be reckoned from 6 p.m. till 6 a.m. or 8 p.m. till 8 a.m.”

On their part the men's representatives undertook:—“ 1. That men shall not work at any dock or wharf for less wages or worse terms than those stated above. 2. That men shall immediately return to work at all docks, wharves, or granaries where terms as per list have been agreed. 3. Coal workers to resume work at once.”

“ The above scale of pay is agreed to, subject to the representatives of the men carrying out their part of this agreement.”

In this way the riverside wharves were gradually restored to working order. In the meantime strenuous efforts to bring about a settlement of the strike generally were being daily made by men so diverse in position as the Lord Mayor of London, Cardinal Manning, the Bishop of London, Mr. Sydney Buxton, M.P., and Sir John Lubbock, M.P. The peacemakers met, as is usual in such cases, with many rebuffs, but by the 7th of September had succeeded so far in their purpose that the docks committees

expressed their readiness to pay, from the 1st January following, the increased rate of 6*d.* per hour demanded by the men. The advanced rate for overtime was also said to be conceded. The leaders of the men who had assisted at the conferences at which these terms were arranged agreed to recommend their acceptance, but the body of the men, as represented on their committees, refused to agree with them, and insisted upon the same terms as had been conceded by the wharfingers. The lightermen also refused to settle on any other terms than those formulated when they came out, viz. :—

“ That the day should commence at 7 a.m. and terminate at 7 p.m.; wages, 6*s.* Night to commence at 7 p.m.; wages, 6*s.* A night's work to consist of one job only, the job to mean :—Barge to docks and docking; barge to wharf and watching; delivering in stream, in dock, or otherwise.

“ Sunday, same as other day, 6*s.* One job only as above. All reasonable waterage, railway, or other expenses to be paid. Orders to be given at City offices by 7 p.m.”

In spite of this break-down negotiations were still continued, and by the 13th September the gentlemen engaged in the work of conciliation had the satisfaction of securing terms of settlement from the Dock Companies, which were afterwards accepted by the men. The agreement entered into was as follows :—

- “ 1. That the 5*d.* rate per hour be raised in the case of all work, not piece-work, on and after November 4th next, to 6*d.* per hour, and 8*d.* per hour overtime; no pay for meal times.
- “ 2. Men called in not to be discharged with less than 2*s.* pay, except in regard to special short engagements in the afternoon.
- “ 3. Present contract work to be converted not later than the 4th November into piece-work, under which the men will be paid not less than 6*d.* per hour, with 8*d.* per hour overtime, and the surplus, if any, to be divided equally between them, all payments being made to the men under the supervision of the dock officials.
- “ 4. The hours of overtime at the docks and up town warehouses shall be from 6 p.m. to 6 a.m.
- “ 5. The existing strike to be terminated, and all the men connected with dock, wharf, or river work to return to work forthwith.
- “ 6. The strikers and their leaders to unreservedly undertake that all labourers who have been at work during the strike shall be unmolested and treated as fellow-labourers by those who have been out on strike.
- “ 7. In employing fresh men after the strike is ended the directors will make no difference between those who have and those who have not taken part in it; and will not directly or indirectly show resentment to any of the men who have participated in the strike.”

This document was signed as follows :—

“ The above terms of arrangement have been fully explained by us to and discussed with the leaders of the strike, and are accepted by them.

“ JAMES WHITEHEAD, Lord Mayor.

“ HENRY E. CARDINAL MANNING.

“ SYDNEY BUXTON.”

“ On behalf of the London and India Docks Joint Committee and by their authority, I accept the above terms of arrangement,

“ RODOLPH A. HANKEY.

“ On behalf of the Millwall Company,

“ G. R. BIRT.

“ On behalf of the Surrey Commercial Dock Company,

“ JOHN H. BOVILL, Deputy Chairman.

“ On behalf of the men on strike and by their authority we accept the above terms of arrangement,

“ BENJAMIN TILLET,	ROBERT ILES,
“ JOHN BURNS,	JAMES SULLIVAN,
“ TOM MANN,	CHAS. HAVELOCK,
“ JAS. TOOMEY,	HUGH BROWN,
“ T. M. WALSH,	JOHN REGAN.

“ Witness to the signatures of the representatives of the men on strike,

“ W. J. SOULSBY.”

In the case of the lightermen, whose claims were altogether different, it was arranged through the same mediators that the men should return to work, and that the matters in dispute should be referred to arbitration. Lord Brassey acted as umpire, and

decided that payment should be at the rate of 6s. for 12 hours work, and 1s. per hour overtime; the award to come into force on November 4th. This award left untouched the claim of the men that one job should constitute a night's work, and friction arising on this point a further strike of lightermen took place in November, which lasted for about a week, and which was settled by Lord Brassey's statement that in his opinion this point was already conceded to the men by the agreement made by the mediators before the arbitration commenced. At the docks there was a great deal of unpleasantness between the men who had gone in during the strike and those who had been out, and some time elapsed before anything like harmony prevailed. Sectional disputes have since been frequent, but of these statistics will be found in the tables appended to the end of this report.

This great dispute has called for special notice, not only because it was the greatest conflict of the year in point of numbers and interests involved, but because it was the first serious attempt at combination made by the classes of labour affected, and also because its successful progress and result served as an incitement to other bodies of unskilled labour all over the world to do likewise, strikes of dock labourers being, for some time, very prevalent. The close of the London strike was followed by similar strikes at Rotterdam, Liverpool, Cardiff, Grangemouth, Gloucester, and other ports, but the largest and most fiercely contested were those which broke out in Bristol, and for a time brought the whole shipping trade of the town to a standstill. Various calculations were entered into at the time to show what were the losses caused by the great London dispute, but these were necessarily of a highly speculative character. A writer in the "Daily Telegraph" estimated the loss to the interests involved as being not less than 70,000*l.* per day, or roughly 2,000,000*l.* for the whole time, to which was to be added an indirect loss of 1,000,000*l.* to share and debenture holders, by reason of the depreciation of their securities. References to specific elements of loss will be found further on, so far as they have been ascertained.

Formation of Dock Labourers' Unions.

Naturally, these strikes led to the formation of trade unions for labourers, and the dock labourers of London at once took steps to organise a permanent society. This they entitled "The Docks, Wharf, Riverside, and General Labourers Union of Great Britain and Ireland." It is a trade union, pure and simple, as will be seen from the following statement of its objects:—

- "(1.) To control the system of boy labour.
- "(2.) To abolish the present system of sub-contracts.
- "(3.) To regulate hours of hiring.
- "(4.) To enforce a minimum of four hours. (Minimum rate of pay to be 6*d.* per hour ordinary, and 8*d.* per hour overtime.) Working in stream 7*d.* ordinary, and 9*d.* overtime.
- "(5.) To establish a central fund for the protection of trade interests, for the recovery of compensation in cases of accident, and for the provision of a 10*s.* weekly payment to members on strike.
- "(6.) To abolish extra work and overtime. (No member to work for more than one day and one night consecutively, after which a full day must elapse before resumption of work.)
- "(7.) To establish a labour registry."

The entrance fee is 2*s.* 6*d.*, and the weekly contribution is 2*d.*, with a further quarterly payment of 4*d.* As to its constitution it is very similar to many existing societies. Its central authority is representative, but it has local and district committees, also representative, the functions of which are clearly defined. The rule as to "disputes" is necessarily a most important one, and may be quoted in full:—

"In cases of disputes for advances brought about by the action of the society, or in the endeavour to attain its objects, the following line of conduct shall be pursued:— Upon the receipt of the application the council shall order an investigation into the cause of the dispute, and the investigators' report shall be submitted to them. They shall have the sole right to negotiate with the employers, and of calling a strike, provided that a notice of not less than seven days be given before actually calling the men out. No strike shall be ordered unless carried by seven votes at council meeting."

In no matter of principle does this union differ from many that have gone before it, and it is difficult to see why it should be spoken of as the "new trade unionism," and

as something entirely different in essence from other trade unions which have preceded it. What has taken place in respect to the work of organisation during the last two years finds almost an exact parallel in what happened in the years 1871-72-73. Unions then sprang up with wonderful rapidity, both in the skilled and unskilled branches of labour, and many of them were formed as trade societies only, and paid no friendly benefits whatever. Nor can it be said that what took place in 1889 was a new departure, inasmuch as it was chiefly confined to unskilled labour. Unskilled labour began to organise strongly in 1872 and some of the trade unions then formed are still in existence. The present movement is, however, stronger and more concentrated, and possibly embraces a much wider area and a larger number of people. Whether those unions now formed for fighting purposes only will be able to survive the ordeal of bad trade and an over-crowded labour market remains to be seen.

The South Metropolitan Gas Strike.

Another important dispute deserving a few words of special notice is that of the gas stokers of the South Metropolitan Gas Company, inasmuch as the cause of quarrel was peculiar and the issues involved of considerable interest. For some time previous to the commencement of this dispute the gas stokers throughout the country had been organising and had formed a strong association, said to consist of 30,000 members. This trade union had been at work before the strike at the docks took place, and the success which had attended its efforts did much to stimulate the movement which caused the dock strikes. The gas workers in most of the chief provincial towns considerably improved their position, and had secured a considerable reduction in the hours of labour by the substitution of three shifts of eight hours for two shifts of twelve hours. Relations between gas companies and their workmen thus appeared to be in a fairly satisfactory condition. The general rising of unskilled labour which came to a head with the dock strike had, however, caused the directors of the South Metropolitan Gas Company to fear that further troubles might arise between the Company and its men. It was therefore decided to adopt a system of profit-sharing, designed to give the men a yearly bonus based on reductions in the selling price of gas below a standard of 2s. 8d. per 1,000 feet. The men on their part were to contract to serve the Company for a period of twelve months. The intention being to prevent the occurrence of sudden and unlooked-for strikes. The following is a copy of the agreement and statement of the scheme as originally put forward :—

“ MEMORANDUM OF AN AGREEMENT made the _____ day of _____ 1889, between _____ for and on behalf of the South Metropolitan Gas Company of No. 709A, Old Kent Road, in the county of Surrey, of the one part and _____ of the other part.

- “ 1. The said _____ for South Metropolitan Gas Company agrees to employ the said _____, if he shall remain sober, honest, industrious, and able to do the work allotted to him for a period of twelve months from the day of the date hereof at one or other of the stations of the said Company.
- “ 2. The said _____ agrees to serve the said Company for the period of twelve months in whatever capacity he may from time to time be employed by the said Company at the current rate of wages applying to such capacity.
- “ 3. The said _____ agrees to obey the orders of the foreman in charge.
- “ 4. The work in the retort house is to be carried on in the eight-hour shift system, each gang working one shift in the 24 hours.
- “ 5. The hours of working for yard men to be 54 hours per week.
- “ 6. The Company undertakes that no alteration shall be made in the wages to the disadvantage of any of the men.
- “ 7. The said _____ to be entitled to the benefit and be bound by the conditions of the annexed notice.
- “ As witness the hands of the parties,

“ No obstacle will be thrown in the way of any man engaged under the above contract who may wish to leave the Company's employment before the expiration of the period of service therein agreed for, provided he shall notify such wish to the

engineer of the station at which he may for the time being be employed, and on receipt of such notice the engineer shall, in his discretion, consider whether the services of such man can be dispensed with without detriment to the Company, and, if so, permission will be given at the expiration of such notice as the engineer may deem sufficient.

“ NOTICE TO WORKMEN.

“ In order to give to every regular workman employed by the Company a direct interest in its prosperity, the directors are prepared to place to the credit of every such workman who will sign the form of agreement herewith annexed, a sum of money annually as a bonus or percentage on his wages, regulated by the price charged for gas on the principle of the sliding scale, so that the workmen as well as the shareholders shall be benefited by reduction of price.

“ The shareholders get one quarter per cent. additional dividend for each reduction of 1*d.* per 1,000 feet.

“ The workmen’s scale will be one per cent. on their year’s wages for every penny reduction below 2*s.* 8*d.* per 1,000 feet, which at the present time will amount to five per cent. on the wages of the present year.

“ For the purpose of making a good start, and in order that the men may derive a substantial benefit at once, the system of bonuses shall be calculated three years back, that is for the first year it will be two per cent., for the second three, and for the third three, which is equal to eight per cent. in one year. This will give to the man who has been in regular employ for three years at, say, 30*s.* a week, rather over 6*l.*, to the 24*s.*-a-week man about 5*l.*, and other rates in proportion. Four per cent. interest will be allowed on each man’s account, who will have the option of receiving it yearly or of letting it accumulate at compound interest. When a man has attained a certain age or has been a certain time in the service, he will be entitled to the whole sum, principal and interest.

“ No money, except in the case of death, to be withdrawn during the first year nor during the first five years, except in cases of death, superannuation, or leaving the service of the Company. Those men who accept this offer are requested to give in their names to the engineer of their station. As soon as possible a committee, to be composed of equal numbers of workmen selected by themselves, and officers chosen by the directors presided over by the chairman of the Company, to be formed to settle all details.

“ This offer is made as a recognition of faithful service in the past, and as an inducement to the same in the future. The money will be the absolute property of the men, except in the case of a strike or wilful injury to the Company, in which cases, and in those only, it will be forfeited by those men guilty of that conduct.

“ By Order of the Board,

“ (Signed) GEORGE LIVESEY,

Chairman.

“ 6th November 1889.

“ NOTE.—At the expiration of five years any man may withdraw one-half of the money standing in his name on giving three months’ notice, or the whole on giving six months’ notice, or he may leave the whole or any part at interest.

“ (Signed) GEORGE LIVESEY,

“ 9th November 1889. Chairman.”

On the 27th November a revised form of agreement and notice was issued. The chief modifications of the original being that in paragraphs 1 and 2 of the agreement the number of months agreed for was left open. Paragraph 4 was entirely omitted. In the “ Notice to Workmen ” paragraph 4 was thus revised :—

“ For the purpose of making a good start, and in order that the men may derive a substantial benefit at once, the system of bonuses shall be calculated three years back, beginning on the 1st July 1886, that is, for the first year it will be two per cent., for the second three, and for the third four, which is equal to nine per cent. on one year. This will give to the man who has been in regular employ for the past three years at, say, 30*s.* a week, about 7*l.* 0*s.* 0*d.*; to the 24*s.*-a-week man about 5*l.* 12*s.* 0*d.*, and other rates in proportion. This gift or ‘ nest-egg,’ with which the system is started as from 30th June 1889, is not to be withdrawn during the first year, except in case of death, but is to be left undisturbed at compound interest for three or five years from that date as may be determined by the committee herein-after mentioned, except in the case of death, superannuation, or leaving the service in an honourable manner, under conditions to be set forth in the rules. All men who continue in the service of

the Company under agreement for the period of three or five years above referred to, will be entitled at the expiration of that period to the absolute control of the gift or 'nest-egg.' They may draw it out, with the interest, on giving the necessary notice, or they may still leave it in at interest. These conditions apply only to the gift or 'nest-egg' above mentioned.

"The annual profit-sharing will be limited to those men who serve under agreement, and will be calculated on the 30th June each year, when the amount will be credited to each man's account, who may withdraw it on giving reasonable notice, or it may be left to accumulate at compound interest. The money so left shall remain the property of the man in whose name it stands, and at his disposal so long as he remains in the service of the Company, or is placed on the superannuation list. Interest at the rate of four per cent. will be allowed on each man's account, which can be paid yearly or left to accumulate at compound interest."

It should be understood that during the winter season, when this proposal was made to the men, the full staff of stokers numbered about 1,800, about 1,300 of whom were only casual or winter hands. The permanent hands likely to be most favourably impressed by the Company's proposals were therefore in a very small minority, and as the winter hands had not been included in the first issue of the circular they were necessarily discontented, and undoubtedly overbore the permanent men by their influence and number. An attempt was made to include these men in the scheme, and on the revised circular of November 27th a special addition to meet their case was printed across the circular in red ink. This was as follows:—

"NOTICE TO WINTER MEN.

"The directors have given the regular men who work under agreement the privilege of taking their share in profits annually.

"The directors have, therefore, to place the winter men on a somewhat similar footing. Any winter man who will sign an agreement for any period not less than three months shall be entitled, on leaving in an honourable manner after the said three months, or such other extended time as shall be agreed upon, to five per cent. on his wages, reckoned from the time when he was put on the regular books, but he will not be entitled like a regular man to the gift or 'nest-egg.'

"He may take the money in cash, or, if he intends to return next season, he may if he chooses, leave it in the hands of the Company at four per cent. interest.

" (Signed) GEORGE LIVESSEY,
Chairman."

"27th November 1889.

For some time before the issue of these proposals the relations of the Company with the Gas Workers' Union had been somewhat strained, and the directors had thought it wise to give way on minor points. The union was beginning to insist that none but members should be allowed to work in the retort houses, and the Company had to agree with the Union as to the conditions under which non-unionists should be allowed to work. This was in September, and the position of affairs was so unsettled that even then the Company had begun to prepare for the contingency of a strike. Throughout October further causes of dispute arose, but no actual rupture took place. The Company also feared further demands by the Union. Thus, when the bonus scheme was put forward circumstances were not exactly favourable to its acceptance by the stokers. A large number of the permanent hands, however, accepted the scheme, and entered into the required agreement. The Gas Workers' Union had decided against the acceptance of the scheme, and to enforce this policy demanded the removal of some of the men who had signed the agreement. At this point the directors resolved to make no further concessions, and preparations were made for active hostilities. On December 4th a meeting of delegates of the Gas Workers' Union passed the following resolution:—

"That in the opinion of this meeting of delegates representing the men of the Gas Workers' Union the action of the South Metropolitan Gas Company in forcing upon us to work with men who have signed the bonus scheme (brought out by Mr. G. Livesey), whom we look upon as blacklegs to our society, is condemned by us as being unjust, unfair, and must be resisted, and that all the men in the South Metropolitan Gas Works are justified in giving in their notices forthwith, until the same be abolished, and the said men removed from the works, and that a copy be sent to the directors."

Two days later the Union desired to alter this resolution by substituting the word "or" for the word "and" in the last line but one. On the 5th December the notices of the men were given in to the number of nearly 2,000.

Almost at the same time as these events were taking place in London the members of the Gas Workers' Union at Manchester were engaged in a dispute with the gas committee of the Town Council as to the employment of non-unionist workmen. This led to a strike of 1,200 workmen, which commenced on the 6th December. The South London strike begun on the 12th December. Practically, in each case the issue was the same, and in both instances the Union was defeated. The measures taken by the South Metropolitan Gas Company to obtain a supply of new men were most comprehensive in character, and though for a few weeks there was a difficulty in obtaining a full supply of gas, the Company was ultimately able to carry on its business as usual with the men who had taken the places of those on strike.

The reasons of the men for refusing the offer of the Company were thus set forth in a manifesto issued by them on the same day as the notices were sent in:—

“ Strike Committee Rooms,

“ 509, Old Kent Road, S.E.,

“ December 5th.

“ We, the provisional Strike Committee of the Gas Workers' Union, desire to lay before the public some of the reasons which have induced us to reject the proposed bonus scheme of the South Metropolitan Gas Company:—

- “ 1. We rejected it as being in itself contrary to the spirit of trade unionism, on the ground that the regular men who desire to participate in its benefits are first compelled to bind themselves for twelve months to perform any kind of labour at the wish of the engineer.
- “ 2. We maintain that the directors have only floated the bonus scheme to counteract the men's legitimate combination for increased privileges, it having been openly stated that those who have given their assent to its conditions would be preferred at the time of shortening of hands.
- “ 3. We admit that on first reading the scheme seems to obtain many advantages, but we would point out that not more than 10 men out of 1,800 employed in the carbonising departments have as yet been attracted by it, the remainder having unanimously sent in their notices, though they have been servants of the Company, in some cases, for over 15 years.
- “ 4. We protest that the men, previous to this scheme, were loyal in their desire to serve the Company faithfully and well, unfettered by a twelve month's agreement, as the frequent length of service sufficiently shows; and we maintain that, had the Company offered some rise in wages equivalent to the bonus scheme, the old good feeling on both sides would have been restored and confirmed for the future.

“ We appeal to our fellow-workers and the general public in the impending struggle, believing that the solution of the labour question is not to be found in the promise of a bribe offered to men under conditions dictated by their employers and at the expense of the orderly and legitimate efforts of the men themselves to obtain a greater share of the work produced by their own labour.”

Beyond this it is unnecessary to trace the events of this struggle. Men were obtained from the country, and were lodged and fed in the Company's works until the strike had practically worn itself out. An enormous sum of money was spent by the Company, but its object was effected. The coal porters and also the seamen employed in ships carrying the Company's coal struck in sympathy with the gas workers, but even this was insufficient to shake the purpose of the Company. Numerous attempts at mediation were made by influential gentlemen, but without result. Day by day the strike went on with the accompaniments of picketing, of police escorts and guards, with occasional assaults, intimidation, and actual or attempted destruction of property. The direct cost to the Company was stated in the report of the directors to have been not less than 50,000*l.*, and the indirect expenses and losses to have been about half that amount, so that this strike of only a few week's duration cost the Company about 75,000*l.*

The two strikes, of which the leading features have been briefly presented, were in many respects the most notable disputes of the year, and have for that reason been selected for special notice. In the case of other disputes the principal facts will be found in the tables which accompany this report.

Strike of German Miners.

On the Continent strikes were also numerous, and the great uprising of miners which took place in Germany in the May of 1889 was extremely serious in its character, not less than 110,000 workers being out for three weeks, during which time there was much

rioting. This was attended by destruction of property, the military were called out, and some of the strikers were killed and others wounded. This strike was noteworthy for the personal intervention of the Emperor, who received deputations from both employers and workmen, to whom he expressed opinions that, doubtless, did much to hasten the termination of the strike. The points at issue were: 1. An increase of wages and contract prices of 15 per cent. 2. Prevention of over-production by the prohibition of quarter, half, or entire shifts of overtime. 3. The working shift to be of eight hours, including the time occupied by the men in reaching the place of work in the mine from the pit bank and the return to the same. 4. That the pit timber should be delivered in the mines. 5. That oil for the pit lamps and powder be supplied at cost price to the men.

The arrangement under which the men on strike eventually resumed work was as follows:—

- “ 1. The normal duration of the shift underground is eight hours, and it shall be strictly adhered to; that this period from the conclusion of the descent of the miners to the commencement of the ascent shall not be exceeded. Therefore, in the normal eight-hour shift, the time occupied in descent and ascent is not included. The descent and ascent shall, as a rule, not occupy more than half-an-hour's time.
- “ 2. Extra shifts may exceptionally be worked when urgently and unavoidably requisite for the security of the mines and safety of the miners. In case extra shifts shall be worked in consequence of unusual pressure of business, or to make up for the time lost by interruptions of coal works, this can only be done upon a previous understanding having been arrived at between the managers of the collieries and the miners. Thus the wish expressed for the constitution of a committee of confidential workmen for the decision as to the admissibility of extra shifts is of itself settled.
- “ 3. Every direct or indirect compulsion to work overtime on the part of the colliery officials is strictly forbidden. Special care shall be taken that the workmen who do not take part in the extra shift shall be allowed without interruption or previous notice to ascend or descend the shaft at the usual change time.
- “ 4. We shall justify the confidence which has been expressed to us by seeing that the form and wording of the discharge papers to the miner shall be such as not to interfere with his livelihood.
- “ 5. Everywhere that the miners of a colliery shall so wish, the managers are prepared to charge the powder, oil, and tools in the amounts to be deducted from wages at cost price, instead of the former system of the general total surplus being applied to the relief fund for the miners and their families.
- “ 6. The miners on resuming work shall in no way sustain any loss at the hands of the colliery managers.”

It will be seen that the result was a compromise under which the demands of the men were largely conceded, but for some days after the general settlement was arrived at sections of the miners still remained on strike and demanded the concession of all their original demands. This great strike was followed by others in the north of France and in Belgium, and the idea prevailing in some quarters that the whole series was the result of preconcerted socialistic international action was thereby much strengthened.

The International Labour Movement.

The movement in favour of bringing about a closer relationship between the workers of different nations continued, and, indeed, made progress in 1889. What may be termed the new international labour movement, in contra-distinction to that originated in 1862 by Karl Marx and others, which was largely political, may be said to have commenced in 1883, when a congress of Continental and British trade unionists met in Paris. This was followed by other congresses on the Continent at which the British unions were not represented, but in 1886 another congress assembled in Paris at which the trade unionists of Great Britain, France, and Belgium were largely represented. This led to a further international congress, which assembled in London at the end of 1888. This again naturally led to further congresses, and as the following year was fixed for the great exhibition in Paris, the French capital was chosen as the place of meeting. The one striking fact which had been apparent throughout all these earlier conferences was that in the methods of the foreign and British trades, whether organised or not, there was a clear and distinct difference. The British trade unionists

had fought for and won for themselves most of the privileges they enjoyed, and looked upon their organisations as the best if not the only means of obtaining all the industrial progress they desired. On the other hand, the Continental workers never having enjoyed full liberty of combination had but little faith in trade unionism as a means of progress, but looked to the State to provide for all the wants and needs of labour. The British workers were simply trade unionists working by means of disciplined associative effort to advance their position unaided by State assistance and untrammelled by State control. The Continental workers were in everything State socialists. On this line of difference the first congresses had generally divided, and, except on some matters of principle, general agreement had always been impossible. The London International Congress of 1888 was in some respects different from its predecessors. Although strictly constituted on trade union lines, as understood in England, a strong socialistic element made its appearance at the congress, several notable London socialists being duly appointed by trade unions or sections of trade unions to attend as delegates. These members of the congress stood on common ground with the majority of the foreign delegates, who were State socialists, with the exception of a few who were anarchists. The most important resolution passed by this congress referred to the establishing of an eight hours' working day by legislative enactment. It was as follows:—

“This Congress is of opinion that, owing to the concentration of capital, and the relative weakness of trade unions in proportion to the number of workers, it is impossible to further reduce the hours of labour without the aid of the State, and that in every case eight hours should be the maximum number of hours worked.”

This was moved and seconded respectively by an English and foreign delegate, and the division which took place thereon was of a peculiar character. The voting was by nationalities, and the resolution was carried by four against two, the dissentients being England and Italy. The summary of delegates showed that 11 English delegates voted in favour of the resolution and 31 against. There were 49 individual votes in favour of an eight hours' working day by legislative enactment.

Congresses at Paris.

1889 was a year of congresses in Paris, and there were several which were termed international labour congresses. The chief of these, however, and the one which was the nearest approach to a conference of genuine labour representatives was that organised by the French labour section, which terms itself the Possibilist party, and which, although State-socialistic in its general tendency, is most in sympathy with the British trade unions. The promoters of this congress had, however, received but little encouragement from the English unions generally, and neither sympathy or assistance from the Parliamentary Committee of the Trades Union Congress, nor can the great bulk of English trade unionists be said to have taken much interest in it. Indeed, the only unions of first-rate importance represented were the Amalgamated Engineers, the London Compositors, the Glass Bottle Makers, and the Northumberland Miners, on whose behalf Mr. T. Burt, M.P., and Mr. C. Fenwick, M.P., attended. This gathering consisted of 612 delegates, of whom 524 were French, the remainder being from other countries. Great Britain sent 39, of whom 15 were delegated by the Social Democratic Federation, among these being Mr. Hyndman and other leading socialists. There were also several well-known socialist leaders among the delegates representing the English trade unions; 14 nationalities were represented. At the same time as this congress was meeting another gathering having the same or similar objects in view was assembled in another hall in Paris. It consisted chiefly of the leading German socialists and other Continental and English socialists of the Marxist school, among the principal being Herr Bebel and Herr Liebknecht, members of the German Reichstag, M. Guesde, the leader of a French socialist party. The English delegates numbered 21, among whom were Mr. Wm. Morris, Mr. Cunninghame Graham, M.P., and Dr. and Mrs. Aveling. Early in the week attempts were made to bring about a coalition of the rival congresses. The Possibilist Congress was willing to agree to this fusion provided the delegates to the Marxist Congress would submit their credentials to the examination of their several nationalities as had been done by all the delegates to the Possibilist Congress, leaving anyone objected to, a right of appeal to the full Congress. With this condition the Marxists refused to comply, and the two bodies sat separately. As the Possibilist Congress, at least, was representative in the true sense of the word, it may be expedient to refer to its proceedings.

As will be seen the subjects discussed covered a wide range, and the propositions submitted illustrate with considerable fulness the industrial ideals which the international labour movement is endeavouring to realise.

The programme submitted to the congress was :—

- "1. International labour legislation. Regulation of the day's work by law. Day work, night work, holiday work, work of adults, of women and of children. Supervision of factories and workshops and domestic industries, ways and means of obtaining these demands.
- "2. The most practical means for establishing constant relations between the labour organisations of all countries, without touching their rights of self-government.
- "3. Capitalistic coalitions and the intervention of the public powers.
- "4. To fix the date and place of the next congress, and to arrange for its convocation, organisation, and the holding of its sittings."

The following is the list of propositions submitted for approval by the committee to which the work of arrangement was referred by the congress :—

- "1. A maximum day's work of eight hours.
- "2. One day of rest per week, and no labour on holidays.
- "3. Abolition of night work so far as possible for men, and entirely for women and children.
- "4. Suppression of the work of children before the age of 16 years, and protection of children until the age of 18 years.
- "5. Complete education—General, technical, and professional.
- "6. Overtime not to exceed four hours in 24 hours, and should be paid double.
- "7. The responsibility, civil and criminal, of employers in cases of accident.
- "8. Nomination by the workmen of a sufficient number of capable inspectors, paid by the State or by the municipality, with full powers to enter at any time into factories, workshops, or places of business, and to visit apprentices in their own residences.
- "9. Establishment of workshops by the workmen with subventions from the municipality or the State.
- "10. The labour of workhouses and of prisons to be submitted to the same conditions as free labour, and to be confined as much as possible to great public works.
- "11. No foreign workman should accept employment, and no employer should employ foreign workmen, below the rate fixed by the union of their trade.
- "12. A minimum rate of pay to be fixed in each country having relation to the cost of that which is reasonably indispensable to existence.
- "13. The abrogation of all the laws which prevent the international organisation of labour.
- "14. Equality of payment for equal labour to men and to women."

With a few reserves and slight amendments this programme was accepted by the Congress. The Italian delegates, being anarchists, abstained from voting on a programme which practically handed over to the State the duty of legislating for every detail of the labour question. The English delegates voted against proposition 6 as they were opposed to any daily allowance of overtime whatever.

With a view to establish permanent relations between the socialistic organisations of different countries it was resolved :—

- "1. That permanent relations ought to be established between the socialistic organisations of different countries, but that in no case and under no pretext should those relations infringe on the autonomy of national organisations, each being the only and best judge of the tactics to be followed in their own country.
- "2. That an invitation be addressed to each trade union and corporate group to federate themselves nationally and internationally.
- "3. That the establishment of an international bulletin, edited in several languages, be proposed for the consideration of the socialistic parties of different countries.
- "4. That it is desirable to ask each workmen's organisation to give to each of its members going abroad a card by which they may be recognised by their brethren of all countries.
- "5. That committees be established in each country where they do not exist to maintain international relations of the corporative, political, and social orders.

" 6. That each year, and for the year only, the national committee of one country will perform the office of a central international organ of correspondence. It is forbidden to this committee to take any action whatever outside of the duty assigned to it. It shall also be the duty of this committee to receive, translate, and send to the parties interested all communications addressed to them concerning the social and industrial condition of the workers."

It was resolved, on the motion of the American delegates:—

" This Congress declares that its resolutions in favour of the reduction of the hours of labour, of the limitation of the labour of women and children, all measures of protection, may not be considered as expressing the entire programme of industrial reforms. These measures are demanded only in order to assure for the present the improvement of the painful situation of labour, and to accord leisure, education, and the organisation necessary to end at last in the appropriation and control of all the means of production by the workers themselves, as that, we affirm, is the only measure which can assure to labour the entirety of its rights.

" This Congress condemns emigration as a remedy for industrial crises, as false in principle and cruel in practice, helping only the countries which the emigrants leave, and subjecting to serious injury the nations in which they seek asylum. It is, moreover, but a temporary relief for European nations, and it will be rendered needless by the nationalisation of the means of production and a just division of the products of labour.

" This Congress approves of the United States law prohibiting the importation of labour under contract, and declares that each Government ought to pass a law forbidding such contracts in their territory, and another law punishing the inducement to emigration by means of false promises and representations."

The Congress also passed resolutions on the subject of syndicates and trusts, and decided that the next International Congress should be held in Brussels in 1891. This was undoubtedly the largest, most successful, and most unanimous congress of its kind yet held, and would seem to have brought about a closer understanding among the workers of different nationalities than ever existed before, but as yet there cannot be said to be in existence any real central authority directing the movement, or trying to give practical effect to the resolutions of the Congress. The propositions adopted seem little more than expressions of abstract opinion, and so long as each country is simply to go on in its own way, such congresses cannot materially alter the existing situation.

Miners' Congress at Paris.

As many miners' organisations were represented at the Congress above referred to, it was resolved to take advantage of the presence in Paris of so many delegates of this branch of industry, and an International Conference of Miners was held shortly after the close of the larger meeting. Mr. C. Fenwick, M.P., presided at the opening, in the absence of Mr. Thos. Burt, M.P. This Congress chiefly occupied itself in taking reports from various countries as to the condition of miners. In all there were about 20 delegates present, and 15 Continental coal fields were represented. Some of the delegates had attended the Possibilist and Marxist Congresses. The resolutions adopted were in favour of federating the miners' associations of all countries; of choosing an accessible central spot for the next international meeting; of avoiding partial strikes; and of keeping up international communications.

The statutory eight hours' day question cannot during 1889, or indeed up to date, be said to have made much progress among the general trades of the kingdom, and no common agreement as to a definite policy thereon has yet been arrived at. Previous to the Bradford Trades Union Congress of 1888 a vote of the trade unions was taken by the parliamentary committee of that body, but the result was so confused and indefinite that no action could be taken thereon. It was, however, decided that the question should, in a simpler form, be again put during the following year. This was done, and the result was submitted to the congress held in Dundee in the September of 1889, at which over 700,000 trade unionists were represented. Only 33 societies, with 169,540 members, had taken sufficient interest in the matter to send in returns. The voting of these societies showed that there were 39,629 votes in favour of an eight hours' day and 62,883 against. Those in favour of an eight hours' day were further asked to vote whether they would obtain it by Act of Parliament or by other

means. 28,489 voted in favour of the parliamentary method and 12,274 against it. Adding those opposed to the system of an eight hours' working day to those opposed to parliamentary action, there would appear to be a majority of 46,668 opposed to an eight hours' day by Act of Parliament. Objections were, however, raised in Congress as to the manner in which votes had been recorded, and the statistics above quoted were rejected, as those presented at Bradford had been in the previous year. The main question was, however, put to a definite issue in the following form. It was moved and seconded—

“That the maximum working day for all trades be eight hours.”

On this proposition being put to the vote, there were 63 in favour, while 88 voted for the direct negative.

Among the miners of the kingdom, as a special trade, greater harmony of opinion prevailed on this subject, although even they are not quite unanimous. The representatives of this section of workers had discussed the subject of an eight hours' day at frequent conferences, and so at the Dundee Congress their minds were fairly made up, not only as to an eight hours' day but even as to a statutory eight hours' day, and when the general question was disposed of, as above recorded, it was moved, seconded, and carried by a large majority—

“That this Congress desires to express the opinion that the time has fully come when there should be an eight hours' Bill for miners, and we hereby request the Parliamentary Committee to consider at the earliest date and to prepare a Bill to be presented to Parliament.”

Subsequent conferences of miners' representatives have repeatedly since then ratified this decision, and a miners' eight hours' Bill has been prepared and introduced into Parliament by gentlemen acting on behalf of the workmen interested.

*Trades Union Congress at Dundee.**

As already stated, the twenty-second Trades Union Congress was held at Dundee in 1889. It was rendered notable by being the largest congress yet held, and by the determined attacks made upon the secretary of the Parliamentary Committee, Mr. H. Broadhurst, M.P., by the socialist delegates present. A vote of no confidence in Mr. Broadhurst was proposed, but was lost by 177 against 11. Of more importance, however, is the general work of the Congress, and it is as well to reproduce here such of its resolutions as are of general interest, and which will show, when compared with the resolutions of the International Congress, the essentially different lines upon which Continental and British labour movements are conducted. It will be observed that the resolutions here passed do not at all amount to a general or detailed demand for a complete revolution of the existing industrial system, but that they are confined to the simple practical object of making reforms or improvements in the existing system. Parliament is not asked, except in the case of the hours of labour of miners, to deal in any way with the hours or remuneration of labour, but is simply called upon to legislate for labour on such points as labour is unable to deal with for itself. The following is a record of the principal resolutions carried:—

“EMPLOYERS' LIABILITY BILL.—That this Congress is of opinion that the Employers' Liability Act should be so framed as to prevent contracting out of its provisions, place no limit to the amount of compensation recoverable, or require notice of the injury to be given to the employer. It, therefore, instructs the Parliamentary Committee to prepare a Bill embodying the foregoing provisions. Also that the Congress approves the action of the labour members in opposing the Bill of last session.”

“CORONERS' INQUIRIES IN SCOTLAND.—That this Congress instructs the Parliamentary Committee to use every effort to secure the passing of a Bill in Parliament to make the law of Scotland synonymous with the law of England relative to coroners' inquiries into accidental death.”

“REPRESENTATION OF LABOUR IN PARLIAMENT.—With the view of furthering the representation of labour in Parliament, this Congress instructs the Parliamentary Committee to render every assistance in securing the passing of a measure—First, for the payment of members of Parliament by the State; second, for the payment of

* The Congress at Liverpool in 1890 cannot be dealt with in this Report, which is made before the date fixed for holding that Congress. Its proceedings will be dealt with in the Report for 1890.

the returning officer's expenses at elections from the local rates; third, we further recommend that, wherever practicable, labour organisations should take advantage of every opportunity of aiding in securing direct labour representation in Parliament, also in county and town councils and other local bodies."

The new organisation formed by the seamen of the kingdom, as already described, was strongly represented at this Congress, and resolutions were passed on a number of subjects specially affecting seafaring men:—

"CERTIFICATES FOR SEAGOING SHIPS.—That in order to secure the greater safety of life and property at sea, it be a special instruction to the Parliamentary Committee to use their best endeavours to procure in any Shipping Bill that may be introduced into the House a clause giving effect to that recommendation of the Royal Commission on the Loss of Life and Property at Sea, 'that a competent professional examination should be required for the rating of shipwrights and boatswains,' so that all such, before being allowed to proceed to sea in that capacity, must produce a certificate of competency. And that the use and wont custom of the trade shall be legalised by all vessels being required by law to carry one or more shipwrights."

"CERTIFICATES FOR SAILORS AND FIREMEN.—That, in the opinion of this Congress, certificates of service should be granted to all sailors and firemen, four years to constitute the service of a sailor, and twelve months that of a fireman, as it is found that many incompetent men are receiving from captains V.G. certificates to which they are not entitled, whereby there arises great danger of a ship foundering through unskilfulness on the part of the crew; and this Congress instructs the next Parliamentary Committee to bring the matter under the notice of the Government, with a view to future legislation."

"REPRESENTATION OF SEAMEN ON PILOTAGE BOARD.—That, in the opinion of this Congress, sailors and firemen should be represented on all pilotage boards, as it is of the utmost importance that the pilotage system should be perfect, and that it should not, as at present, be left entirely in the hands of ship-owners, whose interests are, in a great measure, antagonistic both to pilots and seamen; and this Congress urges upon the Parliamentary Committee to take steps to obtain this representation."

"CONVEYANCE HOME OF DISTRESSED SEAMEN.—That, in the opinion of this Congress, the conveyance home of distressed seamen is far from satisfactory, seamen being compelled at times to leave their homes and go to countries where they encounter the dangers of cholera and other diseases, and are, in many cases, confined in hospitals at their own expense, and have to pay about 3s. per day until they arrive in the United Kingdom. This Congress, therefore, instructs the Parliamentary Committee to urge upon the Government to bring in a Bill compelling shipowners to pay all hospital expenses, and the cost of passage home to the United Kingdom."

"REPRESENTATION OF SEAMEN ON LOCAL MARINE BOARD.—That, in the opinion of this Congress, seamen and firemen should be represented on all local marine boards in equal proportion to the shipowners, and therefore urge on the president of the Board of Trade to carry out to the fullest extent the promise made by him to a deputation of the Sailors' and Firemen's Union, which waited upon him in the month of April last, and that the Parliamentary Committee be instructed to bring this matter again to his notice."

"MANNING OF SHIPS.—That this Congress is of opinion that British vessels are undermanned, and therefore are unseaworthy, and one of the causes of the great loss of life at sea; that all vessels shall be required by law to carry, for their navigation sufficient and competent crews, the ships to be manned according to tonnage; and, for the purpose of carrying out the above resolution, this Congress instructs the Parliamentary Committee to take the necessary steps to either bring in a Bill, or insert a clause in any near future shipping legislation, to carry out the desired object."

"MERCHANT SEAMEN (PAYMENT OF WAGES AND RATING) ACT, 1880.—That this Congress is of opinion that sub-section 5, section 4, of the above Act should either be abolished or amended, inasmuch as the superintendents referred to owe their appointments to the shipowners, and their (the superintendents') decision cannot be accepted as impartial by the persons seeking redress; we therefore urge upon the Parliamentary Committee

to take such steps as will secure the abolition or amendment of such law in this respect."

"THE CHARGE OF STEAM ENGINES AND BOILERS.—That this Congress of opinion that no person should be placed in charge of steam engines or boilers (sea or land) who has not undergone an examination to prove his practical fitness for such employment, and instructs the Parliamentary Committee to render all the help they can to secure legislation in this direction during the coming year."

"FACTORY AND WORKSHOP INSPECTORSHIPS.—That, in view of the evidence adduced before the Lords' Commission on 'Sweating,' together with the fact that in factories, mines, and upon railways inefficient inspection takes place, it be an instruction to the next Parliamentary Committee to take the necessary steps to bring the following before the Government of the day: 'That this Congress is of opinion that the present evils of the 'sweating system' have been brought about mainly by the inadequate way the Factory and Workshops Act has been administered.'"

"Also, seeing that the Shop Hours Regulation Act, 1886, has failed to accomplish the object for which it was passed, owing to the fact that no authority is responsible for the enforcement of its provisions, and that a further number of practical working men as inspectors of factories, workshops, mines, and railways should at once be appointed."

"REGISTRATION OF TRADE UNIONS.—That it be an instruction to the Parliamentary Committee to secure an alteration of the registrar's regulations, or, if necessary, an alteration of Acts, so that a trade union registered under the Trade Union Acts, 1871 and 1876, in Scotland, that such registration shall apply to and be valid in either England or Ireland, should in any case its general office be removed to either country, or *vice versâ* as the case may arise, and terminate the present inconvenient and expensive system. That, when a general office of a trade union is removed from one kingdom to another, the registration of the rules must be cancelled in the one and registered as a new association in the other."

"IMMIGRATION OF FOREIGN AND PAUPER LABOUR.—That this Congress hereby expresses its regret that the report recently presented to Parliament by the Commission on immigration of foreign labour contains no recommendation to Parliament as the basis of a Bill to restrict or prevent the immigration of foreign contract or pauper labour, and hereby instructs the Parliamentary Committee to take steps to remedy the omission."

"HOURS OF WORK ON RAILWAYS.—That the Congress views with alarm the long and continuous hours of duty that railway men in responsible positions are called upon to perform, considers such as being detrimental to the men's best interests, and a source of danger to the travelling public."

"MERCHANDISE MARKS ACT.—That the Congress approves the Bill drawn up and submitted to Parliament by Messrs. Broadhurst, Fenwick, and Coleridge on the Merchandise Marks Acts, and that the Parliamentary Committee be instructed to use every means in their power to get the Bill passed into law."

"AMENDMENT OF COAL MINES REGULATION ACT, 1887.—That, in the opinion of this Congress, sub-section 8, clause 48, of the Coal Mines Regulation Act, 1887, should be amended by leaving out the words 'subject, nevertheless, to the order of the coroner'; and that it should be made legal for friends of deceased persons to be represented at coroners' inquests, with a view of making a full inquiry into the cause of the accidents."

"PRISON *versus* FREE LABOUR.—That this Congress regrets that nothing has been done during the past year to remedy the grievances of the mat-weaving industry caused by the keen competition of prison labour, and hereby instructs the Parliamentary Committee to make a special effort to induce the Government to put a stop to the obnoxious system of allowing private firms to contract for prison labour, the produce of which comes into the open market at prices which it is impossible for the outside trade to compete with."

"REFORM OF THE LAND LAWS.—That this Congress, whilst urging upon the Legislature the immediate necessity of a reform of the Land Laws, is of opinion that no reform will be satisfactory unless through land nationalisation."

“ **FAIR WAGES QUESTION.**—That this Congress urges on all trade unions the necessity of using their influence to get corporate and other bodies to insert the following declaration in all specifications for public work, namely: ‘That not less than the standard rate of wages be paid to all workpeople employed in each particular trade’; and, further, that the Parliamentary Committee be instructed to endeavour to secure a similar clause in all Parliamentary contracts.”

“ **JOINT BOARD OF EMPLOYERS AND WORKMEN.**—That this Congress is of opinion that the formation of joint boards, composed equally of employers and workmen, is highly desirable, as being well calculated to result in a better understanding between them, and secure the settlement of important questions affecting the interests of both; and hereby urges the trades councils and other organised bodies of workmen to bring the subject before the chambers of commerce and other bodies of employers, with a view to the formation of such boards.”

“ **THE CONDITION OF THE BLIND.**—That this Congress, in view of the report soon to be presented to Parliament by the Commission on the Condition of the Blind, instruct the Parliamentary Committee to obtain for that class such assistance as shall tend to the amelioration of their condition.”

“ **CANVASSING AT ELECTIONS.**—With the view of furthering the representation of labour in Parliament, this Congress instructs the Parliamentary Committee to render every assistance in securing the passing of a measure to make canvassing at all elections illegal.”

“ **PICKETING.**—That in the event of any member of a trade union represented at this Congress being convicted of picketing, without violence, under the Conspiracy Act, 1875, the Parliamentary Committee be instructed to take steps to have the Act clearly defined.”

“ **INTERNATIONAL CONGRESSES.**—That this Congress approves the union of workmen on the Continent, and instructs the Parliamentary Committee to use all the means in their power to further international trades union congresses, and in future become the medium of communication between the workmen and women of Great Britain and the Continent, when approached by any body entitled to speak in the name of organised working men and women.”

“ **FEDERATION OF TRADES.**—That, in the opinion of this Congress, the time has arrived when the various trades should be drawn into closer unity, and requests the Parliamentary Committee to draw up some system of federation for the consideration of the next Congress.”

Mr. J. Keir Hardie, the representative of the Ayrshire miners, who had attended the Marxist Congress in Paris, moved a series of propositions, which form in reality the socialist labour programme as laid down at the Paris congresses. These were as follows:—

“That this Congress instructs the Parliamentary Committee to take action on the following resolutions:—

“(1.) The passing of labour legislation being a necessity in all countries to meet the industrial development of recent years, and to prevent further physical and moral degradation of the workers, the Congress proposes the following as a basis of such legislation:—

“(a.) The maximum working day for all trades to be eight hours.

“(b.) Prohibition of the industrial work of children under fourteen years of age, and restriction of the work of young persons under eighteen years of age to six hours per day.

“(c.) Prohibition of night work, with the exception of those industries in which continued work is an absolute necessity.

“(d.) Prohibition of the employment of women in such industries as are known to be specially hurtful to the female organism.

“(e.) Absolute prohibition of night work for women and young persons under 18.

“(f.) A rest of at least 36 uninterrupted hours each week.

“(g.) Prohibition of such industries and such modes of production as are specially injurious to the worker.

"(h.) Proper inspection of all working places where industrial work is performed, domestic industries included, by a sufficient number of inspectors paid by the State, of whom at least the half must be nominated by the workers themselves.

"(2.) The Congress further declares that these reforms can only be finally established by legal enactment, though much may be done to advance them by the ordinary trade union methods. It therefore calls on the workers to organise politically and industrially, so as to realise these reforms soon.

"(3.) That the Congress declares it to be the duty of all workers to support the Swiss Government in its desire towards an International Congress of the Governments of the world, in order to formulate international treaties for the better protection of labour.

"(4.) The Congress approves of the proposal to make the 1st of May 1890 a universal holiday, on which to hold mass meetings in furtherance of the eight hours' working day."

Proposition (a) was taken out of this list for separate discussion, and was disposed of as already recorded. In opposition to the remainder of them, the previous question was moved, and was carried by 75 votes against 49, who voted to continue the discussion. Thus, on every question of prime importance brought forward specially in the socialist interest during the Congress, the party was heavily outvoted. The significant fact, however, is that the socialists were distinctly there as a party, acting together, and with definite aims, for the first time, to use the labour organisations for the purposes of their own movement, and making themselves more strongly felt than they had ever been able to do before. They were all, also, there with genuine trade union credentials.

The congress resolution on joint boards of employers and workmen, though not adopted by Congress for the first time, is rendered important by the fact that the idea has since been taken up by Chambers of Commerce in connexion with Trade Councils and Trade Unions generally in several localities.

The London Chamber of Commerce was the first to take action in this matter, soon after the close of the great dock strike, and, since then, the example thus set has been followed by the Bristol Chamber of Commerce and other similar bodies. This is a hopeful sign, and the general creation of such boards upon voluntary principles would undoubtedly do much to mitigate some of the worst evils and industrial discord, although they could not reasonably be expected to prove an absolute preventive of strikes. In neither of the above-named cases is the system of conciliation proposed yet in working order, but arrangements are gradually being made between the chambers and the trade unions, which will, in all probability, ensure its adoption.

Wages under Public Contracts.

Another of the resolutions of the Trades Union Congress has also for some time back been worked out practically in several localities, viz., the proposition which urges upon the trade unions the necessity of using their influence to induce corporate bodies to insist that, on all contracts entered into with them, it shall be a specification that not less than the standard rates of wages shall be paid to the workpeople employed on such contracts. The same principle is also applied to prevent the so-called sweating of labour by means of the sub-contract system. The London School Board has, so far as its printing is concerned, adopted this method of letting its contracts, and the following clause finds a place in its tender form :—

"The (undersigned) hereby further declare that (he or they) pay to the workmen employed by (him or them) not less than the minimum standard rate of wages in each branch of the trade.

Further, in the contract form it is provided that :—

"The contractors shall not assign over or underlet this contract or any portion thereof. If the contractors assign or underlet, or attempt to assign or underlet, any portion of this contract the Board shall have power to determine this contract immediately."

In the case of the London County Council there is a standing order to this effect :—

"Any person or firm tendering for a contract with the Council shall be required to make a declaration that they pay such rates of wages and observe such hours of labour as are generally accepted as fair in their trade; and, in the event of any charges to the contrary being established against them, their tender shall not be accepted."

In the case of subletting of any contract or part of it a forfeit of 500*l.* is incurred by the contractor. Other public bodies in different parts of the kingdom have adopted a similar system, and a general movement is being made to secure its general application.

The revelations made before the House of Lords Committee on the sweating system as to the conditions under which many of the contracts for public work were carried out attracted so much attention that the action of the trades as above described originated therefrom. Generally beneficial results are anticipated from this method of safeguarding the interests of the workers under public contracts.

Legislation affecting Labour.

Three Acts of Parliament closely affecting labour were passed during the session of 1889. "The Master and Servant Act, 1889," is an Act to repeal certain statutes relating to masters and servants in particular manufactures which have ceased to be put in force or have become unnecessary, partly by reason of changes in the methods of manufacture and in the conditions of employment, and partly by reason of improvements in the general law.

"The Cotton Cloth Factories Act" deals with a subject which has for many years engaged the attention of the trade unions of the cotton weavers of North-east Lancashire, and also of the Trades Union Congress. The grievance of the operatives is set forth in a resolution passed at the Trades Union Congress of 1888, which was as follows :—

"That the Parliamentary Committee be instructed to bring before Parliament at the earliest possible date the pernicious system of adulterating cotton yarns (by oversizing) and the consequent infusion of steam into weaving sheds in certain parts of North-east Lancashire, by which the health and lives of persons employed in the manufacture are sacrificed with a view to its total abolition."

It would be difficult to find a better practical exemplification of the manner in which the combinations of workpeople in this country avail themselves of the power given by their trade unions to bring about results that can only be obtained by parliamentary action. This was no question of wages or hours of labour even. It was a matter affecting the health of the people employed in a certain class of factories, and for its removal something more uniform, more compulsory, and more stringently enforced than a mere trade union rule or resolution was necessary. It was an important question of workshop sanitation. A whole trade was to be dealt with on uniform lines. Therefore the action was, first, local, by the local unions, next parliamentary through the committee of all the unions of the kingdom. Then the matter passed through the stage of a Government inspection on the spot, then of an important public inquiry by the Town Council of Blackburn, after which, these means having failed to bring the desired relief, a Bill was introduced into Parliament. The parliamentary representatives of the localities concerned in the measure were consulted, and the draft of the Bill was arranged by a joint committee of operatives and members of Parliament. In this way the Bill was passed through the House of Commons, between the 27th June and the 14th August.

The Act thus secured, though not absolutely satisfactory to the operatives, was received as a fair settlement of the question, inasmuch as it not only limited strictly the amount of artificial moisture to be forced into a weaving shed but also provided for effective ventilation.

The administration of this Act is placed in the hands of the factory inspectors. The occupier of any cotton cloth factory in which artificial humidity of the atmosphere is produced must give notice thereof in writing to the chief inspector of factories. The temperature and amount of moisture in the atmosphere are prescribed by the Act. In each factory there must be kept in correct working order two sets of standardised wet and dry bulb thermometers plainly visible to the operatives. These thermometers must be read and recorded by the person in charge twice in each day, and one copy of the record forwarded monthly to the inspector. Each factory must also provide for the admission in every hour of six hundred cubic feet of fresh air for each person employed. If in spite of these precautions dust is generated, the inspector has power to deal with the matter. Penalties are imposed for persistent or repeated contravention or non-compliance with the provisions of the Act.

"The Technical Instruction Act." This Act gives power to certain local authorities to aid from the rates technical and manual instruction in their districts. By "technical instruction" is meant instruction in the principles of science and art applicable to

industries. It is not intended to attempt the direct teaching of any trade. Under certain conditions, modern languages and commercial and agricultural subjects may be taught. The rate for these purposes must not exceed one penny in the pound. This is a system of secondary education to a large extent, and is under the control of the Science and Art Department. If local bodies generally avail themselves of the powers accorded by this Act, increased facilities will be given in industrial districts for teaching to children who have passed the standards the scientific principles which apply to the chief local industries, in order that the workman may have the fullest knowledge of all that pertains to the trade at which he is employed.

Statistics of Strikes of 1889.

As has been already stated generally, the strikes of 1889 were very numerous. As a matter of fact, the strikes recorded for the purposes of this report more than double in number those of the previous year. The general causes of this increase have already been treated, and it is now only necessary to add some analysis of the statistical tables to be found further on. The method of collecting the information upon which the tables are based was fully stated in the report of last year. It is now only necessary to say that a form (A) containing a list of questions is sent out to employers whose workpeople may have been out on strike during the year. Another form (B) is sent out to the officials of the trade unions whose members may have been concerned in strikes during the year. The answers received on the various points submitted are tabulated as here presented. During the year 1889, 1,145 strikes were recorded as against 504 noted in 1888. As, however, the systematic collection of strike statistics was not commenced until nearly the middle of the latter year, part of this great increase may be only apparent and due to the closer observation of strike movements in 1889. To obtain information as to these strikes, 1,029 of the (A) forms were sent out to employers of labour, the difference between the number of strikes and of forms sent out being due to the fact that in some cases it was impossible to trace the firms concerned, and, that, in others, one firm might have strikes in more than one establishment. 579 of these forms, more or less, completely filled in, were returned, and letters of explanation were received in 88 cases. Acknowledgment was thus made in respect to 667 of the applications for information, a percentage of 64·8 as against 56·4 per cent. in the previous year.

Of the B forms 571 were sent out. The discrepancy between the total number of strikes and of forms sent out arises because in very many cases no trade union was concerned, and because in a large number of instances it was impossible to find the names and addresses of the officers directing the strikes. Of this number 287 were returned with information, and 37 were accounted for by letters of explanation. Acknowledgment was thus made in 324 cases, a proportion of 56·7 per cent. as compared with 49·5 per cent. in the preceding year. There has thus in each case been a slight improvement as to the willingness of each party to supply information, but there yet remains much room for improvement in this direction.

All the forms sent in are not filled in with the same degree of completeness, and some contain very little information indeed. What has been done, therefore, is to use every available piece of information in order that as many facts as possible may be presented in reference to the labour disputes of 1889. It will thus be found that while the details of some of the strikes are presented in all the tables with absolute fulness, in other cases the corresponding particulars have not been supplied, and therefore some columns are left blank.

An analysis of the different strikes by trades gives the following results :—

NUMBER OF STRIKES in the DIFFERENT TRADES.

Trades.	Number of Strikes.	Trades.	Number of Strikes.
Basket making - - - -	1	Building trades— <i>continued.</i>	
Brewing - - - - -	17	Carpenters and joiners - -	14
Brush and comb making - -	7	Cement, lime, and concrete workers	5
Building trades :—		Lath splitters - - - - -	2

Range and fire grate making -	1	Waiters - - -	1
Rivet making - - -	1	Warehousemen - - -	1

Taken as a group, the textile trades exceed all other groups of trades, and are responsible for no less than 223 strikes out of the grand total, a percentage of 19·5. Among these trades the cotton trade is at the top of the list in point of number of disputes, having 137, as against 155 for 1888. Coal mining was disturbed by 111 strikes, which is 26 less than in the previous year. Shipbuilding is down for 107 strikes; while the different branches of the engineering trade come next with 97 strikes. Dock and wharf labourers, though appearing little on last year's list, are here shown to have had no less than 86 strikes; while seamen and firemen had 43 disputes. It will thus be seen that the six trades above referred to, have furnished more than one-half of the total number of strikes of the year. It should here be understood that in every case where distinct enumeration was possible each separate establishment affected counts as one strike, although, so far as the men were concerned, there may have been only one strike movement affecting a large number of establishments, as, for instance, in the general strike of bakers in Scotland, in which over 1,000 separate establishments were affected, but of which only 28 are enumerated, the units taken being the towns in which the strike prevailed. Unfortunately, it was not always possible to obtain a complete list of all the separate establishments affected by a general strike, and, therefore, in some cases this method of separate enumeration could not be carried out. Indeed, if full particulars could have been obtained as to all the distinct establishments affected, there would have been a list of 3,164 strikes for the year. It must therefore be borne in mind that, although these returns give details of only 1,145 strikes, there should, according to the method of enumeration adopted, have been a total of 3,164 establishments on strike.

The distribution of the strikes by localities and trades is shown in the following statement:—

Locality.	Number of Strikes.	Trades.	Locality.	Number of Strikes.	Trades.

Last year in thus classifying the causes and objects of strikes it was possible to divide them into nine different heads, but this year other causes and objects have to be shown and 12 divisions have been necessary for their classification.

These new causes are "for advance in wages and other concessions," for "re-instatement of superior officials," "sympathy with or intimidation in consequence of prevailing strikes." The "sympathetic" strike although not altogether new has never been so frequently resorted to as during 1889, and in the case of the dock strikes was undoubtedly used with great effect.

As in some cases it was doubtful whether the strikes were purely sympathetic or were partly brought about by the influence of a certain amount of pressure, it has been deemed best to group the two alleged causes under the one head.

As will be seen, considerably more than one half of the total number of strikes have been for advances of wages only, but if to these are added those for advances of wages and other concessions at the same time, the total of advance of wages strikes amounts to 768, or 67 per cent. of all the strikes of the year. Of those for advances of wages only, less than one half were entirely successful, the proportion being 40·3, while 31·5 per cent. were partially successful, that is, part of the amount of advance demanded was conceded; 10·7 per cent. were unsuccessful, and results were unknown

in 9·5 of the cases. These results are in accordance with the principle that on a rising labour market, such as prevailed during the whole of 1889, strikes for advanced wages are generally successful. So, on the other hand, even when trade generally is good, with strikes against reduction of wages, which do not often occur at such times, and are only brought about by special circumstances of depression in some trades, they are mostly unsuccessful. There were in all but 45 strikes from this cause, of which a little over a fourth were successful, 8 being partially successful, 20 entirely without success, and in 5 cases results were unknown.

No less than 139 strikes resulted from general dissatisfaction on the part of the operatives with the conditions under which they worked, such as the hours of labour and their arrangement, the quality of material supplied to work with, and other similar causes. Of these 47·9 per cent. were successful, 19·7 per cent. were partially successful, 30·2 were non-successful, the balance of results being unknown.

The only other cause of strikes calling for special notice is that of, sympathy of other trades or other sections of the same trade with men on strike, or, as it is put by the other side, in many cases the influence or intimidation exercised by strikers upon bodies of workers not themselves directly interested in the strike. This kind of strike was most frequently exhibited during the dock strikes, and, in some cases, undoubtedly contributed to the success of the general strike movement, inasmuch as it brought to bear upon the special employing interest attacked, the pressure of another employing interest having no specific cause of quarrel with its own work-people, but having all its work stopped simply because of the conflict in another place.

Doubtless in most cases there was some community of interest between the original and the "sympathetic" strikers, and it is certain that in most instances those who came out on alleged sympathetic grounds did not return to work without receiving substantial concessions for themselves. The disadvantage of this special kind of strike to the principal strike movement is that it often embarrasses the central strike organisation by bringing upon the strike funds large numbers of claimants for relief. For this reason during the dock strike the strike leaders often had to exert considerable pressure to prevent the turn-out of large numbers of workpeople upon sympathetic grounds only. The class of cases in which this form of strike seems most likely to be of material aid to the strikers is that in which the sympathetic strikers are in the employ of the same firms as the men they propose to assist, and who by coming out bring every section of the business to a standstill. This is a form of strike more common hitherto in the United States than in this country, and was a feature of the general strike policy of the Knights of Labour. Twenty strikes are debited to this cause, and of these seven are said to have been partially successful, five unsuccessful, and eight are unaccounted for; the probabilities being that in most cases the result of the general strike would determine the sympathetic strike.

The general total of results shows that of the 1,145 strikes recorded 41·6 per cent. were successful, 32·1 were partially successful, 18·1 were unsuccessful, and of 8·2 the results are not known.

The following statement gives particulars as to the number of persons engaged in these successful or unsuccessful strikes, but it is based only, it may be pointed out, upon particulars obtained of strikes in separate establishments or general strikes of which information as to numbers of persons was obtainable, such information not being available in all cases.

SUMMARY of Table IV. showing Numbers of Persons engaged in Successful or Unsuccessful Strikes so far as they have been ascertained.

	Number of Strikes.	Number in which Details of the Persons affected have been obtained.	Number of Persons.
Successful strikes - - - -	476	304	93,524

Strikes in which particulars of the result are not known.	94	32	10,528
	1,145	781	322,000

In respect to the modes of settlement of disputes it almost goes without saying that after a strike has commenced, unless either of the parties is entirely defeated, the most common mode of arriving at an understanding is conciliation. The parties to the dispute meet of themselves, or are brought together by the intervention of a third party. They talk over their differences, conditions of peace are arranged, and the dispute is ended. This is the way in which the vast majority of strikes are settled, and therefore it is not surprising to find that 62·3 of the strikes recorded were settled by this mode. The inevitable reflection arises that most of these stoppages of work might have been avoided entirely if [energetic attempts at conciliation had preceded rather than followed the outbreak of actual hostilities. Arbitration as a mode of settlement was resorted to in 4·2 per cent. of the cases, and there was defeat and absolute submission of workpeople in 12·2 per cent.

In 4·3 per cent. of the cases the workpeople who struck were replaced by others, and in 1·8 per cent. there was a partial submission of strikers and a partial replacement by others. 3·3 per cent. were settled by combined submission and conciliation, and 3·5 were arranged by a blending of conciliation and replacement of other hands. In 8·4 per cent. there are no details as to modes of settlement. The complete analysis is as follows :—

MODE OF SETTLEMENT OF STRIKES.

In a previous table it has been shown what is the number of persons that were directly or indirectly thrown out of work by strikes in those cases where the failure or success of the strike was also known, but the question of the numbers affected by all strikes, apart from their success or failure as far as ascertained, is a separate one, and may be considered in connexion with the length of the period for which those affected were thrown out of work. On this head again it has not been possible in all cases to obtain information, although it is known that a strike took place. The following, however, is an analysis on this head of the returns as to those strikes where the information has been given.

NUMBER of PERSONS affected by all STRIKES as far as ascertained.

[NOTE.—It will be observed that the figures in this summary of Table II. are not the same as those in the table on page 31, and attention is particularly called to the fact that the summary on page 31 deals with the persons affected by certain strikes only, viz., those where it is known whether they were successful or unsuccessful, whereas the present table deals with all strikes where the numbers affected are known.]

	Number of Strikes.	Number of Persons.
Total number of strikes of which particulars of the numbers of people affected have been obtained, together with the numbers affected :—		
Directly affected - - - - -	930	282,938
Indirectly " - - - - -	—	61,902
Grand total of persons affected* - - -	—	344,840
Number of persons who refused to go on strike - - -	-	- 9,505

* "Persons affected" means persons thrown out of work, whether actually striking or not.

DURATION OF STRIKES.

	Number of Strikes.	Aggregate Days Duration.	Average Duration of each Strike. Days.
Total duration of strikes of which the exact commencing and terminating dates are known.	840	15,100	18

DURATION AND NUMBERS OF PERSONS.

	Number of Strikes.	Days Duration.	Average Duration of each Strike. Days.	Persons affected.
Total duration and number of persons affected in strikes of which particulars of the exact duration and also of the numbers affected have been obtained.	597	11,136	18·6	200,527

It will be observed that the average duration of a strike for each person engaged is not here quoted, but it can easily be calculated from the particulars in the appendix, and will not apparently differ very much from the average duration of each strike itself. The amount of loss sustained by the parties concerned in strikes is but faintly indicated in the following summary of the amounts of certain elements of loss sustained in such cases as have had full particulars supplied. A small proportion only of the forms returned contain full information on these points, but even from this small proportion some idea may be gathered of the general amount of direct loss inflicted upon both the interests involved:—

SUMMARY of Particulars extracted from Returns received from Employers:

	Number of Strike Returns received from which Informa- tion has been extracted.	Amount.
Weekly wages earned by those—		£ s. d.

Number of persons going into work during strikes	199	—	11,718

GENERAL SUMMARY.

So far as can be gathered from the sources of information available, there were strikes during 1889 in 3,164 establishments. In many cases, however, a considerable number of establishments formed units in a general strike and sent no information. In those instances a large number of establishments are counted in the tables annexed as only one strike, but wherever full details were obtained of separate establishments engaged in a general strike each establishment is taken as a strike. This mode of enumeration leaves a total of 1,145 strikes more or less fully accounted for. Of these 19½ per cent. were in the textile trades, 9·7 per cent. were among miners, 9·34 were in the shipbuilding trades, 8·5 were in the different branches of the engineering trade, 7·5 were among dock and wharf labourers, while seamen and firemen were responsible for nearly 4 per cent. These six branches of trade have, therefore, furnished nearly 60 per cent. of the whole of the strikes of 1889. As to their local apportionment, it is to be said that 71 per cent. took place in England, 4·6 per cent. in Wales, 21·5 per cent. in Scotland, and 2·9 per cent. in Ireland.

As in 1888, and due to the same reason, a rising labour market, the larger proportion of strikes was due to claims for advanced wages, not less than 67 per cent. of all the strikes being due to this cause, although some of them had other points of dispute also involved. Of those for advances of wages, 48·3 per cent. were successful. The proportion of those partially successful was 31·5 per cent., 10·7 were not at all successful, and results were unknown in the balance of cases.

Against reductions of wages there were but 45 strikes, of which just over one-fourth were successful, 8 were partially successful, and 20 entirely unsuccessful.

There were 139 strikes which had their origin in a general dissatisfaction with the existing conditions of labour, and of these 47·9 succeeded, 19·7 partially succeeded, 30·2 had no success, and results were unknown in the balance of cases.

The sympathetic strike, though not absolutely new to British industrial struggles, has never been so strongly in evidence before, and no less than 20 strikes are recorded as being due to the sympathy of one body of workers not directly involved in the dispute for those directly engaged. Of these it is difficult to summarise the results, and it is best to assume that the sympathetic strike would succeed or fail in accordance with the result of the main strike.

It is unnecessary to further analyse results in special classes of strikes, and all that need be said is that of the total of 1,145 strikes with which the following tables deal, 41·6 per cent. were entirely successful, 32·1 per cent. were partially successful, 18·1 per cent. were unattended with any degree of success, and of 8·2 the results were not ascertained.

The relative numbers of persons engaged in successful or unsuccessful strikes is a point of some importance. The returns show that in 304 strikes which succeeded, 93,524 persons were concerned, while in 272 partially successful strikes there were 175,476 involved. The number of persons engaged in 171 strikes which did not succeed was 40,472.

Modes of settlement cannot be indicated very definitely, but so far as they can be divided and classified it appears that in 62·3 per cent. of the whole number of disputes conciliation was the means by which terms of peace were arranged. In 4·2 of the cases arbitration after conciliation was the final mode of arrangement, but in 12·2 per cent. there was defeat and absolute submission of the workers. In 4·3 per cent. of the strikes those who came out were replaced by new hands. The balance of strikes were settled by various combinations of the above methods.

So far as the numbers of persons engaged in strikes are concerned, and the duration of the strikes, the returns are not complete, but yet deal with a considerable number of cases. Thus for 930 strikes, of which those details are furnished there were involved directly no less than 282,938 persons, while indirectly 61,902 were affected, there being thus a grand total of 344,840 persons concerned in 930 strikes. The number of persons who refused to leave work in the establishments in which those strikes took place was 9,505.

Of 840 strikes, details as to duration were furnished, the aggregate number of days lost being 15,100.

Unfortunately the number of persons affected is not given in all these cases, and, therefore, to obtain a more definite basis for a general estimate as to loss of wages sustained by strikers a less number of cases must be taken,

There were 597 strikes of which there are details furnished both as to persons affected and duration. The number of persons affected was 200,527, and the aggregate numbers of days duration was 11,136. There was thus an average duration per strike of 18·6 days, which represents very nearly, it is believed, the average time lost by each individual striker. There is thus an aggregate loss sustained of 3,730,000 working days. Assuming that the average wage rate in these cases is 3s. 6d. per day, and this is by no means an extravagant estimate, but is reasonable and well within bounds, there would be an aggregate loss in wages for these 597 strikes of not less than 652,000l., whilst the loss to each individual would be a little over 3l. 5s. This result corresponds very nearly to the loss per head shown in the report on strikes for the previous year. With so large a number of cases to deal with there can be little doubt that the calculation and estimate here made represent with reasonable accuracy the general economic conditions presented in respect to the whole of the 930 cases in which there are given the numbers of persons affected. Estimated on this basis the loss for the 344,840 persons therein engaged would be not less than 1,122,500l.

This estimate it is impossible to check by more definite evidence, as the wages loss sustained is only stated in a very small proportion of cases by either employers or trade unions. In 433 strikes it is known from the returns of employers that the actual weekly loss of wages was 136,283l. In 216 instances it is shown by employers whose men have been on strike that the value of fixed capital laid idle was 14,450,962l.; while in 169 instances the rateable value of property laid idle was 268,684l. In 233 strikes the estimated outlay caused for laying down and re-opening the works on strike was 169,219l. In 10 cases it is admitted that 6,517l. was paid by organisations of employers in support of firms whose men were on strike.

On the other hand, the returns sent in by trade unions show that in 369 strikes the amount expended in support of the men by strike committees or trade unions was 63,636l.

The trade union returns also show that in 446 strikes the weekly wages earned before the stoppages amounted in the aggregate to 153,504l., while the estimated loss of wages in 292 of these strikes was 294,175l. In 349 strikes the number of trade unionists who came out was 113,047 and of non-unionists 42,530.

There were during the year 66 lock-outs of workers involving 15,057 people, and of these full details will be found in one of the succeeding tables.

† Includes payment to strikers. (See 1011 and 1012, Table VI.)

APPENDIX II.

GENERAL OBSERVATIONS upon the STRIKES and LOCK-OUTS in the preceding Tables, based upon or quoted from the STATEMENTS of EMPLOYERS and EMPLOYED.

1. The union representative in this case observes that this is the only strike in his trade since 1873.

2 to 18. The employers complain of the damage caused to perishable goods, such as malt in course of preparation, through the men being allowed to strike without, or at very short, notice.

The men's representative wishes for more labour representation in Parliament.

20 and 21. The strike in these two establishments was followed by a lock-out in seven others, the result of the following notice :—

“NOTICE TO BASS DRESSERS.

“We, the undersigned employers, hereby give notice that on and after August 3rd, 1889, ours not being society shops, we shall cease to employ any members belonging to the Bass Dressers' Trade Union Society.”

The following report and balance sheet shows an attempt at co-operative trading, as a result of this strike and lock-out.

“THE CO-OPERATIVE BASS DRESSERS, LIMITED.

“FIRST REPORT AND BALANCE SHEET—October 7th to December 31st, 1889.

“COMMITTEE'S REPORT.

“FELLOW MEMBERS,

“In presenting the First Report and Balance Sheet the Committee wish to place on record the circumstances under which the Co-operative Bass Dressers formed their Society. They are briefly as follows :—The formation of a trade union, a lock-out by the masters designed to destroy the Union, and the establishment of a co-operative workshop by the men locked out. When the co-operative society was formed the masters re-opened their shops to society men at an increased wage. After being out of work for nine weeks it was quite impossible for the bass dressers to raise the necessary capital to equip their own workshop, but they did what they could, and many friends, for whose confidence we take the first opportunity of expressing our gratitude, took up shares. This original capital we shall hope to see gradually replaced by the savings of men in the trade. We shall only be carrying out the wishes of our members in thanking the Co-operative Aid Association for their help from the commencement. The Press, and several of the East End London Clubs, did us good service also.

"Turning to the result of the ten weeks' working, a full statement of the accounts will be found in the Balance Sheet. The profit amounts to 32*l.* 2*s.* 8*d.*, which, after paying all expenses, placing 7*l.* 11*s.* 6*d.* to reserve, paying interest, and making the grants required by the rules (see Profit and Loss Account), will admit of a dividend of 1*s.* in the £ on workers' wages, and 3*d.* in the £ on purchases. Considering the difficulties which our Society, like every other new concern, has had to master at the outset, we think that this result indicates a satisfactory state of things, and warrants a hopeful view of the future.

"When we started work late in the autumn, it seemed most unlikely that we should do more than go on quietly with half-a-dozen men for some time to come, but at the end of 1889 we find our business first but one in importance in the trade, and there is work enough to employ nearly twenty people. This result is due to the fact that everyone in the shop does his work cheerfully and well. More wages might have been earned if the work had been scamped, but we have gained and retained our customers, and made our position by taking the utmost pains to turn out goods of first-rate quality.

"In conclusion we should not be giving a fair estimate of our position if we left out of sight the close connection which exists between our Society and the Bass Dressers' Union. The co-operators are trade unionists, and two-thirds of the unionists are co-operators. But for the Union this Society would not have existed, and its prospects are in our opinion doubly hopeful, because unionists and co-operators are pulling together.

"Yours fraternally,
"THE COMMITTEE.

"BALANCE SHEET from commencement of Society to December 31st, 1889.

"We hereby certify that we have examined the books and vouchers of the Co-operative Bass Dressers, Limited, and that the above is a true statement of the Society's position.

"J. J. DENT (*Member of Central Co-operative Board*),
 "VAUGHAN NASH (*Member of Co-operative Aid Association*), } AUDITORS."

31. Employer states that in the building trade it is the best policy for a contractor, if he consults his pocket only, to give the advance asked (in cases where employers are not united), and so to pick the market and get the best workmen.

33. Employers say, "We paid wages at the higher rate and got better men."

34. The local code of rules adopted by the bricklayers and their employers at Newcastle is as follows:—

" OPERATIVE BRICKLAYERS' SOCIETY,
 " Newcastle Branch.

" LOCAL CODE OF RULES.

" I.—WAGES.

" That the current rate of wages for bricklayers be $8\frac{1}{2}d.$ per hour all the year round.

" II.—WORKING HOURS.

" From the 1st of March to the 31st October, both days inclusive, work shall commence at 6.30 a.m. and cease at 5 p.m., and from the 1st of November to the 1st of December, both days inclusive, work shall commence at 7 a.m. and cease at 4.30 p.m., and from the 2nd of December to the 31st of January, both days inclusive, work shall commence at 7.30 a.m. and cease at 4.30 p.m., and from the 1st of February to the last day of February, both days inclusive, work shall commence at 7 a.m. and cease at 4.30 p.m. On Saturdays work shall cease at 12 noon.

" III.—STARTING TIME.

" The starting times to be 6.30 a.m., 7 a.m., 8.30 a.m., and 1 p.m.; and from the 2nd of December till the 31st of January, both days inclusive, the starting time to be 7.30 a.m., 8.30 a.m., and 12.30 p.m.

“ IV.—MEAL HOURS.

“ That there be a half-hour for breakfast, from 8 a.m. to 8.30 a.m., and one hour for dinner, from 12 noon to 1 p.m.; and from the 2nd of December to the 31st of January there be a half-hour for breakfast, from 8 a.m. to 8.30 a.m., and a half-hour for dinner, from 12 noon to 12.30 p.m.

“ V.—OVERTIME.

“ That no overtime be worked except in cases of necessity, when time and a quarter shall be paid for the first two hours, and time and a half afterwards, and double time on Sundays, Christmas Day, and Good Friday.

“ VI.—MESS HOUSES.

“ That mess houses be provided on all jobs where necessary and convenient.

“ VII.—PAYMENT OF WAGES.

“ That employers commence paying wages not later than 12.15 p.m. on the Saturday of each week, and all jobs exceeding one mile from the pay office to be allowed walking time, or paid on the works; and any workman being detained until 1 p.m. shall be paid one hour, and double time for all time kept waiting after such time.

“ VIII.—ALTERATION OF RULES.

“ In case of employer or employed wishing to make any alteration in the foregoing rules, six months' notice to be given on either side, stating the nature of such alteration. Such notice to expire between the 1st of April and the 31st of October.

“ IX.—DEFINITION OF DISTRICT.

“ The foregoing rules to be enforced within three miles and a half from the Central Station.

“ X.

“ On workmen being discharged, such workmen to receive notice on the job.

“ XI.

“ That these rules be equally binding between employers and employed.”

55 and 56. The Recorder, who in this case acted as arbitrator, says:—“ It strikes me that the only remedy for these strikes would be the appointment of some tribunal, say on the lines of the Railway Commission, for arbitrating as occasion arose between masters and men. This again would seem to require the creation of some representative body or committee as well of employers as of employed.”

67. Employers in this case observe:—“ We do not object to combination among workmen, but think some limit should be placed upon the actions of trade union leaders, and the paid representatives of such unions, these men frequently calling during meal times, endeavouring to raise trade troubles where none would otherwise exist.”

69. The employers make the following observations with reference to the navigation of the River Thames :—

“ We wish particularly to request that a Bill may be immediately brought before Parliament for the abolition of Waterman’s Hall, and the throwing open of the navigation of the river.

“ That liability for damage be thrown on the *owners* of all craft instead of on the pilots.

“ That lighters may be towed in the River Thames without owners being compelled to employ lightermen for each craft.

“ The staff on board tug and one man to be reckoned as sufficient.

“ Six lighters as at present to be allowed to each tug while towing. While owners now have to employ a man to each lighter they are useless, as they generally congregate on one craft, and frequently are all in a cabin together.

“ The real occupation of a lighterman is in a great measure gone, as their work is done by steam while the men simply look on.

“ By throwing the river open we shall have the opportunity to employ more competent men, and by giving owners of craft the chance of securing good men, the risks of accidents will be decreased, and if the owners were made liable they would not select those who now navigate recklessly, regardless of the laws of the port.

70. Employers observe :—“ The increased wage is no benefit to the workman. Our experience is that the extra all goes in drink, that the men are therefore unable to do as much work as they used to, and, as a fact, do not earn as much as they did before.”

86. Employers suggest that no change in the general rate of wages should be permitted without 12 or at least 6 months’ notice, so as not to upset contracts in hand, and that picketing or intimidation should not be allowed.

95. Employers decline to offer suggestions for settling labour disputes, observing that “ No men will keep to an arrangement that is contrary to their views; they denounce their old leaders and elect new.”

104. Employers state that the men had a grudge against the foreman, whom they desired to boycott by leaving work.

110. Employer states :—“ Most of my men were frightened on account of a number of union men being stationed at various points where they had to pass to go home. I let them pass through my private entrance, and even then they went to the men’s private homes, and in some cases very much upset and frightened their wives. I think a law should be passed to prevent this. The law is to summon them for intimidation, but if this had been done the one who did it would have got killed.”

117, 118, and 119. No details of the duration and result of these strikes could be obtained.

121. Employers suggest that men on strike should not be permitted to stand about outside works, preventing by their presence men who are willing to work.

124. The question in dispute in this case was as to the number of apprentices to be employed; employer put his limit at 50, no matter how many men he might employ, but the union desired one apprentice to every five men.

Employer states that unions are very arbitrary, and put restrictions on in a small town which they would not dare to do in a large manufacturing town. He suggests that employers should form central manufacturing depôts, each subscriber supplying it with a certain amount of work, and in the event of strikes in any of the members’ establishments supplies of men could be obtained therefrom.

127. In this case the employers removed their manufactory to a neighbouring locality, thus placing themselves outside the influence of the union.

136 to 140. No account received from trade union source, but the report of the society states that 3,000*l.* was expended in support of the men on strike.

Secretary to the employers' association states that "many more would have remained at work but for the intimidation by their fellow-workmen, such a system of intimidation as the ordinary law was unable to grapple with."

150. Employer states that many of his female workers only work about five hours per day, and that only for four days per week.

150 to 154. The organiser of the workers in this case observes:—"A union has been formed as a result of the strike, but I doubt its stability, having in view the extremely helpless position of the women."

157. The men's representative observes:—"We had a board of arbitration, but we found it unworkable."

158. The employers state that through these men leaving their work unfinished, they were obliged to look to the Continent, where labour is cheap, the result being the introduction of a commodity superior in many respects, and which will gradually reduce the demand for that on which the strikers were engaged.

159. Employer "would like to see all unions amalgamated, and controlled by a central council of really responsible men, who should sift the causes of dispute in a given case, and define the action of the would-be-strikers or those who would lock-out. The unions should be controlled by definite laws."

159 to 161. Union secretary suggests that in all cases of disputes the mediators between masters and men should be men of technical knowledge and experience, who could bring about an effective pacification. The following is the balance sheet published by the Strike Committee:—

" BALANCE SHEET of the GREAT STRIKE of EAST LONDON TAILORS,

" For 10½ hours per day.

" Extending from August 27th to October 2nd, 1889.

" Introductory Note by the Secretary on behalf of the Strike Committee.

"In presenting this Sheet before the attention of the public, we beg to take the opportunity of offering our heartiest thanks to all sympathisers who so readily and freely responded to our appeal for help, and more so to those who did not even wait for our appeal. And while, considering the importance of monetary assistance in such critical times to save the struggling soldiers from bending before the whip of starvation, we express our utmost appreciation at the way in which sympathisers of all grades, rich and poor, labourers and manufacturers, subscribed to our funds, we cannot refrain from emphasizing with great pleasure the fact that the readiness and fraternal spirit shown to us by the various Trade Organizations and other English Working Men's Bodies armed us with a most effective weapon to carry the fight to victory. We only hope that our brethren all over the Globe will not fail to take a grand lesson of solidarity from the Dock Labourers' Strike, as well as from this of the Tailors and of others, which will mark a new and splendid epoch in the history of Labour; a lesson that will lead the workers of all countries to their complete emancipation and real happiness.

164. The following balance sheet was issued by the committee in conduct of this strike :—

“LEEDS TAILORESSES’ STRIKE FUND.

“TO OUR SUPPORTERS.

“Ladies and Gentlemen,

“After a long delay, arising through unavoidable circumstances, it gives us the sincerest pleasure to send round this balance sheet, since it brings vividly to our minds how deeply we are indebted to you all for your most generous help during the time of the tailoresses’ strike.

“Without such help the struggle could never have been continued; without such help the women’s union would never have been begun.

“The union is now growing steadily, and it will never forget that it owes its existence to the noble manner in which you came forward and supported the tailoresses in their hour of need.

“ISABELLA O. FORD;

“Hon. Sec. to Tailoresses’ Strike Committee.

“JOHN BUNE,

“Sec. Leeds Trade Council.

“THE LEEDS TAILORESSES’ STRIKE FUND.

“THE TREASURER IN ACCOUNT.

“Examined and found correct, April 2nd, 1890.

“2, Park Row, Leeds.

W. J. BLACKBURN.”

168. The union secretary, in suggesting “mutual conference and arbitration” as a means of settling labour disputes, says :—“The executive of the association attempted a settlement by the first-mentioned method, but as the employers thought that seeing it was the dull season they would break up the union altogether, it was then a struggle for existence.”

171. Employers’ representative, in estimating loss occasioned by this strike, says it was caused by—(1.) Neglect of workmen during week of notice prior to strike. (2.) Inefficiency of substitutes. (3.) Cost of providing food and sleeping accommodation upon the works for substitutes, to avoid attacks by strikers. (4.) Diminished sale of gas during strike. (5.) Police protection.

173. The men's representative describes the 40 men who went into work during the strike as being "forced from other departments of the Corporation."

174. The following newspaper extract refers to the cause of the Manchester Gas Strike.

"WORK AND WAGES.

"THE MANCHESTER AND SALFORD GAS STOKERS.

"IMPORTANT NOTICE by the MANCHESTER COMMITTEE.

"At a special meeting of the Gas Special Sub-committee of the Manchester Corporation, yesterday, it was resolved that the following notice should be posted at each of the gasworks in the city:—'Notice.—The Gas Committee hereby intimate to those workmen in their employment who have given notice to terminate their engagement in 14 days, that unless such notices are withdrawn on or before Friday, the 29th instant, steps will be taken to supply their places.'

"It was also resolved that the following notice be printed and posted on the walls of the city and gas-consuming districts:—'City of Manchester.—The Gas Committee beg to inform the public that they have received the following notice from stokers and others in their employ, of their intention to leave work in 14 days, viz.:—"I hereby tender to you 14 days' notice from to-day, 21st November, in consequence of a dispute having arisen between the Manchester Gas Committee and our union." The dispute has arisen in consequence of the following demand from the men, viz.:—"We object to working with those men who persistingly refused to join our union; this is a matter that ought to be settled at the present time, as it will save a lot of trouble." At a special meeting of the Gas Committee, held on the 18th November, it was resolved unanimously:—"That every man who faithfully does his duty and the work for which he is paid, so long as his services are required by the Gas Committee, shall have perfect freedom to continue his employment, and shall be protected in the discharge of his duties." The committee are anxious to make known that all the previous demands of the men for shorter hours, less work, and increased wages were granted on the 1st inst. The statements of terms were signed by representatives of the men on behalf of themselves and colleagues. The committee desire to point out to the citizens and gas consumers generally that the action now taken by the men in Manchester is an attempt to interfere with the freedom of action of their fellow working men, and if persisted in will cause considerable loss and inconvenience to the public. The committee therefore claim the support of all right-minded men in this crisis, and appeal to the gas consumers to use the gas as economically as possible, and to make temporary provision for lighting their premises, as it is probable that the usual supply of gas will have to be curtailed."

The following extract is founded on the annual account of the Gas Committee, and refers to the cost of the strike:—

"On referring to the accounts we find that the direct expenditure on the strike which took place at the gasworks last winter is set down at 8,521*l.* 5*s.* 2*d.* But to that there must be added certain indirect expenditure. For one thing, the consumption of gas, which had been going on steadily increasing for many years, appears to have received a severe check, in consequence of the curtailment of the supply which the strike necessitated. Another cause of indirect expenditure (attributed partially to the condition in which the old stokers left the retorts and partially to the inefficiency for a time of the new stokers who were engaged) has been the diminution in the quantity of gas got from each ton of coal and cannel carbonised during the year. Altogether, the strike appears to have cost the city close upon 20,000*l.* The 30,000*l.* which the committee have paid in relief of the city rates, in accordance with the estimates framed at the beginning of the year, has therefore not been earned, and the payment of it has involved the committee in a considerable deficiency. In order that this deficiency may be made good, only 10,000*l.* will be paid in relief of the rates in the year now current, and the rates will have to be raised in order to obtain the additional 20,000*l.* which in ordinary circumstances the Gas Committee would have furnished."

177. The following newspaper extract shows the amount paid in support of the strikers in this case :—

“ The accounts certified by Mr. H. W. Wilson, chartered accountant, show that there was paid to strikers, 1,190*l.*; to pickets, 79*l.*; to committee men and delegates, 120*l.*; for secretary's salary and expenses, 29*l.*; for bands, 12*l.*; travelling, 30*l.* The whole expenditure was 2,342*l.* 2*s.* 3*d.* There was received from trades unions and other sources 1,185*l.* 5*s.* 2*d.*, and remittances, by letter, from factories and workshops, 1,137*l.* 16*s.* 2*d.*”

178. The men in this case eventually got an equivalent to an advance of 10 per cent.

179. The employer, with reference to the settlement in this particular case, and also in other cases observes :—

“ *Mode of Settlement.*—As soon as our men did not turn up to work on the afternoon of the 4th, we sent our Mr. ——— to Belgium for foreign labour, not so much for the purpose of getting same, but to frighten our men, and we also immediately issued summonses against them for neglect of work.

“ By our rules each man in the factory when he starts work leaves one week's ‘lying-time,’ *i.e.*, he works his first week for nothing, and if he leaves without notice he forfeits one month's wages. On the 6th (Saturday) all the men came up for their wages, and there was 211*l.* due to them. We informed them that every man had forfeited his money, and paid them nothing. Two hours afterwards they sent a deputation to see if they could not smooth matters over. We gave them our conditions, which were as follows :—

“ 1. Every man had forfeited his money by discharging himself without notice.

“ 2. As regards the three men who were discharged for disobedience, we would give no promise of re-instatement, but on receipt of a letter of apology from each of them, would consider whether we would allow them to start again after a decent interval.

“ 3. Each man would have to come personally and apply for work again under a fresh contract.

“ The men came in on these terms on the Monday night; we read over a copy of the rules to each man, and he assented to them, and we started work again on the Tuesday.

“ This is our individual case, but so far as suggesting means for settling or preventing labour disputes, so much, of course, depends upon the circumstances of each individual case, and whether the men are cemented together by a trades union.

“ Speaking generally, however, we think that so far as preventing strikes is concerned, a kindly feeling between master and man is a great factor to this end. For our own part we always cultivate such a feeling, and treat our men as human beings and not as brutes.

“ Another great factor in preventing strikes is regular work. We always try, even in the worst of times, to keep our men in full work, and many a time during winter when we thought it advisable to close a house, we have not done so on account of throwing the men out of work. But, although we are always considerate with our men, yet we preserve our authority over them to the utmost, and deal very stringently with cases of drunkenness or insubordination.

“ With regard to wages questions, we always endeavour to deal fairly with our men, and we never make false statements with regard to our inability to raise their wages, and our men trust our word, and if we show them fairly that we cannot give an advance, they do not come out. We, only two months ago, settled a question of a 10 per cent. advance all round by showing them facts and figures which were undeniable, and what is more they had the good sense to accept them as such.

“ When there is a trades union in question, as in our trade, we always endeavour to work harmoniously with it, treating it with courtesy, but never delegating any of our authority to it. Perhaps another factor in the prevention of strikes is this, we are continually amongst our men and work as hard and as long as they do, and by this means the men see that it is a sort of co-operative arrangement and are loth to strike except for very good cause.

“ Lastly, when you gain a victory over the men do not be vindictive, for if you are they will remember it when they get the ‘whiphand’; bury the hatchet and let bygones be bygones, and you can afford to do so, for every time that the men are defeated weakens them in the future.”

182. The employers in this case state :—" We have an equal objection to arbitrators or boards of conciliation, holding the opinion strongly that questions of work and wages between employer and employed are better settled without interference from outside, as those concerned must know their own business best, and may be trusted to come to a mutually satisfactory understanding.

" We consider trade unions to be injurious to the trade of the country and to the interests of the workers themselves. The assertion by agitators of the right to decide who shall and who shall not be employed, and at what rate wages shall be paid, deters capitalists from embarking their money in industrial undertakings, with the result that business is impeded, trade is driven out of the country, and the number of the unemployed is increased.

" Trade unions and strikes *without* coercion and intimidation would lose their power, as the places of the strikers would readily be filled, and for strike purposes the union would probably cease to have any appreciable influence."

196. Employers state that, in addition to the 500*l.* given as the estimated actual outlay the loss of production of pig iron and deterioration of iron actually in furnaces represented a further loss of 4,250*l.* They decline to make any suggestions for preventing and settling labour disputes, observing :—" The law as to breach of contract on the part of the workmen is so slow in its operation, and so clumsy to put in action as to be absolutely valueless. Our experience is, that a contract between employer and workman is only binding as against the employer. Owing to the state of the law the workman is, to all intents and purposes, absolutely free."

200. This dispute appears to have been caused by the men breaking away from the award and sliding scale settled by arbitration subsequent to the strike in September 1888.

204. The union secretary states that on behalf of the men arbitration was offered at the beginning of the strike, but refused.

205. The employers appear to have entertained objections to union men, and refused to allow any of their men to join the union, dismissing some on suspicion of having joined. The men's representative states that sub-contracting prevails here to a large extent.

211. Employers state that at the time of the strike they were working on old contracts taken in bad times in order to keep the men together and find them employment, and the strike was caused by the men refusing to work at the prices under which these contracts were obtained.

214 and 215. The secretary to the men's union recommends a compact trade organisation, observing :—" This we believe to be the only true remedy, as for years we have generally found it to work in the interest of both employers and employed, and to-day the feeling with employer and workmen is good, through labour speaking with one voice."

244. The union official states that the employers in this case would not accept the memorial of the men for an advance in wages, nor would they receive a deputation.

282. Employers recommend the co-operative principle as a means of preventing labour disputes, observing :—" Investment in some form in the business where employed we believe to be very important for its success, and in educating workmen how practically to improve their position. We think if the trade unions would turn their attention to co-operative production by ordinary employers they might help to further a good cause."

291. The employer, in reply to the request for suggestions as to means of preventing or settling labour disputes, observes :—" Passes the wit of man."

294 to 299. Union secretary observes :—" As a rule we have been able to settle all grievances by board meeting with the employers, much to be preferred to that of men meeting their employers; this is not only our opinion, but that of the employers also. For the last 15 years all matters in dispute have been rectified by general secretary and a small deputation of the executive committee, this we have found to work well."

301. The union secretary, in recommending arbitration as a means of settling labour disputes, observes :—" But I often see that the arbitrator sides with the heavy purse."

304. This was a strike of men engaged in the manufacture of patent flues. A union official who supplied the information mentions that three of these flues used to be considered a week's work (piece-work), the smith who made them being assisted by three strikers at 36s. per week each, and one helper at 24s. With improved methods the turn-out increased to seven per week, and then Monday and Saturday being regarded by the smiths as "play" days the production became five flues in four days. The average payment per flue is 57s., meaning 14l. 5s. per squad for five days' work. Of this the smith takes 9l. 15s., and the strikers and helper receive their day wages of 6s. and 4s. 6d. per day, amounting to 4l. 10s.

306 to 314. This strike was against the wish of the men's society. One of the employers concerned observes:—"This strike was most unwarrantable, as the Tees and Hartlepool employers offered the men the same advance as had been conceded by the Tyne and Wear shipbuilders, and accepted by the men, who are members of the same trade union as the Tees men. The Tees and Hartlepool men acted in direct opposition to their executive council, who repeatedly advised them to accept the terms already agreed upon by the Tyne and Wear."

338. Employer suggests that trade unions should allow employers to pay men in accordance with their abilities, instead of paying good and bad men alike. He observes:—"I have some men worth 20 per cent. more than others, yet I am obliged to pay a uniform rate."

376. This dispute between the joiners and shipwrights as to the limitation of work was settled by a meeting of representatives from both societies. A union official observes:—"The two trades are now working on the lines adopted, and a permanent joint committee is appointed to deal with all such cases in the future, and to avoid disputes."

388. The union representative, alluding to the state of the barge-building trade, observes:—"Twelve or 14 years back we did not know what it was to have anyone in our trade out of employment except for a few days at the most, but since iron barges have been introduced we are always quiet for about four months in the year, from December to about April. Where the employers will allow our hands to build iron barges we do so, but some firms employ boilermakers and iron shipbuilders, although their wages are higher than ours."

402. The Boilermakers and Iron Shipbuilders' Society brought very strong pressure to bear upon the employers in this case, by boycotting in every port in the United Kingdom every ship built or repaired by them. A compromise was eventually arrived at. The employers observe:—"Our loss has been more a loss of trade and connexion than anything else, owing to the boycotting of ships, and it is hard to estimate what it will cost us to regain our lost position. It has cost us in direct cash out of pocket expenses about 1,500l., and the loss of profit in trade which passed us, and the cost of picking up the lost threads, will mean at least double the amount in addition."

With reference to means of preventing and settling labour disputes they observe:—"To settle a dispute actually in existence we think the best plan is to have a small committee formed from the employés, as distinguished from any union or society, who should understand general business principles and the economics of their own trade in particular. The employers should meet such a committee in a thoroughly frank manner, and be prepared to produce sufficient data of their actual business transactions to show whether the request can reasonably be granted or not. Trades unions are very bad for good workmen, but splendid things for bad ones, as they are all levelled. There should be room for the best men to come to the top."

443. The employers observe with reference to the result of this strike:—"The advance in prices has considerably crippled trade, and many men in the bedstead trade have since the advance been working short time."

450. The suggestion of the employer is, "We consider employers should agree if possible amongst themselves upon a fixed price for selling their goods, and that this should include a reasonable amount of wages to workpeople, say enough to supply their necessary outlay, with a weekly surplus of 2s. 6d. at the least."

425-459. The trade union official who conducted this extensive strike observes as follows:—"The settlement of this dispute affords a striking instance of the efficacy of arbitration as a mode of ending strife between capital and labour. The bedstead dispute was the largest strike on record in this town. The aid of the

“ Mayor was invoked, who after some negotiations undertook to formulate the terms of reference. The County Court Judge consented to act as umpire, and two public gentlemen were selected as arbitrators. The employers’ case was presented by counsel, and that of the workmen by a trade union official. The court thus constituted sat on three occasions, the final award being 10 per cent. advance to be paid up to March 29th, 1890, and 15 per cent afterwards. The award was satisfactory to the workmen, and appeared to be equally so to the employers, who have, without exception, loyally carried it out.”

460. The employer observes :—“ I have found since my men had the rise that they are no better off, as I have less work done than before, accordingly bad trade only will, I think, prevent strikes, as the men work better then with less money.”

501. The employers observe :—“ A strike of the kind that occurred here can only be dealt with by brute force. A strike is an exhibition of brute force, and occasionally ought to be dealt with in this way. A strike on questions of wages or trade customs can be easily dealt with by arbitration if both sides have sufficient reasoning powers to see the advantage of this method of procedure, and will agree to abide honourably by the terms of settlement. I distinctly point to both sides in my remarks, for I have known cases where brute force commenced on the part of the employer. It seems impossible to get employers or employed to realise that their interests are identical. The growth of education will assist this matter very greatly.”

510. The employers suggest :—“ The establishment of a Labour Bureau or Commercial and Industrial Department to collect and publish information as regards home and foreign competition, hours of labour, wages paid, &c., would be a means of enlightening workmen upon important considerations of which they are ignorant, and prove of mutual benefit to employer and employed.”

520. The published balance sheet of this strike shows that 835*l.* was raised in support of this strike, 300*l.* being contributed by the Miners’ Association, and the remainder by various unions and public subscriptions.

Below are the suggested rules for a Board of Conciliation and Arbitration for the Cumberland Coal trade.

“ THE CUMBERLAND COAL TRADE.

“ SUGGESTED RULES FOR BOARD OF CONCILIATION AND ARBITRATION.

“ 1. The title of the board shall be ‘The Board of Conciliation and Arbitration for the Cumberland Coal Trade.’

“ 2. The object of the board shall be to consider and decide all questions affecting the interest of employers or employed connected with the collieries which join the board, especially with regard to wages.

“ 3. The board shall be composed in the manner herein-after set forth. It shall represent, in the first instance, the employers and the men employed at their collieries as follow :—The Whitehaven Colliery Company ; The Allerdale Coal Company, Limited ; The St. Helens Colliery and Brick Company, Limited ; The Flimby Colliery Company ; The Broughton Moor Coal Company ; The Maryport Hematite Iron & Steel Company, Limited ; Joseph Harris, Esq. ; The Moresby Coal Company, Limited ; The Owners of Dearham Colliery ; Messrs. James Bain & Co. ; and The Lonsdale Iron & Steel Company, Limited. If the employers and men at any colliery not connected with the board shall desire to join it, such desire shall be notified to the secretaries in writing, and signed by the representatives of the employers and men respectively, and by them shall be laid before the standing committee, who shall have power to admit such colliery to membership on being satisfied that the rules of the board have been or are about to be complied with.

“ 4. The board shall consist of one employer and one representative of the men from each pit joining the board. Where two or more collieries belong to the same proprietors each of the pits may claim to be represented at the board,

but the same employer may act for more than one pit, and give a vote in respect of each.

“ 5. The men employed at each pit shall elect a representative at a meeting to be held for that purpose on such day as may be appointed by the men, and the name of the representative elected and of the pit which he represents shall be forthwith sent to the secretaries. The representatives of the men so chosen are herein-after called ‘elected representatives.’

“ 6. If any elected representative dies or resigns, or terminates his connexion with the pit which he represents, a successor shall be chosen in a manner similar to that provided in the last clause for election of a representative.

“ 7. Elected representatives shall continue in office for one year from the date of election, and shall be eligible for re-election.

“ 8. The due election of a representative shall authorise him to act for the pit which has elected him, and the decision of a majority of the board, or in case of equality of votes, of the referee, shall be binding upon the employers and men of all collieries connected with the board.

“ 9. The secretaries shall convene a meeting of the board at any time when there is business to transact. The nature of the business for consideration at each meeting shall be set out in the circular calling the meeting, of which not less than three clear days’ notice shall be given. The time and place of all meetings shall be arranged by the secretaries when not fixed by the previous meeting.

“ 10. At the first meeting of the board in each year it shall elect a referee, a president (who shall be an employer), vice-president (who shall be an elected representative), and two secretaries, and they shall continue in office till the corresponding meeting of the following year, but shall be eligible for re-election. It shall at the same time appoint a standing committee in manner following: the employers shall nominate six of their number, including the president; and the elected representatives shall likewise appoint six of their number, including the vice-president.

“ The time and place of meeting of the standing committee shall be arranged by the secretaries, and it shall meet as often as business requires.

“ 11. All questions shall be submitted for investigation in writing, and shall in the first instance be referred to the standing committee. It shall consider and have power to settle all matters referred to it, except general rises or falls of wages, or the selection of an arbitrator empowered to fix a general rise or fall. The standing committee may require such evidence to be given by either party as it considers desirable. In case the standing committee cannot agree upon any question, it shall be submitted to the referee, whose decision shall be final. He also shall have power to require such evidence as he may deem necessary. Before any question is considered by the standing committee, a statement of the case, signed by either the employer or by the elected representative of the pit affected, or by both, shall be given to the secretaries.

“ 12. Three clear days’ notice shall be given by either secretary to the other of any subject to be brought before the standing committee, and the secretaries shall thereupon convene a meeting of the committee to be held within ten days of the date of the original notice.

“ 13. All votes shall be taken at the board or standing committee by show of hands, unless any member shall call for a ballot, in which case it shall be taken.

“ If at any meeting of the board the employer or elected representative of any pit shall be absent, the other representative of such pit shall not be entitled to vote.

“ 14. Questions of a general rise or fall of district wages shall be brought before the full board, and in case no agreement can be arrived at, a single arbitrator shall be appointed, and his decision shall be final and binding on all parties.

“ 15. The expenses of the board shall be divided equally between the employers and the elected representatives, but such expenses shall not include any payment for attendances or railway fares.

" 16. Should it be proved to the satisfaction of the standing committee that any member of the board uses his influence to endeavour to prevent the decisions of the board or of the standing committee being carried out, such member shall forthwith cease to be a representative.

" 17. Alterations or additions to these rules shall be made only at the first meeting of the board in each year, and notice of any proposed alterations or additions shall be given to the secretaries at least one calendar month before such meeting.

" The notice convening the annual meeting shall set out exactly any alteration or addition to be proposed.

" 18. The standing committee shall have power to make from time to time such byelaws for the regulation of their proceedings, or those of the board, or otherwise, as they may consider necessary, but all byelaws must be consistent with these rules.

" 19. The president shall preside over all meetings of the board, and of the standing committee, excepting where the referee or arbitrator is called in.

" In the absence of the president at any meeting a chairman shall be elected, but he shall not have a casting vote.

" 20. Either the employers or the elected representatives may give six months' notice to terminate the board, at the expiration of which time the board shall be dissolved.

" SUGGESTIONS made by Dr. SPENCE WATSON.

" It is well also for the board when formed to issue either with or without the rules, some statement such as the following:—

" When a subscriber to the board desires to ask its assistance, he must explain his grievance to the elected representative of the colliery at which he is employed. He should not do so before he has done his best to get the matter put right by his overman or by the manager himself.

" The elected representative when appealed to must look into the complaint so as to be satisfied that there is good *prima facie* ground for it, and he should, in company with the complainant, take an opportunity of laying the matter before the person who at the particular colliery is entrusted with settling such complaints. Care must be taken (unless in pressing cases) to do this at the time which the colliery manager appoints for considering complaints.

" It will be found that complaints fairly stated, and with the disposition to consider reasonable explanations, and to accept that which is fair and right, will generally be settled. If an agreement, however, is not come to, a short statement setting out the points in difference should be drawn out and signed by the employer representative and the elected representative and forwarded to the secretaries of the board, with a request that the standing committee should consider the matter.

" The standing committee will consider such complaints as soon after seven days from the receipt of the notice as may be, but the complainant will lose nothing by necessary delay, as all recommendations of the standing committee or decisions of the board will date back to the time of the complaint being sent in.

" It must be clearly understood that under no circumstances must there be a strike or suspension of work. The main object of the board is to prevent anything of the kind, and it will refuse to inquire into any matter in dispute where any strike or suspension of work does take place till work is resumed, and the fact of its having been interrupted will be taken into account in considering the question."

527. Employer observes:—"The discouragement by the public of trade union agitations would greatly reduce the inducements which now exist for men to strike."

546. This strike led to the pit being closed for four months, and in consequence of the then depressed state of trade the employers were not sorry to have the pit stopped. They observe:—"We altogether disapprove of arbitration."

561 to 571. One of the employers concerned in the strike in the Somersetshire coalfield observes:—"The matter was greatly aggravated by the refusal of the employers to acknowledge the Miners' Union and the union agent."

The men's representative, referring to the settlement in favour of the men, says:—"A change in the executive of the Employers' Association brought this state of things about."

573. The men's representative observes that the non-union men precipitated this strike when he was away from home, otherwise the matter might have been settled satisfactorily.

580. The settlement of this strike was that work was given to some of the lads whereby they might earn more wages. The employers observe:—"In many cases where this was done they asked to be allowed to go back to their former work at their former rate of wages."

631. The miners' agent observes that, in his experience strikes are always unsuccessful where there is a weak organisation, or none at all. He says:—"As far as I have seen, the employers are always unwilling to recognise a trade union or any third party between themselves and individual workmen if they think they will be successful in defeating the men; it is only when they are convinced this cannot be done that they will submit to mediation in any form."

651. Employer, in suggesting preventives of strikes says:—"Persuading men to break written contracts should be made illegal, and breach of such contracts should be punished by paying damages or imprisonment. The present law is, however, totally inadequate, as if an employer gets decree against a workman for damages he has no means of recovering same, for as a rule the man has nothing. There should, therefore, be the alternative of imprisonment, and this should be applicable equally against the employer if he does not pay damages."

The men's representative suggests as a means of settling labour disputes:—"A national board of arbitration, composed largely of men drawn from the labouring classes."

679 and 680. The employers, in suggesting arbitration by a responsible Board of Trade officer state further that, "Fourteen days' notice of a strike or lock-out should be submitted in order to give time for investigation whether one or other is justifiable."

684. The employers suggest the introduction of an Act of Parliament to crush trade unions, describing them as "one of the curses of the country."

681-712. The union secretary suggests that hours of labour should be regulated by Act of Parliament.

713. The representative of the employers says, with reference to the settlement that all hours over 60 per week should be paid for at the rate of time and a half:—"Few employers pay overtime, either the work is hurried or an extra hand (or hands) employed; but the system is working very unsatisfactorily, and appears to be likely to receive some modification at no very distant date."

725. The employers observe:—"We always insist now on complaints being put down in writing, and we show a readiness to listen to any complaint, and if any injustice is shown to be suffered by any, to remedy it as far as possible. Where demands are unjust or impracticable we at once say so, and firmly resist. By this way we have made many changes favourable to the men, and at the same time beyond costing more money, not injurious or detrimental to our interests.

"If men can be shown that you are willing to act fairly by them they have confidence, and it is much easier to settle disputes. Any attempts at taking advantage of men result in want of confidence and consequent difficulty in settling disputes."

729. The union secretary suggests that "employers should recognise the right of the workers to set a value on their labour, also their right to combine to protect the only commodity they have to sell."

733. The union secretary suggests that employers should be approached "never expecting to have it all your own way, and always keeping in sight the fact that capital is as essential to labour as labour is to capital." He says that the standard wage for seamen of 28s. per week in Hull is equal to the wages obtaining in any port in the kingdom, "as there is more home comfort, and other advantages not obtainable in other ports."

771. The representative of the employers says:—"Since the great strike, when these disputes arose in our trade, we have adopted the plan of appointing a committee of

“ six masters, inviting to our rooms six delegates of the men, for the purpose of discussing, and as far as possible adjusting matters in dispute. Our experience of agreeing to the appointment of an umpire has been unsatisfactory, and has left matters in a most confused condition, mainly arising from the fact that our business is so complicated in character that one unversed in its details is incapable of grasping the varying conditions and ever-changing circumstances in the time ordinarily allowed, or by the method commonly adopted in arbitration, and consequently cannot arrive at a just or even an intelligible decision.”

777. The employers' representative states with reference to the classification of the men concerned in this strike :—“ Whilst I am quite clear that they will come under the generic description of unskilled workmen, they must not largely be taken to be men without aptitude at the work in which they are experienced, and are of more value than entire strangers.”

779. The employers state that of the men engaged in the strike about 2,000—deal porters—“ may be considered as *skilled* labourers, being men of exceptional physique and special training.”

793. The employer in this case draws attention to one result of the prohibition by the Dockers' Union of men working under the union rate of wages, viz. :—“ that the men of 50 to 60 years of age, not being able to command that rate, young men being given the preference, are obliged to seek shelter in the workhouse.”

786 to 808. The leader of the men observes that conferences made the employers acquainted with the action of the “ gangers ” or middlemen, who had for years sweated the labour of the men. The action of these middlemen has been much discounted for the future by compelling them to become members of the Dockers' Union.

807. The employers observe :—“ At present the officials of the union have no power with the men when they advise them against their demands, and in favour of the masters.”

814 to 836. The union secretary calls attention to the working of the Employers' Liability Act as follows :—“ A great change is necessary in the Employers' Liability Act, the most urgent being to stop the employers running from the provisions of the Act by insurance, and further, the cost of starting an action is so very great. I have had over 100 cases of injury, some resulting from boy labour in place of men, but generally from defective machinery. An employer buys an old crane or gear that ought to have been in a marine store years previous; men work the machine, something gives way, and the man is precluded from work for many weeks. Employers and insurance companies vie with each other in delaying payment, and few pay until they receive a solicitor's letter.”

“ In my opinion the Public Prosecutor should be deputed to take cases of injury under Employers' Liability Act until such time as costs are materially lowered.”

870. The representative of the weavers desires that manufacturers in textile trades should be subject to the provisions of the Weights and Measures Act for tradesmen.

882. The employer observes :—“ This strike would certainly have been avoided if the hands had complained previous to striking.”

917. With reference to the cause of this strike, the employers observe :—“ The men repeatedly refused to give notice to their employers, as they did not consider their grievance a sufficient one, but on their suspension from their society by the secretary and council of the Cotton Spinners' Association they felt themselves compelled to do so rather than be expelled from their society.”

931. The employer suggests that strikes and lock-outs should be illegal until every reasonable means of settlement has been tried, as they are “ a very serious loss to employers in many ways, through cancelling of orders, besides actual fixed expenses and interest of money going on.”

952. The employers observe, with reference to the cause of this strike :—“ Common sense alone ought to be sufficient when exercised disinterestedly to settle such a question as this, as we cannot compete in the market with townspeople who are placed alongside railways, and who have all the other advantages which a country village four miles from a railway station cannot enjoy. And again, the country people are compensated to the extent of the differences claimed from their wages in cheaper rents, rates, taxes, and living altogether is much lower.”

957. The employers observe:—"We think there will always be strikes where trade is bad, and competition so keen as it has been of late years, as everybody has to keep on trying to produce cheaper, and they are bound to get into a mess sometimes. It so happened that our weavers wanted an advance when the Cotton Corner was on last year, and we had no orders, so it was really doing us a favour to strike, under the circumstances."

959. The weavers' secretary states:—"We strongly urged them to remain at work and enter the association, and when they came in benefit we would render them all the assistance in our power. The weavers having no means of support beyond public subscriptions became greatly reduced in circumstances; this, more than anything besides, led them to accept the offer of the firm."

968. The employer states, with reference to the cause of this dispute:—"This strike could not have occurred if the workpeople had seen either clothlooker, manager, or master, for they were misled by a lie."

986. This strike was denounced by the organ of the cotton trade operatives as follows:—

"One of the most ridiculous shapes that a strike can take was illustrated in Manchester a week ago. A disagreement had occurred between the manager and an overlooker of the ——— Mill Company, and the latter was discharged. Thereupon, without any warning, the whole of the weavers stopped their looms, thereby endangering the engine, and demanded the re-instatement of the overlooker. As to the merits of the dispute between the manager and overlooker we know nothing. But whatever it was it had nothing to do with the weavers. We never heard of an overlooker 'chucking' his shop up because a weaver was discharged, and he would be a fool if he did. The action is just as silly when the boot is on the other leg. It is well when overlookers and weavers can work amicably together, and it would be better if on wage and other questions affecting their interests they would pull together oftener than what they do. If a weaver had been discharged for backing up her fellow-workers' views we could have understood it, but we have not yet reached the point when operatives can select their own overlookers. This is not the first time such a thing has occurred, and it has always ended in a ridiculous farce. Such action does no good to any of the parties concerned, and only serves to give scoffers a handle by which to show up what they term the want of sense of the operative class."

The employers state:—As this was a strike on a "question of discipline, we do not believe it would have arisen if the hands had been trade unionists. The weavers in Manchester are a very foolish and unreasonable class, and will strike for nothing; the only remedy that we can see is better education."

995. The operatives' representative, in speaking of the position of the workers concerned in this dispute, says:—"There is no benefit society or institution of any kind. As an instance, an old woman after working 40 years in the place has recently had to give over work, and the employers on being applied to refused to give the slightest assistance to her. As a contrast, however, 300 of the ballers subscribe every month the sum of 1*d.* each, so as to allow her the sum of 6*s.* per week."

1000. The following are the rules of the Board of Conciliation formed as a result of this strike:—

"NEW RULES of the BOARD of CONCILIATION and REFERENCE for the LACE TRADE.

"As agreed to by Representatives of the Lace Manufacturers' Association and the Lace Makers' Society, September 5th, 1889.

"RULES.

"1. That a board of trade be formed, to be styled the 'Board of Conciliation and Reference for the Lace Trade.'

"2. That the object of the said board shall be to confer on any questions that may be referred to it from time to time, and to interpose its influence to put an end to any dispute that may arise. No question to be entertained unless the employés are at work.

"3. The board to consist of thirteen manufacturers and thirteen operatives, five of each to form a quorum, the manufacturers to elect six levers, four curtain, and three plain net representatives, and the operatives six levers, four curtain, and three plain net representatives. The manufacturers to be chosen by the Lace Manufacturers' Association, and the operatives by the Amalgamated Society of Operative Lace Makers. The whole of the delegates to serve for one year, and to be eligible for re-election. The new council to be elected in the month of January in each year.

"4. The decision of the board shall be binding on the parties to any dispute submitted by them.

"5. That a committee of inquiry elected by the board (consisting of four employers and four workmen, namely: two members of the levers' branch, one member of the curtain branch, and one member of the plain net branch on either side) shall inquire into any cases referred to it, such committee to use its influence in the settlement of disputes. If unable amicably to adjust the business referred to it, the case shall be submitted to a full board; but in no case shall the committee make any award. The committee to be appointed annually at the first meeting of the board.

"6. All cases of dispute which do not come within the province of the committee of inquiry, or which may have been submitted to the same without any recommendation for settlement being arrived at, shall be first sent to the section of the trade to which they refer, previously to being brought before the full board.

"Should the section fail to agree upon any recommendation for settlement of the question referred to it, it shall then be submitted to the full board, *but in no case shall any question in dispute be discussed by the section and full board for a longer period than one month before being voted upon, and in case of the numbers being equal, the question shall be dealt with under Rule 10.*

"In no case can any settlement be considered binding without the same being ratified by the full board, except such questions as are dealt with under the aforesaid Rule 10.

"7. That the board shall, at its first meeting in each year, elect a president, vice-president, treasurer, and two secretaries, who shall continue in office for one year, and be eligible for re-election.

"8. That the board shall meet for the transaction of business once a quarter, viz., the last Monday in January, April, July, and October; but on a requisition to the president, signed by three members of the board, specifying the nature of the business to be transacted, he shall, within fourteen days, convene a meeting of its members. The circular calling such meeting shall specify the nature of the business for consideration.

"9. Either party to any dispute shall forward a written statement of their case to the secretaries of the board, who shall call a meeting within seven days of receiving the same to consider the question.

"10. That the president shall preside over the meetings of the board, and in his absence the vice-president; in the absence of both president and vice-president a chairman shall be elected by the majority present. The chairman to have but one vote, and in case of numbers being equal, *the question in dispute shall be referred within fourteen days to two referees, one to be chosen by either side, who forthwith and before entering upon their duties shall appoint an assessor, whose decision (the referees not having agreed within seven days) shall be given within seven days.*

"That the assessor be present at all meetings of the referees, to obtain evidence on which to base his decision, if called upon. No evidence to be taken by the assessor except in the presence of the referees.

"*The decision of either the referees or the assessor shall be final and binding upon both parties.*

"11. That when at any meeting of the board the number of employers and workmen is unequal, all shall have the right of fully entering into the discussion of any matters brought before them, but only an equal number of each shall vote. The withdrawal of the members of whichever body may be in excess to be by lot.

"12. That any expenses incurred by this board be borne equally by the operatives and employers, and the accounts to be produced and passed at each quarterly meeting.

"13. That no alteration or addition be made to these rules except at a quarterly meeting or a special meeting convened for the purpose. Any member of the board intending to propose an alteration or addition shall furnish the exact terms thereof, in writing, to the secretaries twenty-eight days before such meeting, and the secretaries shall give twenty-one days' notice of the same to each member of the board.

“ 14.—*Section A.* Any member of the Lace Manufacturers' Association who may be reported to the board as not complying with the decisions of the Board of Conciliation and Reference in respect to the price per rack, &c., and who shall have been ultimately found guilty of such malpractices, after a full and searching inquiry into the same, shall pay the whole of the costs incurred by such inquiry, in addition to the difference in wages, from the time such complaint was given notice of. Upon the refusal of such employer to conform to this rule, the Lace Manufacturers' Association shall refuse any pecuniary assistance to such defaulting member, and the Operatives' Association shall have the full power of withdrawing workmen from the service of such employer. Also that the Lace Manufacturers' Association shall pay an equal proportion of the expenses so incurred so long as the employer in question remains a member of the Lace Manufacturers' Association.

“ *Section B.*—Any member of the Amalgamated Society of Operative Lace Makers who may be reported to the board as not complying with the decisions of the Board of Conciliation and Reference in respect to the price per rack, &c., and who shall have been ultimately found guilty of such malpractices, after a full and searching inquiry into the same, shall pay half the cost of such inquiry, and should he fail to do so the Amalgamated Society of Operative Lace Makers shall be held responsible for the same.”

“ 1001. The employers observe :—“ Strikes lose money on both sides. If workpeople would confer more with their employers, and lay their demands or wishes for more wages before their masters fairly and in a friendly manner there would be fewer strikes. The mischief is often caused by workers rushing off to their unions or kindred organisations, which are frequently officered or swayed by men ignorant of business, and filled with disappointed or bad feelings towards employers that bring on strikes. Workpeople lose quite as much or more than the masters by such fighting.”

1009. With reference to the end of this dispute the employers state :—“ Supposing workers had been granted what they asked, and fines abolished it would have taken upwards of two years to make up their loss on account of being idle.”

1032. The employers suggest the County Court Judge as arbitrator :—“ Being more impartial and less interested in the trade of any district than magistrates or other officials.”

1039. The union secretary says :—“ I presume all weavers are skilled workpeople, as it is a trade which they never completely learn ; and though there is no apprenticeship it is a trade which only needs about three weeks' learning to be capable of managing passably.”

1072. Employer says :—“ Settle labour disputes quickly by stopping union leaders' pay until they are settled.”

1095. Union secretary says :—“ For a period of several years previous to the strike men were called upon perhaps to go out at an early hour in the morning, and to continue until a very late hour at night, sometimes 15 and 16 hours' work per day, and no recompense for it, hence the strike.”

1108. The employers, with reference to their suggestions for preventing or settling labour disputes, observe :—“ As an alternative establish masters' unions generally.”

1109 & 1110. These employers regard coal carmen and loaders as being the highest paid class of unskilled workmen in London.

1116. The employers state, with reference to the result of this strike :—“ The uniform tariff pressed upon us by the union is unreasonable. At some depôts, owing to the neighbourhood of large customers, a man can do twice or thrice as much as is possible to a carman at another depôt ; yet short and long cartages are placed at the same remuneration, and other questions of variety in work which ought to modify remuneration are overlooked.”

1117. The employers observe :—“ This strike was only a temporary excitement caused by the dock strike. It would prevent disputes in our trade if carmen were never asked to do contract work, that is workhouse, board schools, prisons, &c., under the ordinary rate of pay.”

LOCK-OUTS.

1 to 22. With reference to the lock-out in December in the Bristol boot and shoe trade, and to the formation of a Board of Conciliation and Arbitration as a result thereof, one employer says:—"Before we go to the board, we have adopted a visiting committee of two masters and two men to try first and allay the trouble before appealing."

Another employer observes:—"Many of the men were satisfied with the wages paid, both day and piece work. A steady man can earn 25s. to 28s. per week in 50 hours per week, but many will not work more than 35 to 40 hours per week. . . . If the workmen studied their own interest more they would work 50 to 54 hours per week, and to a very great extent manufacture much of the manufactured goods now imported, and thus have a more regular supply of work."

24. The employers make the following suggestions as means of preventing labour disputes:—

- (1.) "Educate working men in principles of thrift and proper use of the wages already earned.
- (2.) "By removing the many temptations now placed in the midst of the working classes in the form of questionable clubs and public houses.
- (3.) "By a more vigilant oversight on the part of the police, to report those publicans who encourage working men to spend large portions of their earnings in their houses, and then send them home drunk, with empty pockets."

34. The representative of the employers in this case states that the settlement of this lock-out in favour of the men resulted in a loss to the masters of about 40 per cent. upon existing contracts.

The following statement was issued by the workmen's union:—

" GLASGOW PLASTERERS' LOCK-OUT.

" Its history and present position.

"This dispute has now assumed a more serious aspect than was at first anticipated, and, as misleading statements have in many instances been circulated as to the causes that have led to the present rupture, we consider it a duty to fellow-workmen of other trades, to the public, as well as in vindication of our share in the matter, to lay a plain history of the events that have led up to the present position in all its bearings.

"We do this, convinced that all right thinking workmen will agree that the action of the Master Plasterers' Association in throwing us idle was unwarranted, arbitrary, and a species of petty tyranny.

"For years past several Glasgow employers, in their desire to reap a heavy profit, have driven the men to work in such a way that the journeymen became very little better than white slaves. They were pitted one against the other, and had to get over such a quantity of work that ceilings, ornament, and walls were defective in finish and strength.

"This harassing and 'scamping' was carried to such an extent that the ordinary tools for adjusting, measuring, levelling, straightening, and binding together of the materials of which plaster work is formed had to be discarded, with the result that surfaces are uneven, open, rough, soft, porous, and easily broken; angles and cornices are twisted, and one of the effects of all this is becoming too painfully apparent in the constantly recurring accidents and risks to life, limb, and furniture, by falling ornaments and ceilings. Walls will not hold a nail, while draughts from behind shutters, partitions, and windows are sources of dangerous illness to the occupiers.

"Many attempts were made by the workmen to amend this state of matters, but without any permanent result. Fines were imposed by the society on men who too flagrantly passed inefficient work by too quickly going over it; but money prevailed, the work thus hurried over threw men idle in great numbers; they were at the command of the employers, and it is only human nature that bread-winners could not afford to go idle, even if they had to toil in a manner the reverse of pleasant, and to pass work that in ordinary circumstances would be abhorrent to their better and finer feelings.

"Employers were remonstrated with, and the more respectable agreed that something be done to put an end to such a disgraceful state of affairs; they promised to consider the question with a view to its improvement, and to support the society in any steps they might take to put matters in a more creditable position.

"Nothing, however, came of these promises, and, in self-defence, as the case was at its climax, our society in November prepared a working card, in which was set forth the time that should be taken to properly begin and finish certain kinds of plaster work. This list allowed of no resting or lazying, but was in every sense of the word a good substantial day's work, that could be done only by good and efficiently trained journeymen.

"In issuing this card to our members we did so as an ordinary part of our society's business. We, however, considered that we were doing the more respectable of our employers a welcome service.

"Three weeks ago, and without notice of any kind, nearly all the workmen were locked out because they determined to abide by the terms of this working card.

"No compromise was asked or suggested, no means adopted whereby explanation, alteration, or modification might be considered.

"CAPITAL was mercilessly put against LABOUR. MIGHT, they considered would in this instance be RIGHT. They seemed to think our society not sufficiently powerful to back our resolutions, and that they would starve us into submission.

"They have, however, reckoned without their host, our faith in the justice of our cause, and our determination to have no more of this slavery that others may be enriched, are now stronger than on the first days of our enforced idleness.

"We have received encouragement, sympathy, and substantial pecuniary as well as moral support from many quarters that we never dreamt of.

"This is the present position of the dispute, it was not our seeking, and while we are blameless, we feel ourselves morally bound to uphold the position thus forced upon us.

"Glasgow District Scottish

"National Operative Plasterers' Federal Union,

"Albion Halls, College Street, Glasgow.

"10th December 1889."

46. With reference to the lock-out of the fitters' helpers in the Clyde district, the union secretary suggests that helpers should receive a better proportion of the piece-work earnings of the fitters, stating:—"Where the unskilled workman (as in this case) does most of the work, if he got, say, 9d. to every 1s. earned at the job, very few strikes or disputes would occur. Rivetters pay this to holders-up."

APPENDIX III.

TABLE showing the principal FOREIGN and COLONIAL STRIKES noted, with PARTICULARS of the CAUSE, DURATION, RESULT, and NUMBERS affected where obtainable.

Reference No.	Place.	Trade.	Cause or Object.	Date of Commencement of Strike.	Date of Termination of Strike.	Number of Persons affected.	Result.
FRANCE.							
1	Origny -	Basket weavers	For advance in wages -	1889. January	1889.	—	—
2	St. Quentin -	Lacemakers	Do. -	Do.	—	400	—
3	Paris -	Official employés.	Against increase in hours without compensation.	Do.	—	—	—
4	Pas de Calais and Nord.	Weavers, &c.	Not stated -	March	—	10,000	—
5	Marseilles -	Dock labourers	Not stated -	Do.	April	1,000	—
6	Marommies -	Weavers	For advance in wages -	April	—	—	—
7	Roubaix and Tourcoing.	Carpenters, masons, smiths, painters, and textile workers.	For advance in wages, and limitation of hours to a ten hours' day.	May	—	—	—
8	Paris -	Gas stokers	Do. -	Do.	May	—	Increase in piecework prices granted.
9	Do. -	Glass blowers	Do. -	Do.	—	—	—
10	Montpellier -	Carpenters	For advance of 20 per cent. in wages.	Do.	—	—	Advance granted in most cases.
11	Reims -	Wool combers	For advance in wages -	Do.	—	—	—
12	Vienne -	Dyers and masons.	For advance in wages, and reduction in hours.	Do.	—	—	—
13	Do. -	Weavers	For advance in wages -	Do.	May	—	Not stated.
14	Terre Noir -	Blastfurnacemen	Do. -	Do.	—	—	—
15	Gard and Ardeche Departments.	Miners -	For advance in wages, and reduction in hours.	Do.	—	5,500	—
16	Lens -	Miners -	Do. -	Do.	May	—	Demands refused. Work resumed.
17	Thizy, Lyons -	Weavers	Not stated -	Do.	Do.	10,000	Settled by mutual concessions.
18	Marseilles -	Bakers -	Do. -	June	—	—	—
19	Paris -	Cabmen	For a fixed daily wage, or reduction in price of cab hire.	Do.	June	—	Men submitted to terms of masters.
20	Pas de Calais and Nord.	Miners -	For advance in wages -	October	October	15,000	Advance of 10 per cent. granted.
BELGIUM.							
21	Quenast -	Quarrymen	For advance in wages -	February	—	—	—

75	Bologna - -	Female labourers	Do. - - -	Do.	—	—	—
76	Rome - -	Omnibus and tramway employés.	Against deductions from wages.	Do.	—	—	—
77	Turin - -	Weavers, carters, tanners, &c.	Not stated - - -	June	—	—	—
DENMARK.							
78	Copenhagen -	Carpenters -	Do. - - -	Do.	—	—	—
TURKEY.							
79	Sofia - -	Cab drivers -	Do. - - -	October	October	—	Submitted to masters.
UNITED STATES.							
80	New York and Brooklyn.	Tramway employés.	For increased wages and reduced hours.	January	February	7,000	Submission of employés.
81	New York -	Feather workers	Not stated - - -	Do.	—	1,000	—
82	Fall River (Massachusetts).	Weavers -	For return to 1884 prices.	March	March	10,000	Submission to terms of masters.
83	Salem, Mass. -	Carpenters -	For a nine hours' day -	April	—	—	—
84	Newark, N.J. -	Spinners -	Against a reduction of 10 per cent. in wages.	Do.	—	2,000	—
85	Minneapolis -	Tramway employés.	Against reduction in wages.	Do.	—	—	—
86	Alleghany Co., Pa.	Carpenters, masons, &c.	For advance in wages -	May	—	5,000	—
87	Indiana and Western Pennsylvania.	Miners - -	Not stated - - -	Do.	—	5,000	—
88	Brazil, Indiana -	Do. - - -	Against reduction in wages.	Do.	—	—	—
89	Johnstown -	Labourers -	For better food and shorter hours.	June	—	3,000	—
90	Duluth, Minn. -	Do. - - -	For advance in wages -	July	—	2,500	—
91	Beaver, Pa. -	Railway labourers.	Not stated - - -	August	—	—	—
92	Connellsville -	Coke workers -	For advance in wages -	Do.	—	4,000	—
93	Homestead, Pa.	Steel workers -	Not stated - - -	July	—	2,500	—
94	Harrison, N.J. -	Electricians -	Against reduction in wages.	October	—	200	—
95	New York -	Dock labourers -	Against employment of negroes.	December	—	250	—
96	U.S.A. (district not stated).	Glass blowers -	Not stated - - -	Do.	—	—	—
AUSTRALIA.							
97	Melbourne -	Miners - -	To compel non-union men to join the union.	November	November	3,000	Ended in a compromise.
CHINA.							
98	- - -	Junk and boat men.	Against alteration in method of collecting dues.	Do.	November	60,000	Original method reverted to.

APPENDIX IV.

NOTES and OBSERVATIONS from various SOURCES upon the FOREIGN and COLONIAL STRIKES detailed in the previous TABLE.

7. This was part of an extensive strike in France, very few of the manufacturing towns remaining unaffected by the movement. The labour agitation had led to a manifestation on May 1st, and in many districts disturbances resulted which had to be put down by the military, notably on the borders of Belgium, about Lille, Roubaix, and Tourcoing.

Mr. J. A. Crowe, in his report to the Foreign Office, says:—"The chief centre of disturbance on the Belgian frontier has been at Roubaix, where upwards of 30,000 workmen spent May 1st, idling in the street, and claiming eight hours and 30 per cent. increase to wages. It is to be noted that the day at Roubaix hitherto has been divided in most of the factories of the place as follows:—

"Beginning work at 6 a.m., half an hour for breakfast at 8, an hour for dinner between noon and 1 p.m., half an hour's rest at 5 o'clock, close of work at 8 p.m. This means 14 hours in the works, of which two hours are devoted to food and rest. The strikers required that work should begin at 7, that two hours should be given for dinner and rest at noon, and that work should cease at 7 p.m.

"In some cases the same wages were asked for 10 hours as for 12. In other cases more for 10 hours than had hitherto been paid for 12.

"The masters might have seen their way to concede higher pay, but they declared themselves unable to make any concessions as to short time until the Government procured an international agreement to that effect.

"Unfortunately, the strikers at Roubaix, Tourcoing, and places in that vicinity were not satisfied with peaceful agitation, they formed themselves into bands which scoured the country, broke into mills, threatened the lives of manufacturers, and caused grave anxiety to the authorities. It is calculated that in Roubaix and Tourcoing alone, 70,000 remained out between May 1st and 7th. On the 8th, it is stated that 15,000 men in the ordinary trade of carpenters, masons, smiths, painters, &c. had returned to their shops at Roubaix, but most of the hands in the textile industries were still on strike, and it is not supposed that things will take a better turn for a week to come."

Other strikes, the result of this agitation, are also shown in the table.

18. The newspaper report says that during the strike "the supply of bread for the town will be attended to by the military commissariat officials."

20. With reference to the miners' strike at Lens, in the Pas de Calais, in October, Mr. J. A. Crowe says:—"The quotations for coal at the pit's mouth are much higher than those of any collieries in other parts of the world. The high prices of coal which rule in France are thus of importance, as showing that the financial burdens of mining companies must be very large. In truth, it seems no light matter that coal mines, which, as we shall presently see, are not yielding more than a net profit in the aggregate of 1,360,000*l.* a year, should have to pay in dues ('redevances') to the State alone, 100,000*l.*

"The consequence of this and similar burdens has been that the number of collieries worked in France is altogether out of proportion to the number of concessions granted, and the collieries which pay dividends are on the whole but few as compared with those which give no returns of any kind whatever. It may be stated shortly that the concessions of coal mines in France were 636 on January 1st, 1888, and covered an area of 557,178 hectares, equal to 1,397,000 acres. Of these, only 291 concessions were worked over an area of 356,558 hectares (855,939 acres), and only 163 collieries earned dividends, whilst 129 were carried on at a total loss of about 4,000,000 fr., leaving a general profit on coal mining in France, for 1887, of 34,000,000 fr. (1,360,000*l.*).

"The number of persons—men, women, and children—employed in and about coal mines does not much exceed 100,000 throughout the whole of France.

"The rise of wages in the Nord and Pas de Calais will, it is said, be equal to an annual amount payable by coalowners of 7,000,000 fr. (280,000*l.*)."

28. The strike of miners in the Charleroi district was settled by the concession of the men's demands, but broke out afresh two days afterwards in consequence of a dispute between the masters and men as to the mode in which effect should be given to the concession granted of a reduction in the hours of labour.

29. Consul Turing says, with regard to the strike of dock labourers in Rotterdam :—
 “ In reviewing the causes which led to the strike it may, in the first instance, be pretty safely assumed that the Dutchmen were actuated by the late example of their London brethren.

“ The transit trade of the city was undoubtedly affected by the London strike, which was more prominently brought to the knowledge of the local dock labourers by the consequent irregularity in the service of the London steamers running to this port.

“ To the non-existence in this city of labourers' unions, however, may be ascribed the fact that the number of men who originally struck work did not exceed about 200, and although this number subsequently was largely added to, yet the majority of the increase consisted of idlers and loafers and also of labourers who, under pretence of intimidation, availed themselves of the opportunity to enjoy a time of idleness.

“ It cannot be denied that the scale of wages and the conditions of work in several branches of dock labour required revision and improvement, whilst it must also be admitted that the system of payment through stevedores and middlemen called for alteration; but it is generally deprecated that before taking extreme measures, whereby the trade of the port was practically paralysed, the men did not seek an interview with the employers, and endeavour by friendly means to obtain that which has now been conceded them.”

30 to 39. The strike of cabinet-makers at Nuremburg in the end of March was the commencement of a series of labour movements throughout Germany in April and May, including the great strike of miners in Westphalia, which afterwards extended to Saxony, Silesia, and the Saar district.

In a report to the Foreign Office on the Westphalian Miners' Strike, Consul Mulvany says, with regard to the settlement arrived at:—“ Therefore the men have not gained much material advantage by the strike, as they would in the ordinary course of events, on a rising coal market, have obtained the increased pay; but the thin edge of the wedge is entered by which, in future, colliery managers will be compelled to give the fullest consideration to all fairly reasonable claims made by the men; perhaps even to confer with their delegates, who are thus placed more on the English footing than heretofore. This constitutes ‘an immense revolution in the ‘labour question,’ and means a certain participation by the men in the profits of the coal owners; therefore in its issues the movement is well worthy of note.”

60. The strike of tramway employés in Vienna led to serious disturbances, to repress which the military were employed.

71. The mother-of-pearl button industry, in which this strike occurred, is one of which Vienna long had a monopoly, but competition in England and other countries has now arisen. The masters wished to revise the tariff prices in order to be able to grant the request of the men for increased wages, but the exporters refusing to allow any alteration in the tariff, which was fixed in 1886, the masters resolved to stand by their men to coerce the exporters. The strike, therefore, was followed by a lock-out.

87. The following extract is from American correspondence in the *Commonweal* :—

“ The miners on strike in Indiana are in a bad condition. Over 9,000 people are on the verge of starvation. The women are selling their wedding rings and other little treasures, while the fathers were disposing of the trinkets of their children to get bread to keep them from starving. All of their furniture and more substantial belongings have been sold weeks ago. The miners have been out since May 1, and have been refused all offers to arbitrate, and to settle their differences with the operators. For the past five years the maximum wages received by the men have been five dollars a week.”

89. The strikers in this case were the labourers employed in getting rid of the debris of the terrible reservoir disaster at Johnstown.

91. In the strike of Italian railway labourers at Beaver, Pennsylvania, about 500 of their number caused a riot, and before it was quelled three of them were killed outright and seven others wounded.

TRADES (HOURS OF WORK).

RETURN to an Order of the Honourable The House of Commons,
dated 7 August 1890;—for,

RETURN “showing the Average Number of Hours Worked as a Week’s Work in the Chief Trade Centres by the following Industries in the Years 1850, 1860, 1870, 1880, and 1890:—Agricultural and Dock Labourers; Bakers; Building Trades; Cabinet Making Trades; Chemical Workers; Cigar and Tobacco Trades; Clothing Trades; Coach Making; Engineering Trades; Glass Trades; Manufactured Iron Trade; Mining; Pottery Trades; Printing and Bookbinding; Railway Employees; Shipbuilding Trades; Textile Trades.”

Board of Trade, }
August 1890. }

HENRY G. CALCRAFT.

(*Mr. Broadhurst.*)

Ordered, by The House of Commons, to be Printed,
11 August 1890.

LONDON:
PRINTED FOR HER MAJESTY’S STATIONERY OFFICE,
BY THE HANSARD PUBLISHING UNION, LIMITED.

And to be purchased, either directly or through any Bookseller, from
EYRE AND SPOTTISWOODE, EAST HARDING STREET, FLEET STREET, E.C.,
and 32, ABINGDON STREET, WESTMINSTER, S.W.; or
JOHN MENZIES & Co., 12, HANOVER STREET, EDINBURGH, and
88 and 90, WEST NILE STREET, GLASGOW; or
HODGES, FIGGIS, & Co., 104, GRAFTON STREET, DUBLIN.

MEMORANDUM.

THE annexed Return has been mainly compiled from Returns made to the Board of Trade by employers on the one side, and workmen's associations on the other, in response to circulars sent out by the Board of Trade. It should be understood that it relates to the *standard* hours of work in each trade, and that no account is taken of overtime.

The following shows the number of circulars sent out as to each trade, and the number of replies received.

NUMBER OF SCHEDULES SENT OUT AND RECEIVED.

SCHEDULES TO EMPLOYERS.

	Sent.	Returned.
Agricultural and Dock Labourers - - - - -	97	64
Bakers - - - - -	33	21
Building Trades - - - - -	125	87
Cabinet Making Trades - - - - -	50	22

SCHEDULES TO TRADE UNIONS.

All trades - - - - -	292	159
----------------------	-----	-----

There are, however, in many cases, supplementary statements in addition, compiled specially from the reports of certain trade unions, and from a Return prepared by the National Association of Master Builders of Great Britain, which give information as to the hours of labour in various trade centres for the later periods.

To that portion of the Return which deals with hours of labour in mining, there is added the copy of a special statistical report issued by the Miners' Federation of Great Britain, as to the hours worked at collieries in every mining district in Great Britain, except Durham, Northumberland, and Cleveland. The Board of Trade have to thank the Miners' Federation for permission to reproduce this report.

Board of Trade, }
2 February 1891. }

No definite hours in 1850.

In the earlier periods the lace-making machines worked 108 hours per week, the men working in shifts.

The machines work from 4 a.m. to 12 p.m. five days in the week, and 4 a.m. to 1 p.m. on Saturdays—109 hours, giving to two shifts of men 54½ hours each. But the cleaning, &c., of the machines adds, on an average, 10 hours per week to this number.
58 hours from 1870 to 1875.

A P P E N D I X.

APPENDIX.

(The following Statement of the Hours worked in Coal Mines, was prepared by the Miners' Federation of Great Britain).

MINERS' FEDERATION OF GREAT BRITAIN.—STATISTICAL REPORT, Supplied by Checkweighers and District Secretaries, of the Hours Worked at Collieries in every Mining District in Great Britain, except Durham, Northumberland, and Cleveland. — [October 1896].

NAME OF COLLIERY.	Persons Employed Below Ground.	Descend Shaft Morning.	Ascend after Days' Work.	Men all Out of Mine.	Commence Winding Coal.	Cease Winding Coal.	Stoppage for Meals.	How many Shifts Worked.	Distance from Pit-bottom to Face.	Time taken in Travelling.	Hours Collies Work at Face.	Hours Boys Work.	Hours Daymen Work.

Under 8 oz.

WATER ORDERS CONFIRMATION BILL.

MEMORANDUM stating the nature of the Proposals contained in the PROVISIONAL ORDERS included in the WATER ORDERS CONFIRMATION BILL.

1. Caton Water.

To empower Messrs. Bryan Padgett Gregson, Albert Greg, and Thomas Grassyard Edmondson, all of Caton, to construct and maintain waterworks, to supply water in the township of Caton, and part of the township of Quernmore, in the parish of Lancaster, in the county of Lancaster, to supply water in bulk by agreement without the limits of supply; to fix the capital of the undertakers for the purpose of the undertaking at 8,000 *l.*, and the amount to be borrowed at 2,000 *l.*, and to enable the Local Authority to purchase the undertaking under certain conditions.

2 Mid-Kent Water.

To empower the Mid-Kent Water Company, Limited, to construct additional waterworks, to include the parishes or places of Wouldham, Burham, and East Malling, in the county of Kent, within the limits of supply, and to raise 15,000 *l.* additional capital by shares, and 3,750 *l.* by loan.

3. Stockport District Water.

To empower the Stockport District Waterworks Company to raise 32,000 *l.* additional capital by shares or stock, and 8,000 *l.* by loan.

4. Todmorden Water.

To empower the Todmorden Waterworks Company to raise 10,000 *l.* additional by shares or stock, and 2,500 *l.* by loan.

Except in the Caton Order, which is promoted by individuals, the additional capital authorised is required to be offered for sale by auction or tender. In the Caton Order, the Waterworks Clauses Acts, 1847 and 1863, have been incorporated, clauses as to regulations for preventing waste, misuse, or contamination of water, as to supply of water by measure, and as to the quantity of land to be taken by agreement, &c., have been inserted, and the rates authorised to be charged for the supply of water for domestic purposes are to be based upon the rateable value of the houses as ascertained by the Valuation List, and may be altered by the Board of Trade under the circumstances specified in the Order after the expiration of six years.

WATER ORDERS CONFIRMATION (No. 2) BILL.

MEMORANDUM stating the nature of the Proposals contained in the PROVISIONAL ORDERS included in the WATER ORDERS CONFIRMATION (No. 2) BILL.

1. *Camborne Water.*

To empower the Camborne Water Company to raise 5,500 *l.* additional capital by shares or stock, and 1,375 *l.* by loan, and to construct additional waterworks.

2. *Frith Hill, Godalming, and Farncombe Water.*

To empower the Frith Hill, Godalming, and Farncombe Water Company, Limited, to construct additional waterworks, and to include the parish of Bramley, in the county of Surrey, within the limits of supply.

3. *Leatherhead and District Water.*

To empower the Leatherhead and District Waterworks Company to raise 12,500 *l.* additional capital by shares or stock, and 3,125 *l.* by loan.

4. *Usk Water.*

To empower the Usk Waterworks Company, Limited, to construct and maintain waterworks, to supply water in parts of the parishes of Monkswood, Llanbaddoc, Gwehelog, and Usk, all in the county of Monmouth, to supply water in bulk by agreement without the limits of supply, and to fix the capital at 6,000 *l.* by shares, and 1,500 *l.* by loan.

In each case in which additional capital is authorized, it is required to be offered for sale by auction or tender. Where necessary, clauses as to regulations for preventing waste, misuse, or contamination of water, as to supply of water by measure, and as to the quantity of land to be taken by agreement, &c. have been inserted, and the Waterworks Clauses Acts, 1847 and 1863, have been incorporated.

In the Usk Order the rates authorized to be charged for the supply of water for domestic purposes are to be based upon the rateable value of the houses as ascertained by the valuation list, and may be altered by the Board of Trade after the expiration of six years under the circumstances specified in the Order.

REPORT.

TO THE SECRETARY OF THE BOARD OF TRADE.

SIR,

In a previous Report (C. 5807 of 1889) dealing with the larger textile trades—cotton, woollen, worsted, linen,—the first instalment was presented of that Census of Wages which it has been one of the objects of the Board of Trade to carry out, in pursuance of the resolution of the House of Commons of March 1886, for the collection of statistics relating to labour. In the tables presented herewith, dealing with the minor textile trades, a second instalment is presented, and a third instalment dealing with the coal and iron mining trades is in course of preparation.

The Department has still to lament the unavoidable delays which have taken place in issuing the returns. These have been due principally to the inadequacy of the staff provided for a work which has proved unexpectedly laborious; but in any case great delay could not well have been avoided. The complexities of the compilation have been very great, and it would be inexpedient in the highest degree in so novel a work to hasten publication at the expense of the utmost care and vigilance in the digest of the returns themselves.

The principles and method of compilation were fully explained in the Report prefixed to the first instalment of the Return dealing with the leading textile trades above referred to. It may be sufficient, in introducing the new figures, which relate to a much smaller mass of the population than was dealt with in the first Report, to mention only the following points:

1. The schedules issued were in two parts. The main part called for a return in detail according to the actual classification in each manufacture of the numbers employed, the weekly rates of wages, and the hours of employment in the week—separate particulars being required for men, lads and boys, women and girls. The object was to be able to show in detail not merely the rates of wages, specifying the employments, but also the proportionate numbers employed at each occupation, and this has been carried out in the accompanying analysis, as in the similar analysis in the first Report, which shows the maximum, minimum, and average rates in each employment, and the proportionate numbers receiving at or about these rates. The second part of the schedule called for a statement of the actual amount of wages paid by each employer in the calendar year previous to that for which the return was made, with the highest and lowest amounts paid in particular weeks and the numbers paid in those weeks, the object here being to obtain some data for comparing the normal wages, according to the main part of the schedule, with the fluctuations in the annual earnings which might arise from various causes. The accompanying summary tables, like the similar tables appended to the first Report, contain many details on this head.

2. One of the general objects in view has thus been to obtain materials for arriving ultimately at a statement of the aggregate earnings of the working classes throughout the country, and of the average amount per head, and incidentally to obtain a view of the relative positions of different trades and industries according to the average wages of those employed.

When further returns have been analysed, it will be obvious that an important step will have been made towards this last result by the present census. The comparison between the different textile trades themselves indicates that when the work has been completed it will be possible to state an average for the country as a whole, and probably for different parts of it.

3. The number of schedules issued altogether was 79,041, of which 10,681 have been returned, making 14 per cent. of the total, but the proportion of the industrial population covered by the returns to the total of such population is even greater. The percentages show that the numbers of returns obtained are quite sufficient, according to statistical experience, to establish a satisfactory average.

In the textile trades now dealt with, the numbers of schedules issued and returns received were as follows:—

Trades.	Schedules issued.	Schedules returned.	
		No.	Per cent. of Issues.
Jute - - - -	143	50	35
Hemp, &c. - - - -	1,756	180	10
Silk - - - -	461	79	17
Carpet - - - -	131	14	11
Hosiery - - - -	302	24	8
Lace - - - -	335	32	10
Smallwares - - - -	253	39	15
Flock and Shoddy, manufacture of -	127	29	23
Hair - - - -	39	8	21
Elastic Web - - - -	47	9	19
Lamp and Candle Wick - - - -	27	5	19
Handkerchiefs - - - -	53	6	11

The percentages returned are very considerable, and the department has again to express its obligations to the employers who have taken so much trouble.

As already stated, it is believed that the percentage of the population covered by the schedules returned to the total population in the industry concerned is even greater than the proportion of the schedules returned to those issued. This appeared very clearly in the larger textile trades, where it was possible to compare the total numbers comprised in the schedules with the total numbers in the last factory return. It is not possible to do this for all the trades now dealt with, as the factory return does not contain the requisite detail; but making a comparison, as far as this can be done, we obtain the following result:—

FACTORY POPULATION in the TEXTILE TRADES according to FACTORY RETURN, 1885,
compared with the NUMBERS comprised in the accompanying RETURNS.

Trades.	Total employed according to Factory Return.	Numbers given in Rates of Wages Returns.	Proportion returned to Total employed.
			Per cent.
Jute - - - - -	(a) 36,269	(a) 18,552	51
Hemp, &c. - - - - -	(b) 9,276	(b) (c) 3,624	39
Silk - - - - -	(d) 42,995	(d) 9,461	22
Carpet - - - - -	Cannot be given	3,588	—
Hosiery - - - - -	(d) 19,536	(d) 2,815	14
Lace - - - - -	(e) 15,886	(e) 2,022	13
Smallwares - - - - -	Cannot be given	14,171	—
Flock and Shoddy, manufacture of - - - - -	Cannot be given	(f) 764	—
Hair - - - - -	2,239	(f) 641	—
Elastic Web - - - - -	3,824	758	20
Lamp and Candle Wick - - - - -	Cannot be given	227	—
Handkerchiefs - - - - -	Cannot be given	3,540	—

(a) Scotland only. (b) Exclusive of Ireland. (c) These figures include some rope walks and other works not included in the Factory Return.
(d) Exclusive of outworkers.
(e) The numbers in the Factory Return exclude persons employed in finishing warehouses: the returns made to the Board of Trade include such persons.
(f) Exclusive of London.

Here again the percentages of the population covered by the returns are very large, especially in the larger industries, though not generally quite so large as in the leading textile trades (*see* first Report, C. 5807, p. vii.), where the proportion ranged from 26 to 36 per cent. Still the proportions are quite high enough to make a satisfactory basis for averages.

It has to be noted, however, that the total numbers actually employed in the trades here dealt with are much smaller than those in the leading textile trades which were the subject of the first Report. That Report embraced a factory population of close upon 900,000; in the present Report, although there is a larger number of trades, the factory population comprised in the seven trades for which such particulars can be given is only 130,000, and even making an estimate for the five trades for which there are not the necessary particulars in the factory return, we should still hardly arrive at a greater figure than 220,000. At the same time it has to be noted specially that in one or two of the trades here dealt with, the factory population is itself only a portion of the wage-earning classes in the industry. Altogether, then, as the results shown by these smaller trades do not apparently differ widely from the averages brought out by the leading textile trades themselves, while the numbers comprised are so much fewer, the returns now dealt with become chiefly useful as illustrating and confirming the returns in the leading trades themselves. Dealing with so much smaller numbers they could not affect the general averages for the country very greatly in comparison with the returns in the leading trades, even if they differed considerably from the latter; but in point of fact, as we shall see, there are no material differences. The main difference is shown in the lace trade, where the averages here brought out are exceptionally high, and probably higher than they would have been if the non-factory as well as factory population had been included; but one trade out of many is not sufficient to affect the average very much, and even if a lower figure had been stated for the lace trade through the infusion of the non-factory population, the general average for all the textile trades would not be perceptibly altered.

It will be unnecessary to go through the different trades in detail as was done with the leading textile trades in the first Report. The summary tables appended follow the same model as those in the Report dealing with the leading textile trades, and are intended to throw light on the same questions,—the average wages in different districts as affected by the proportions of men, women, and children employed, and the proportion of the average earnings per head to the normal wage. The results can also be brought to a point in one or two more condensed summaries subjoined, and compared with those for the leading textile trades which were dealt with in the first Report.

The following is the first of these condensed summaries, being a statement of the normal wages in the under-mentioned trades in 1886, the corresponding particulars as to the leading textile trades being added.

COMPARISON of NORMAL WAGES in the under-mentioned TRADES in 1886.

LEADING TEXTILE TRADES, FROM PREVIOUS REPORT.								
	£ s.	£ s.	£ s.	£ s.	s. d.	s. d.	s. d.	s. d.
Cotton - - -	65 12	24 4	39 15	17 17	25 3	9 4	15 3	6 10
Woollen - - -	60 0	22 0	34 9	19 7	23 2	8 6	13 3	7 5
Worsted - - -	60 13	16 18	31 0	16 0	23 4	6 6	11 11	6 2
Linen - - -	51 13	16 4	23 3	12 17	19 9	6 3	8 11	4 11

(a) No half-timers included.

This summary speaks for itself. It can be seen at a glance that cotton, which was pre-eminent in the former Report as the best paid among the leading textiles, though its average rates, except for women, are now exceeded in two cases, viz., carpet and lace, is still very near the top, while lace is a case where there is great difficulty in stating any perfectly satisfactory normal rate for men. The lowest average in the new return is shown by jute, which is thus assimilated to linen, which was at the bottom of the scale among the leading textile trades.

Putting all the trades together, and including the four leading textiles dealt with in the former Report, we should have the following maximum, minimum, and average rates of wages as prevailing in these textile trades, to which the figures for cotton, as the largest of all, are appended for comparison.

	Maximum.	Minimum.	Average.	Cotton only.
	£ s.	£ s.	£ s.	£ s.
Men - - -	70 18	50 5	61 10	65 12
Lads and Boys - - -	27 1	15 13	21 9	24 4
Women - - -	39 15	23 3	33 1	39 15
Girls - - -	21 10	11 14	16 9	17 17

Thus cotton is in each case somewhat above the average, except in the case of women, where cotton is at the maximum, and very considerably above the average. The very high wages for women in Lancashire were the subject of comment in the first Report, and this and other differences in different trades cannot but attract attention. It may be noticed also that the average as here brought out corresponds very closely with the mean of the four leading textiles themselves.

It is not possible to show by a similar compact table the geographical distribution of wages, because the districts in different trades group themselves differently. Reference may however be made to the tables in the appendix showing the amounts paid in wages in each district and the amount per head. It will not fail to be observed that the general rule of lower wages at a distance from Lancashire, the centre of the chief textile manufacture, prevails, and that wages in Scotland and Ireland, and especially in Ireland, are lower than in England. Corresponding with this is the fact that the two trades where wages run lowest, as will be seen from the above table, are jute and linen, which are especially Scotch and Irish industries. The following comparison will also bring out this point:—

AVERAGE WAGES in under-mentioned TRADES, and in SCOTLAND and IRELAND, respectively.

	General Average.	Scotland.	Ireland.
	£	£	£
Cotton - - - -	36	28	—
Woollen - - - -	35	31 (a)	21
Worsted - - - -	28	19	—
Linen - - - -	25	26 (b)	22 (b)
Jute - - - -	26 (c)	26	—
Hemp, &c. - - - -	32	30	—
Silk - - - -	27	30	—
Carpet - - - -	35	35	—
Hosiery - - - -	34	33	—
Smallwares - - - -	27	—	23

(a) Mean of four districts.

(b) Mean of two districts.

(c) Scotland only.

Thus there are some exceptions, such as silk, where the character of the trade and local depression seem to have lowered the wages in the English districts below the average for the time, but, as a rule, Scotch and Irish wages, where a comparison can be made, are below the average. In the case of Ireland, where a comparison can be made, the rates are about one-fourth to one-third less than the average. This is quite consistent with higher wages in Ireland for a few picked individuals than the English average, as the detailed tables show.

As was pointed out in the previous report, the general average per head is affected as between different districts in the same trade by the smaller or larger proportion of men employed. The trades here dealt with, as a rule, are trades in which female labour is largely employed, but there are some districts in which, for exceptional reasons, there is a considerably larger number of men than the average. As regards particular trades, reference may be made to the tables in the Appendix comparing different districts; but it may be useful to collect together here for comparison the percentages of men, lads and boys, women, and girls employed in the various trades, similar particulars being added, as in the above table, for the four leading textile trades dealt with in the first Report.

STATEMENT showing the Proportion per Cent. of MEN, LADS and BOYS, WOMEN, and GIRLS, respectively, employed in the under-mentioned Trades, to the Total employed in such Trades.

	Men.	Lads and Boys.	Women.	Girls.
Jute - - -	15·1	13·8	58·8	12·3
Hemp, &c. - - -	34·0	23·0	35·8	7·2
Silk - - -	22·3	8·2	51·5	18·0
Carpet - - -	36·0	12·4	36·9	14·7
Hosiery - - -	29·7	3·9	61·0	5·4
Smallwares - - -	19·3	9·9	54·9	15·9
Flock and Shoddy, manu- facture of - - - }	43·2	4·3	51·7	·8
Hair - - -	9·5	6·5	72·9	11·1
Elastic Web - - -	22·5	3·2	49·6	24·7
Lamp and Candle Wick -	5·7	2·7	56·4	35·2
Cotton - - -	22·5	16·7	44·4	16·4
Woollen - - -	33·3	12·4	45·3	9·0
Worsted - - -	19·2	15·3	46·5	19·0
Linen - - -	17·2	10·5	55·4	16·9

The correspondence is not quite exact, but a comparison is nevertheless useful between the average annual earnings per head shown in different trades, putting all classes together, and the proportionate numbers of men and women employed.

The percentages are subject to the observation that as between men and lads and boys, and as between women and girls, the distinction may not be always exactly made, but where doubts may arise a comparison can still be made between the proportions of male and female labour altogether.

Another point on which a comparison may be made is with reference to the difference between the normal wages and the actual earnings in a particular year.

Reference may be made on this head to Table 33 in the Appendix, which is similar to a table in the former Report, showing from a comparison of the returns, where the requisite particulars are given, the differences between the maximum and minimum numbers employed in particular weeks of 1885, and the numbers from which the normal wages are deduced in 1886. The table shows that, on the whole, the maximum weekly earnings were 18 per cent. above the average, and the minimum weekly earnings 13 per cent. below the average; and that the variation either way in the numbers employed did not exceed 10 per cent.

From the following summary table, in which the annual wages per head in 1886 (a), as shown by the return in detail when multiplied by 52, are compared with the actual earnings for the year 1885 (b), as shown by dividing the wages paid in that year by the numbers on which the normal wages are calculated, it would appear that a deduction of about 10 per cent. all round would be a very fair average to take in a year like 1885 in order to arrive at the average net earnings from the normal wages.

Trade.	(a)	(b)
	£ s.	£
Jute - - -	26 3	26
Hemp, &c. - - -	34 5	32
Silk - - -	30 12	27
Carpet - - -	40 17	35
Hosiery - - -	39 7	34
Smallwares - - -	29 12	27
Flock and Shoddy, manufacture of -	38 4	34
Cotton - - -	39 8	36
Woollen - - -	40 8	35
Worsted - - -	31 12	28
Linen - - -	25 10	25

Of course this information would only hold for the trades specified. It remains to be seen what the corresponding information will be for other trades which have yet to be examined.

In conclusion, I have to draw attention to the following notes upon particular trades, which were obtained in the course of the inquiry, mainly with reference to the depression of trade which existed in 1885 and 1886, and the improvement which has taken place since :—

Hemp, &c. Trade.

A manufacturer of twines and nets states that his men have little work owing to depression of trade (Bridport).

Another manufacturer reports :—Working half-time. Great portion of works closed through depression of trade (Bridport).

A manufacturer of mats in Lancashire reports that his mill was running short time for several months in 1886—working only four and five days a week.

With regard to sailmaking there are the following notices :—

Sailmaking has dwindled to zero—steam superseding sails. Many men have left the trade (London).

From Limehouse it was reported that the sailmaking trade had been depressed for the last three years—1884-6.

The trade being necessarily irregular and uncertain in its character it was impossible to answer the questions as to overtime or short time usefully (Liverpool).

“Sailmakers in Liverpool this year (1886) have not averaged more than 16s. a week in consequence of scarcity of work. A number of them, to our own knowledge, have not earned altogether since 1st January more than 5*l.* up to this date (2nd November 1886)” (Liverpool).

*Silk Trade.**

A manufacturer in Congleton reports that in 1867 there were 39 mills fully at work in this district; in 1886 there were only 12 mills, and these only partially at work.

A firm in the same town state that two-thirds of their looms had been standing idle for a good many years.

In a letter received the 14th November 1889 from a firm in Congleton, it was stated that during the last few months the throwing trade had improved, and wages for women had advanced 15 per cent.

A firm in Derby state that at October 1886, one of their mills was closed on account of bad trade, whilst another was working 8½ hours instead of 10 per day.

Another firm in Derby state that they were running the mill only four days per week, and that half the machinery was standing.

A manufacturer in Manchester states that seven years since his trade was good, and he had been busy for some time; that his goods were principally sold to United States, Canada, Australia, and the Cape; but that owing to change of fashion, and high duties (principally in the United States) his trade had gradually dwindled away.

A firm in the Eastern Counties noted in 1886 that trade had been stationary for years past; but in a subsequent communication (1889) reported an improvement, but not great.

With reference to the higher wages paid to men than to women weavers, a firm near Manchester state that “it is partly accounted for by superior skill, but chiefly by the fact “that we can put men on to looms, which owing to the larger number of shuttles and threads “of warp, require more manipulation, and would be considered too heavy jobs for women.”

Lace Trade.

A manufacturer at Nottingham (1886) states that he is “working less than half time, and has parted with his draughtsman as trade is so bad.”

In a letter attached to another return, it is stated that “trade is now (November 1886) in a very bad state” (Nottingham).

It is stated in another return that only half-time was being worked (Nottingham).

In a letter from Nottingham it is stated that “in regard to lacemakers the nearest average has “been given, as this class of men may earn 2*l.* to 3*l.* per week for several weeks, and then not “a penny for a month or two. Nottingham is suffering from as complete stagnation of trade “at the present, March 1890, as at any time during the last five years of bad trade.”

Another firm near Nottingham state that one-third of their machinery was standing altogether, the remainder working only eight hours per day, whilst formerly it worked 20 hours per day.

* The remarks about depression, it is to be noted, come from the thrown silk district.

In a letter attached to a return from the Somerset district, it is stated that the "greater part of the outdoor menders only take in the work as supplementary to their domestic duties. Those few who take the work as a means of livelihood earn 8s. to 10s. per week."

A firm in Scotland state with reference to the system of shifts :—

The machines were worked day and night by three shifts of men working the following hours, for about the same wages, alternately :

(1) from 6 a.m. to 2 p.m. } 48 hours.

(2) „ 2 p.m. to 10 p.m. }

(3) „ 10 p.m. to 6 a.m. = 46 hours as they did not work Saturday night.

Sets (1) and (2) did three hours spooling per week in addition to the time given for lace making.

Board of Trade,
July, 1890.

I have, &c.
(Signed) R. GIFFEN.

APPENDIX TO REPORT.

JUTE MANUFACTURE.

TABLE 1.—STATEMENT showing the number of Men, Lads and Boys, Women and Girls employed on 1st October 1886, by the manufacturers making Returns for the under-mentioned Districts, and total amount paid in Wages by the said manufacturers to their workpeople in 1885, &c. Also number of workpeople employed in the Jute Manufacture in Scotland (a), according to the last Factory Return : Par. Paper, No. 340 of 1885.

Number and Name of District.	Number employed, 1st October 1886.					Amount paid in Wages in 1885.	Amount per Head, i.e., dividing Amount paid in 1885 by Numbers employed as at 1st October 1886.

APPENDIX TO REPORT.

HOSIERY MANUFACTURE.

TABLE 19.—STATEMENT showing Numbers employed at different Average Rates of Wages, as stated in the detailed Tables,* pp. 40–44.

Limits of Average Rates.	Men.	Lads and Boys.	Women.	Girls.
Of 35s. and under 40s.	75	—	—	—
Of 30s. and under 35s.	190	—	—	—
Of 25s. and under 30s.	51	—	—	—
Of 20s. and under 25s.	458	—	—	—
Of 15s. and under 20s.	296	—	278	—
Of 10s. and under 15s.	—	50	1,360	44
Under 10s.	—	89	558	150
Totals	1,070	139	2,196	194

* *Note.*—It will be understood that as the average rates are made up of rates which may be above and below, as well as at the average, the numbers of persons employed at rates within the limits of the groups include some who were paid at rates above and below the limits stated; but the variation from the true numbers thus arising cannot be material.

TABLE 20.—STATEMENT showing the estimated Amount paid in Wages annually, according to the Average Wages given in the preceding Table, assuming employment for 52 weeks.

[The object of this Table is for comparison with the average annual amount per head shown by a return of actual amounts paid in the year 1885, as stated in Table 17 of Appendix.]

Limits of Average Rates.	Total Number employed.	Estimated Average Rate used in computing Amount.	Total Amounts earned in 1 Week.
Of 35s. and under 40s.	75	s. d. 37 1	£ 139
Of 30s. and under 35s.	190	33 1	314
Of 25s. and under 30s.	51	26 4	67
Of 20s. and under 25s.	458	23 5	536
Of 15s. and under 20s.	574	16 6	474
Of 10s. and under 15s.	1,454	12 10	933
Under 10s.	797	6 6	259
Total number and amount for one week	3,599	—	2,722
Total amount for 52 weeks	—	—	141,544l.
Average annual amount per head	—	—	39l. 7s.

APPENDIX TO REPORT.

LACE MANUFACTURE.

TABLE 21.—STATEMENT showing the number of Men, Lads and Boys, Women and Girls employed on 1st October 1886, by the manufacturers making Returns for the under-mentioned Districts. Also number of workpeople employed in the Lace Factories of the United Kingdom, according to the last Factory Return: Par. Paper, No. 340 of 1885.

Number and Name of District.	(a) Number employed, 1st October 1886.				
	Men.	Lads and Boys.	Women.	Girls.	Total.
I.—Nottingham - - - -	323	136	650	186	1,295
II.—Places in Notts (exclusive of Nottingham) and Derbyshire - - - - }	68	12	34	5	119
III.—Somerset - - - -	111	104	113	37	365
IV.—Ayrshire, Lanark, and Stirlingshire - - - -	91	40	71	41	243
Totals - - - -	593	292	868	269	2,022
Total Number (b) employed according to last Factory Return (P.P. 340 of 1885) - - - - }	7,782	2,168	5,936		15,886

(a) The numbers in the above Table, compiled from the Returns made to the Board of Trade, refer exclusively to persons employed in the Lace Factories and Finishing Warehouses; and the percentage of Men, Lads, Women and Girls employed, together with the annual amounts paid in wages, are therefore not given.

(b) Exclusive of persons employed in Lace Finishing Warehouses.

TABLE 22.—STATEMENT showing Numbers (a) employed at different Average Rates of Wages, as stated in the detailed Tables,* pp. 45-51.

Limits of Average Rates.	Men.	Lads and Boys.	Women.	Girls.
Of and above 40s. - - -	41	—	—	—
Of 35s. and under 40s. - -	4	—	—	—
Of 30s. and under 35s. - -	62	—	—	—
Of 25s. and under 30s. - -	306	—	—	—
Of 20s. and under 25s. - -	142	—	—	—
Of 15s. and under 20s. - -	38	41	143	—
Of 10s. and under 15s. - -	—	71	557	—
Under 10s. - - - -	—	180	168	260
Half Timers - - - -	—	—	—	9
Totals - - - -	593	292	868	269

* Note.—It will be understood that as the average rates are made up of rates which may be above and below, as well as at the average, the numbers of persons employed at rates within the limits of the groups include some who were paid at rates above and below the limits stated; but the variation from the true numbers thus arising cannot be material.

(a) See note (a) above.

APPENDIX TO REPORT.

SMALLWARES.

TABLE 23.—STATEMENT showing the number of Men, Lads and Boys, Women and Girls employed on 1st October 1886, by the manufacturers making Returns for the under-mentioned Districts, and total amount paid in Wages by the said manufacturers to their workpeople in 1885, &c. Also number of workpeople employed in the manufacture of Smallwares in the United Kingdom, according to the last Factory Return: Par. Paper, No. 340 of 1885.

Number and Name of District.	Number employed, 1st October 1886.					Amount paid in Wages in 1885.	Amount per Head, <i>i.e.</i> , dividing Amount paid in 1885 by Numbers employed as at 1st October 1886.
	Men.	Lads and Boys.	Women.	Girls.	Total.		
I.—Sewing Cotton.—England and Scotland	1,422	634	5,161	1,401	8,618	£ 254,538	£ 30

(a) These "Hand Loom Weavers" were mostly aged men who did not work full time.

(b) Some of the "Croppers" at low rates were described as old men who were quite unable to do an ordinary day's work.

(c) Some of these men were old and unfit for hard work.

(d) In many cases the duties of an "Engine Driver" and "Stoker" were performed by the same person, and it was found impossible to give the rates for each class of these workers separately.

(a) The number of operatives returned as making Jute Twine was so inconsiderable that the Returns have been collected together in this Table for both of the Jute Districts.
(b) The amount paid in wages to Jute Twine operatives was not returned separately, and is therefore included in the amounts given on previous pages for the Districts concerned.
(c) All these girls were short-timers working 30 and 26 hours per week alternately.

RATES OF WAGES.

HEMP, &c. MANUFACTURE.

Average Rates of Wages of Operatives employed in the Hemp, Manilla, Cocoa Fibre, &c. Manufacture (Rope, Twine, Sail, Tarpaulin, and Mat Making), at 1st October 1886.

GENERAL SUMMARY. (a)

Total Number on 1st October 1886,
3,624.

Total Amount paid in Wages in 1885,
£116,058.

RATES OF WAGES.

HEMP, &c. MANUFACTURE.

Average Rates of Wages of Operatives employed in the Hemp, Manilla, Cocoa Fibre, &c. Manufacture (Rope, Twine, Sail, Tarpaulin, and Mat Making), in various Districts, at 1st October 1886.

DISTRICT I.—LONDON AND SUBURBS.

Total Number of Persons employed at
1st October 1886, as per Returns,
158.

Total Amount paid in Wages in 1885,
as per Returns,
£6,167.

OCCUPATIONS.	Number employed, as per Returns.	Per- centage that the No. returned under each Occupation is of Total No. of Persons returned.	Average weekly Rate of Wages.	Number returned at rates within 10 per cent. above and below the average.	Average <i>maximum</i> weekly Rate of Wages.	Number on which average <i>maximum</i> Rate is based.	Average <i>minimum</i> weekly Rate of Wages.	Number on which average <i>minimum</i> Rate is based.
MEN								
Total Number, 33. Hours of Labour per week. (a)								
			<i>s. d.</i>		<i>s. d.</i>		<i>s. d.</i>	
Sail Makers - - - - Time	11	7'0	35 11	11	—	—	—	—

LADS AND BOYS.								
Total Number, 14. Hours of Labour per week. (a)								
			<i>s. d.</i>		<i>s. d.</i>		<i>s. d.</i>	
Unclassed Workers (b) - Time and Piece	14	8'9	8 5	5	11 4	3	5 4	3
WOMEN.								
Total Number, 111. Hours of Labour per week. (a)								
			<i>s. d.</i>		<i>s. d.</i>		<i>s. d.</i>	
Sack and Bag Sewers (c) Time and Piece	80(d)	50'6	11 1	42	—	—	—	—
Unclassed Workers (b) - Time and Piece	31	49'6	10 1	10	—	—	—	—

(a) Cannot be given: the hours of labour varied considerably at the different Works.

(b) Very few Returns were received from this District, and it was found impossible to give the rates of wages for certain classes of operatives separately; such rates have consequently been grouped under "Unclassed."

(c) From a few Returns received it appears that girls employed as Machine Sack Sewers earned about 1s. per week.

(d) About two-thirds of these women were Machine Sack Sewers.

DISTRICT II.—SOUTHERN COUNTIES OF ENGLAND AND WALES.

Total Number of Persons employed at
1st October 1886, as per Returns,
311.

Total Amount paid in Wages in 1885,
as per Returns,
£10,944.

OCCUPATIONS.	Number employed, as per Returns.	Per- centage that the No. returned under each Occupation is of Total No. of Persons returned.	Average weekly Rate of Wages.	Number returned at rates within 10 per cent. above and below the average.	Average maximum weekly Rate of Wages.	Number on which average maximum Rate is based.	Average minimum weekly Rate of Wages.	Number on which average minimum Rate is based.

(a) The hours of labour were usually 54½ per week, except at Leek, where 54 were returned as full time.

(b) Spinners, as a rule, were men unable to perform hard work.

(c) In addition to the above, some Weavers were returned as employed at their own homes; but their average *net* earnings could not be ascertained.

DISTRICT I.—CHESHIRE, STAFFS, NOTTS, DERBY, AND WARWICK—*continued*.

(a) Rates were also returned for a number of "Hand Loom Weavers" who were employed at their own homes. They were paid by piece at irregular times, when the work was brought back finished, and their weekly earnings could not, therefore, be given exactly; but, so far as ascertained, they averaged about 13s. *net* for men. The average was low, partly on account of the number of old men employed.

DISTRICT II.—LANCASHIRE AND WEST RIDING OF YORKSHIRE—*continued.*

(a) The hours of labour of outdoor workers cannot be stated definitely.

(b) In one Return 49½ hours were given as full time.

(c) As very few Returns were received from this District, it was found impossible to give the rates for each class of operatives separately in all cases; such rates have consequently been grouped under "Unclassed."

(d) In one Return 40½ and in another 47 hours were given as full time.

(e) The hours of labour of the "Winders" were irregular.

Note.—HAND-KNIT HOSIERY.—In a letter from the South-West of England respecting the Hand-Knit Hosiery Trade, it is stated that it is not a trade which can be called remunerative in the sense of persons earning their livelihood by it, but rather a supplemental one, the work being done by the wives and daughters of the fishermen, in order to add to the husband's earnings. In consequence of this it is done at a much lower rate of wages than if these women were fully engaged in earning a livelihood by it. Owing to the competition existing between the Hand and Machine-Knitted Goods, a higher rate of remuneration for the former than at present would bring them to a price at which the Machine Goods would drive them out of the market.

The price paid for knitting varies according to the size of the article and the quality of the Worsted used.

The average price paid for knitting in ordinary quality Worsted is as follows:—For 1½ lb. Worsted, 2s. 4d.; 1½ lb. Worsted, 2s. 9d.; 2 lbs. Worsted, 3s.; and in the finer qualities of Worsted the price is for 1½ lb. Worsted, 3s. to 3s. 6d.; 1½ lb. Worsted, 4s. 6d.; 2 lbs. Worsted, 5s. The Worsted is weighed out to the Knitter, and a small proportion of weight allowed for shrinkage on the article when returned. The work being done by the women and children at their own homes, and during the intervals of household work, the length of time occupied in knitting a Guernsey varies according to the amount of other work they may have to do. A good Knitter, by constant application, could knit one in a week, but the time from the giving out of the Worsted to the return of the knitted article averages from one to two months, and many Knitters keep them much longer than that. The number of persons employed varies according to the demand for the goods. During the past 12 months the trade has not been so great as for some time previous, and at present there are not quite as many persons engaged in it as in 1885.

The above was the only information obtained as to the rates of wages of Hand-Knit Hosiery workers.

RATES OF WAGES.

HOSIERY MANUFACTURE.

Average Rates of Wages of Operatives employed in the Hosiery Manufacture in each District, at 1st October 1886.

DISTRICT I.—PLACES IN NOTTS AND LEICESTER.

Total Number of Persons employed at
1st October 1886, as per Returns, 2,659.

Total Amount paid in Wages in 1885,
as per Returns, £92,392.

OCCUPATIONS.	Number employed, as per Returns.	Per- centage that the No. returned under each Occupation is of Total No. of Persons returned.	Average weekly Rate of Wages.	Number returned at rates within 10 per cent. above and below the average.	Average maximum weekly Rate of Wages.	Number on which average maximum Rate is based.	Average minimum weekly Rate of Wages.	Number on which average minimum Rate is based.

(a) The weekly hours of labour were not the same in all factories—50, 52, 54, and 56 hours all obtaining. The shorter hours were more usual in Nottingham than in Leicester, in which place 56 hours were generally worked according to the Returns received. The hours of Outdoor Workers cannot be given.

(b) Rates for a few outdoor Narrow Frame Workers were also received, averaging about 9s. per week.

(c) The men in the Warehouse were, so far as could be seen, indifferently returned as "Counterment," "Pressers," "Folgers," &c., and their rates of wages have therefore been classified according to amount and not according to occupation.

(d) Some of these men were old.

(a) Cannot be given.

(b) The rates of wages given in this Table are, with few exceptions, for a week's work of 54 to 56 hours.

(c) In some cases the rates of wages of "Menders" could not be returned, as the "Lace Makers" employed their own "Menders," many of whom were the men's wives.

DISTRICT III.—SOMERSET.

Total Number of Persons employed at
1st October 1886, as per Returns,
365. (a)

Total Amount paid in Wages in 1885,
as per Returns.
(b)

OCCUPATIONS.	Number employed, as per Returns.	Per- centage that the No. returned under each Occupation is of Total No. of Persons returned.	Average weekly Rate of Wages.	Number returned at rates within 10 per cent. above and below the average.	Average maximum weekly Rate of Wages.	Number on which average maximum Rate is based.	Average minimum weekly Rate of Wages.	Number on which average minimum Rate is based.

{Piece	15	4.1	6 3	—	— —	—	—	—

(a) Exclusive of Mechanics, Labourers, &c.

(b) Cannot be given.

(c) The hours of labour of the "Lace Makers" were 64 per week. Nearly all the other mill operatives worked 56 hours per week.

(d) Rates were also returned for a large number of outdoor "Menders." They worked at their own homes and earned from 1s. to 10s. per week. The higher rate was earned only by women exclusively engaged in mending.

DISTRICT IV.—AYRSHIRE, LANARK, AND STIRLINGSHIRE.

Total Number of Persons employed at
1st October 1886, as per Returns,
243.

Total Amount paid in Wages in 1885,
as per Returns.
(a)

OCCUPATIONS.	Number employed, as per Returns.	Per- centage that the No. returned under each Occupation is of Total No. of Persons returned.	Average weekly Rate of Wages.	Number returned at rates within 10 per cent. above and below the average.	Average maximum weekly Rate of Wages.	Number on which average maximum Rate is based.	Average minimum weekly Rate of Wages.	Number on which average minimum Rate is based.
MEN.

(a) The figures given in this Summary relate only to the rates of wages of Flock and Shoddy operatives employed in the "West Riding" and "Gloucestershire" Districts. A few Returns were received from London, but it was impossible to publish the averages deduced from them without disclosing the rates of wages paid by individual manufacturers.

Average Rates of Wages of Operatives employed in the
Manufacture of Flock and Shoddy in each District,
at 1st October 1886.

Total Amount paid in Wages in 1885,
as per Returns,
£21,273.

(a) Some of the men worked 59 or 60 hours per week.
(b) Some of the women worked 64 hours only.

DISTRICT II.—GLOUCESTERSHIRE.

Total Number of Persons employed at
1st October 1886, as per Returns,
159.

Total Amount paid in Wages in 1885,
as per Returns,
£4,617.

Under 10s. - - - Time and Piece	90	8'5	7 11	73	9 0	—	7 0	—

(a) Cannot be given.

(b) The hours of labour of workers at their own homes cannot be given. Those employed in the warehouses and laundries worked about 55 hours per week.

(c) It was stated that some of these men had other employments, and were not wholly engaged in weaving.

(d) Nearly all the Lads and Boys were returned as Hand Loom Weavers working at their own homes.

(e) It was stated that the low rates earned by some of these women represented the payments by one only out of two or more firms for whom they did work. In other cases the work was done in spare time only.

DISTRICT.—IRELAND (COUNTIES ARMAGH, ANTRIM, AND DOWN)—continued.

OCCUPATIONS.	Number employed, as per Returns.	Per- centage that the No. returned under each Occupation is of Total No. of Persons returned.	Average weekly Rate of Wages.
